The Internet was once heralded as a promising new avenue for radio stations to reach audiences all across the globe, well outside the broadcast ranges authorized by the authorities. Internet users could simply surf to an address on the World Wide Web, click a hyperlink and -- provided they had the right software -- listen to their favorite radio stations "stream" songs. But over the past five months, hundreds of U.S. radio stations have dropped their Internet simulcasts. This has a lot to do with the collapse of the Internet economy -- but also because of powerful forces that govern what is heard over the radio and who gets money for playing songs and advertisements.

According to a new contract between advertisers, ad agencies and the American Federation of Television and Radio Artists advertisers now owe commercial actors an additional fee if their advertisements are streamed over the Internet. Many radio broadcasters balked, saying the new fees would cut into already sagging ad revenues -- and they pulled their signals off the Internet. Another factor is 1998's Digital Millennium Copyright Act, which requires Webcasters to pay an additional fee for music over the Internet. (NPR)

When I was involved with the Tallahassee market, 1988-1992 (WTNT and WNLS), WFSU was #3 in the market! It is a very good station, and certainly fills needs that the small Tallahassee commercial radio economy can not finance.

3142. ABC Football Announcers

Newsgroup: rec.radio.broadcasting
Date: 2001-09-10 20:24:59 UTC
From: rizz4@fsuimail.ferris.edu
Message-ID: <tpq8crcaje18fa@corp.supernews.com>
Source record: 13303

The announcers for ABC's presentation of the Notre Dame Nebraska game were good, but no where near as good as they could be. The main problem of these guys versus the announcers at NBC is that the NBC announcers have more experience calling games and they keep the viewer at home interested unlike the abc announcers which seem to have boring lengthy conversations that no one really cares about. The NBC announcers especially from what I have seen calling Notre dame games, praise not only the great plays and tackles made by the Irish but they praise the outstanding plays of their opponents as well; where as ABC seems to praise the higher ranked team (# 4 Nebraska) than the lower rank (# 17 ND) making the viewer really wonder if they think an upset is possible. In conclusion, whether your an Irish fan, a CornHuskers fan, a Gator or a Seminole it does not matter who you root for but you as a fan need unbiased announcers(like that of NBC) that are willing to work hard and willing to praise both teams no matter if they are ranked in the top 25 or not. A great game is always a plus

Thats my general impression. The air is full of that in this area too,
every third signal up and down the dial is praise the Lord and send ME
the money stuff.

One of them is a full 100kw thats blanketing the hell out of my signal for
several miles around, and I DIDN'T get a notice about that one before it
went up on a 500+ foot stick.

I sent these guys a reply indicating I wanted a lot more data than they
had supplied, like the lat/lon, haat, erp and such. That was, like my
original post, 2 weeks ago. No reply as of last friday.

If I don't get a reply this week, I'll have our attornies file a squawk
letter.

Jay Howard, an 18 year employee of Clear Channel, was dismissed earlier this month. He was also the voice of the San Antonio Spurs. Clear Channel said "conflict of interest" was the reason for Howard's dismissal. C C brass felt he couldn't be the Spur's announcer and also speak objectively about the team on his regular sports show.

As expected, local citizens are outraged at the firing (oops, dismissal).

Got debt? We can help using Debt Consolidation!

If you owe $4,000 USD or more, consolidate your debt into just 1 payment and let us handle the rest! Wouldn't it be nice to have to worry about just 1 fee instead of half a dozen? We think so too.

- You do not have to own a home
- You do not need another mortgage
- No credit checks required
- Approval within 10 business days
- Available to all US citizens

For a FREE, no obligation, consultation, please fill out the form below and return it to us. Paying bills should not be a chore, and your life should be as easy and simple as possible. So take advantage of this great offer!

Please note that we deal in unsecured debt, so mortgages and car loans etc. cannot apply. Please enter 'N/A' where appropriate. Work phone can be a secondary/cell number.

KNLE's example is unusually blatant for a non-com--but they seem to be more of a religious station that's operating in the non-com band. (What surprises me even more is that they're a CNN Radio affil, considering that most Bible-thumpers on TV and radio severed their connections with CNN when Ted Turner started making his "religion is a sham" statements.)

In comparison, WMBI, the Moody Bible Institute's non-com in Chicago, has no corporate underwriting pages and only mentions listener donations on their web site. WBEZ, Chicago's NPR station, is much more restrictive on funding plugs, as this page will reveal:

http://www.wbez.org/support/frames.asp?HeaderURL=hd_supp.htm&BodyURL=corp.htm

Most NPR stations have similar policies to WBEZ's.

And college non-com stations have various policies regarding funding plugs ranging from the Pacifica-ish none at all to something a little more lenient than most NPR stations, but nothing as blatantly playing with FCC regulations as KNLE.

> pay for what they desire.

First of all, could you kindly sign your name? It must take a lot of courage to make the ridiculous statements that you make when you don't have a name to back them up.

And to quote from WUNC's own web site (http://www.wunc.org/about/faq.html):

I heard WUNC gets government funding. How much?
WUNC receives no funding from the state or the University of North Carolina at Chapel Hill. State support was eliminated in the early 1990s. WUNC receives a grant from the Corporation for Public Broadcasting, a federal agency, to help offset the cost of purchasing NPR programs. In the most recent fiscal year, the CPB grant was for roughly $311,000, less than ten percent of WUNC's overall operating budget. Ninety percent of our operating funds come from individual contributors and donations from local businesses.

That's pretty much the same as the rest of the nation--and a relative pittance compared to the amount of taxpayer money wasted by the military all year-round.

And in case you didn't know, because of the increased number of corporate underwriting announcements, people on the far left are now claiming that public radio has "sold out" to "Evil Capitalist Corporate AmeriKKKa" and has ceased being an alternative. Which means they hate public radio as much as you do--although you hate it because it tends to treat blacks, women, Latinos, Asians, gays and lesbians as human beings.

But I guess people like you think that Randy Michaels and Mel Karmazin are broadcasting giants and that radio stations are only licenses to print money, not provide public service. Shame on you.

Quoth ktalkradio@aol.com (Radio) in <tpkr7jc0lpi6a2@corp.supernews.com>:
|
|No doubt, but that won't change the fact that WUNC and WCPE are
|welfare cases.

No less than commercial stations are welfare cases, profiting from
licenses to a publicly-owned frequency for which they pay next to nothing.

Your employers are suckling at the public teat every bit as much as are
WUNC and WCPE. If you were required to pay your way, paying an annual
licensing fee that even approached the value to you of the frequencies
you occupy, you'd be screaming bloody murder.

So heed my advice; don't protest too loudly about public radio, lest
public scrutiny be aimed at the shaky foundation upon which your own money
machines rest.

HI, in fact I am going home again in two days and will of course tune in to local media the minute I hit the rental car. I really do not like classic rock and country, and those are everywhere in TLH. There are three christian stations in that one medium size town, all on AM, and I do not know how they survive. I don't know how long its been since you were back in town but if it was 1992, things have really changed. Forgive me if you already know all of this: channel 6, once the only news outlet on TV, finally got some limited competition and even had a couple of it's talent types go to work for other stations. Since I grew up there, seeing this take place was really shocking; but now, one of the others has cancelled it's newscast and I think it's only channel 6 and 27 again. 6's newscast looks really sharp again, you know for TLH anyway, and I think it's back on top. WFSU may have done this while you were here, but interference in their 91.5 frequency had always been a problem while i lived there and they now have another frequency and call letters with a nice clear signal.I think it's WFSQ, but 91.5 is still in use as WFSU so the outift now broadcasts on two frequencies. Way to go, guys!! Along with a flurry of new stations broadcasting from smaller outlaying areas such as Quincy and Havana, comes some more big city formats such as dance but without the very urban sounding DJ's. My old favorite, WBGM 98.9, a powerhouse, changed a couple of years ago to The Breeze and plays light rock---YEECH. It's not called WBGM anymore either. What was once WANM 1070 AM and TLH's most powerful AM went to CNN radio a few years ago but recently has gone to religious/christian and stays on until 10pm. Not sure how they get around the dawn to dusk rule, they use to sign off at sundown. AM 1410, which use to play bubble gum top 40 when i was growing up, has gone christian-soul after completely going off the air for a while. Dawn to dusk. AM 1330 has been for many years, WCVC, christian voice of the capital and hangs on. Lastly, a TLH fave 1450 WTAL has had problems and actually went silent for a couple of months. My uncle up there told me the owner lost his lease on the building and had to move the business and transmitter, but could find no place to legally build a new TM. He shut it down. When I was in town three months ago, it was back on as News-Talk again, having been bought by a person who brought it back on the air in order to sell it. If I had the bucks, I'd buy it just for fun and see what happened.

Hey, I'm sorry about the long reply. But, if you worked there for a while, I thought you might be interested. I have noticed every time I go up, at least

one station had changed formats. It's a very fluid city. see ya. geoff.

This kind of thing happens in radio all the time, not just at CC.
And yes, the public reason is probably a mere excuse. More likely
he told some station exec to stuff something, or said exec just wanted
to hire his cousin, or bring in a new talk guy who did well in another
market.

In showbiz, there is no job security.

From: rizz4@fsuimail.ferris.edu
Message-ID: <tpsvvr5qtiju62@corp.supernews.com>
Source record: 13336

The announcers for ABC's presentation of the Notre Dame Nebraska game were good, but no where near as good as they could be. The main problem of these guys versus the announcers at NBC is that the NBC announcers have more experience calling games and they keep the viewer at home interested unlike the abc announcers which seem to have boring lengthy conversations that no one really cares about. The NBC announcers especially from what I have seen calling Notre dame games, praise not only the great plays and tackles made by the Irish but they praise the outstanding plays of their opponents as well; where as ABC seems to praise the higher ranked team (# 4 Nebraska) than the lower rank (# 17 ND) making the viewer really wonder if they think an upset is possible. In conclusion, whether your an Irish fan, a CornHuskers fan, a Gator or a Seminole it does not matter who you root for but you as a fan need unbiased announcers(like that of NBC) that are willing to work hard and willing to praise both teams no matter if they are ranked in the top 25 or not. A great game is always a plus

Been done that way for years! The only difference between a
"commercial" and an "underwriting announcement" is that the latter
cannot contain a call to action. Besides that semantic distinction,
they are often indistinguishable one from the other. Many non-comms
now employ commissioned salespeople, although they may not always call
them that.

When I worked in Cincinnati I found it outrageous that Xavier
University could run what for all practical purposes was a commercial
station on the non-comm FM band in direct competition with a
commercially-licensed AM in the same format (jazz). It just seemed to
me that such an operation violated the whole notion of what
"non-commercial, educational" broadcasting is supposed to be. But
nobody else seemed to care.

The religious broadcasters are the worst offenders, though. I've
heard religious "non-commercial" FM's that sound exactly like their
commercial counterparts. There's even one in my market that's
co-owned with a commercial station.

From Radio Sweden's MediaScan.

WEBCASTING--Have you been wondering why your favorite station is no longer webcasting? NPR's "All Things Considered" reported on the situation on August 30:

The Internet was once heralded as a promising new avenue for radio stations to reach audiences all across the globe, well outside the broadcast ranges authorized by the authorities. Internet users could simply surf to an address on the World Wide Web, click a hyperlink and -- provided they had the right software -- listen to their favorite radio stations "stream" songs. But over the past five months, hundreds of U.S. radio stations have dropped their Internet simulcasts. This has a lot to do with the collapse of the Internet economy -- but also because of powerful forces that govern what is heard over the radio and who gets money for playing songs and advertisements.

According to a new contract between advertisers, ad agencies and the American Federation of Television and Radio Artists advertisers now owe commercial actors an additional fee if their advertisements are streamed over the Internet. Many radio broadcasters balked, saying the new fees would cut into already sagging ad revenues -- and they pulled their signals off the Internet. Another factor is 1998's Digital Millennium Copyright Act, which requires Webcasters to pay an additional fee for music over the Internet. (NPR)

The NPR complete report is at:

http://www.npr.org/programs/atc/features/2001/aug/010830.webcasting.html

Not that this is of much importance compared to the (probably)
thousands who have lost their lives today, but I would imagine most New
York area stations are running from alternate transmitter sites today.
The huge antennae on top of the World Trade Center are sitting
somewhere in the rubble.

I will never forget the horrible pictures from New York today. I don't
understand what point the perpetrators are trying to make and I suppose
we'll never make much sense of it.

In the real world, I don't see why not. They mention the special non-comm
rules several times. I'm not a lawyer, but as I understand it, as long as
the "spot" doesn't include a 'call to action' it's fine.

>OK...trunk or feeder carrier? I did my tours at Pan Am and United.

I certainly can't name names such as those, but I already respect you! In order, it was first a Westwind business jet for a company in Birmingham, then a 727 for now defunct Carnival Airlines, and finally a stint with a Continental Express carrier. geoff.

Wait until a local commercial station complains to the FCC.
They will be reamed so hard they won't sit for a month.

>Gutherie and get 2- of the three, Gutherie/Parry. And there is no room for
>LPFM ---hummmmm, something rotton in Denmark me thinks. ;-(

Thats my general impression. The air is full of that in this area too,
every third signal up and down the dial is praise the Lord and send ME
the money stuff.

One of them is a full 100kw thats blanketing the hell out of my signal for
several miles around, and I DIDN'T get a notice about that one before it
went up on a 500+ foot stick.

I sent these guys a reply indicating I wanted a lot more data than they
had supplied, like the lat/lon, haat, erp and such. That was, like my
original post, 2 weeks ago. No reply as of last friday.

If I don't get a reply this week, I'll have our attornies file a squawk
letter.

3186. Departures raise questions about UNC-TV

Newsgroup: rec.radio.broadcasting

Mark Jeffries (mjeffries@krw.com) sent you the following article from
the News & Observer on the Web.
(http://www.newsobserver.com)

Comments from Mark Jeffries:
I thought this article apropos in regard to the thread about sister radio WUNC flipping to news-talk:

The News & Observer:
Departures raise questions about UNC-TV

By BILL KRUEGER AND JOSEPH NEFF, Staff Writers

With 11 transmitters blanketing the state, the reach of UNC-TV is vast. Almost anyone with a television in North Carolina can see what the state's public station is showing. UNC-TV can be a powerful way to get out news about the legislature, elections or natural disasters.

Not a chance. In the first place, the FCC doesn't regulate what a station can or cannot say on a website. In the second place, there is nothing on this little station's web site that's illegal to say. _All_ public radio stations that accept underwriting money have a sales staff. There is _no_, repeat _no_ FCC restraints on asking underwriters to underwrite, to tell them that it will be good for their businesses to do so, etc. The only thing that really matters is what the station says on the air in behalf of the underwriter. That, as you may know, is regulated. A complaint by a commercial station against a public radio station soliciting underwriting accounts will go nowhere. Period. End of subject.

Have a nice day.

Best.

>> but I would imagine most New York area stations are running from alternate transmitter sites today. <<

That is the case with all the NYC radio stations, except 93.1 WPAT and 93.9 WNYC which remain off the air (even though WPAT has a back-up transmitter at the site of their sister station WPAT 930 AM Stereo in New Jersey, which they are apparently not using).

On the TV side, the only VHF NYC station still on the air in full force is Channel 2 WCBS, broadcasting from their backup transmitter on the Empire State Building (also used during the WTC bombing in 1993).

NBC-4, Fox-5, ABC-7, UPN-9, and PBS-13 are all completely off the air, while ABC is broadcasting over the New Jersey PBS system on various UHF channels (23, 50, 52, 58), and WPIX (The WB) is broadcasting a very weak and snowy signal on their normal Channel 11, perhaps from some backup transmitter off on Long Island.

On the UHF side, it seems like all the normal NYC stations are still on the air, although most are re-broadcasting other networks.

It is also interesting to hear various FM stations simulcasting AM news stations, including a rare AM STEREO/FM STEREO simulcast in central New Jersey with "Magic 98.3" WMGQ-FM in New Brunswick simulcasting their sister station WCTC 1450 AM Stereo.

This afternoon I almost literally had only ONE station to choose from if I actually wanted to listen to music: tiny 250-watt daytimer 1070 WKMB in Stirling, NJ. While obviously it is important to have all this news coverage and discussion, it was also nice to have at least some solace from the madness, and have at least one station that I could tune in and pretend that everything was normal, with the usual music, commercials, weather reports, and the like.

Meanwhile, I must commend the "Ron and Fez" show on 102.7 WNEW-FM. Usually a very silly and somewhat vulgar talk show, Ron and Fez have suddenly gotten serious and through their chats with listeners it is clear that these two normally strange and obnoxious guys actually have a kind and compassionate heart.

To followup a bit, I had a voicemail message monday morning that came in
saturday, without a return phone number or any other means of contacting
them in it. But the voice claimed he would send all the data by fax
first thing monday morning. Well, I've haunted the fax machine for 2
days now without detecting anything from them among all the other,
highly illegal, fax machine spam.

Time to 'nip this one in the bud' if they don't want to play by the
rules.

Heck, if they actually *were* somebody, you'd think they'd be copying the
mail on this group, and be well aware that their boat is gonna get
rocked and/or swamped.

My next mail request to them will get a CC: to Frank Perry I think.

If you have cable you're OK. Stations feed the cable systems directly.
WCBS has an alternate site on the Empire State Building. The rest of
the stations are using suburban UHF stations to carry their
programming. When they'll be back on the air, and where, is anyone's
guess. The new Conde Nast building has an alternate antenna
installation for radio in Times Square. It might be able to handle TV
installations.

With the New York VHF signals off the air, I was quite surprised to see the following stations on the air this morning. At first I thought some of them were the local's back with low power like channel 11:

WJLT Channel 7 Washington, DC
WUSA Channel 9 Washington, DC
WJZ Channel 13 Baltimore, MD

I am on the North Shore of Long Island and these signals were strong.

3193. New STAGE LEFT episode on line: "Back in the Alley"

Newsgroup: rec.radio.broadcasting
Date: 2001-09-15 18:57:58 UTC
From: thedoge@pobox.com
Message-ID: <tq795mmdkfd41b@corp.supernews.com>
Source record: 13254
Cross-posted to: rec.arts.theatre.musicals,rec.radio.broadcasting,rec.radio.noncomm,stl.general

The latest edition of the STAGE LEFT webcast went on line today (September 12). You can listen to it any time with RealPlayer at http://www.stageleft.org or http://www.kdhx.org/listen.htm Please send me a note with your comments at chuck@stageleft.org

This week it's a program of new releases from the Fynsworth Alley label: the original cast of "Working", the revival cast recording of "The Best Little Whorehouse in Texas", the all-star concert performance of "Elegies for Angels, Punks and Raging Queens" (recorded live at a benefit for the Millenium AIDS Project), and Christiane Noll's new CD, "The Ira Gershwin Album"

You can get both the current episode of STAGE LEFT and the last four shows at http://www.stageleft.org or http://www.kdhx.org/listen.htm. This week's play list is at http://www.stageleft.org/010912.html

Next Week (9/19): "Cinderella Story" - Various musical treatments of the classic fairy tale, including two cast recordings of the Rogers and Hammerstein version (starring Julie Andrews and Lesley Ann Warren), the ballet by Prokofiev and the opera by Rossini ("La Cenerentola").

We had a lot of that here in LA too. KTWV simulcast KFWB, I think a couple of other FM stations (KOST and KBIG) simulcast KFI. In fact, some time late last night, KOST and KBIG were simulcasting each other (playing the exact same songs, etc)

Indeed. Even the sports stations were talking about the incident. Understandable, yes. But at some point I felt like, as Charlie Daniels put it, "no place to run to where I did not feel that war".

Eventually KTWV went back to playing "smooth jazz", so I could get some rest.

I don't know that show particularly, but I think you'll find a lot of folks are basically decent....it's a shame that something like this must happen to bring it all out.

3196. DX test

Newsgroup: rec.radio.broadcasting
Date: 2001-09-15 18:58:02 UTC
From: wahollerman@globalreach.net
Message-ID: <tq795q7u62ek21@corp.supernews.com>
Source record: 13258

Here's notice of an upcoming DX test...

PLEASE NOTE: Even if you don't hear a test, be sure and drop a card, letter, or e-mail to the station personnel, thanking them for going to the trouble to run a test!

Sunday, November 4, 2001 - WODI-1230, Brookneal, VA will conduct a DX test from 1:00 am - ?? EST. The test will consist of Morse code, distinctive music, and voice announcements.

Reception reports(with return postage) may be sent to:

Dave Marthouse
WODI Radio
1230 Radio Road
Brookneal, VA 24528

E-Mail: wodi@lynchburg.net

(Arranged by Dave Marthouse for the NRC/DXAS.)

Also, if you hear a test, PLEASE, PLEASE let me know, via either e-mail or in rec.radio.shortwave! And if you send a reception report to
a station, please remember to include return postage with your report...

Lynn.
(ircamember@geocities.com)
Visit the IRCA Web site at http://www.geocities.com/Heartland/5792

Just heard it on bay area station KFOG. Darrian O'Toole was killed during the N.Y. attack; they were citing a report on All Access.

Her act turned mean spirited and I lost interest, but certainly didn't wish anything like this on her.

There was a post on the broadcast.net list claiming that a number of stations will be using Major Armstrong's old FM tower in Alpine, New Jersey, though at last report the tower was full of LMR and paging antennas.

Per WNYC's web site, the FM station's programming is being broadcast on the Board of Education's WNYE at 91.5 (of which there have been rumors that the Board of Ed wants to sell WNYE to WNYC, to the dismay of the ethnic broadcasters who lease time on the station for foreign-language programming).

This is a compression artefact - AFIAK there is no name for this specific artefact, but I know the one you're talking about well (although there seems to be something wrong with the link on your site). Most people don't notice it unless it's really obvious - you can make it obvious if you make the bitrate on an MP3 very low, for example - it really depends on how carefully you listen, how good the speakers you listen to it on are, and how much you listen.

The reason it is created is this: most audio compression (like MP3 and ATRAC) works by breaking the signal up into chunks larger than the samples and saying that for the whole of that chunk the sound is the same (that's over simplifying things enormously btw). This means that you can have a much lower data rate, however the larger you make these segments the more they become audible. This process works well for low and mid frequencies because they don't change very quickly, however, high frequencies, like cymbals especially, do change quickly, so what happens is that the cymbals make a kind of shimmering sound, because their changes are being lost when the compression throws the data away. Many codecs do have filters and clever algorithms that will reduce this to a degree, but as with any lossy compression, massive amounts of data are still being thrown away.

Does anyone know whether there is still space on the Empire State Building tower for radio or TV transmitters? Who the owner of the ESB mast is? What the rental charges are? Whether the old TV transmitters on the ESB tower still exist on the site?

Were radio transmitter engineers on site at the time of the WTC collapse? If so, was there a joint facility or did they operate out of separate locations on different floors? (TV engineers, I understand, were lost at the 104th and 110th floors.)

The following is the item that I included in my newsletter, Studio Briefing, on Friday.

>WNBC-TV announced Thursday that William Steckman, one of its transmitter
>engineers assigned to the World Trade Center's north tower, is missing and
>presumed dead following the collapse of the building. The NBC-owned
>station said that it last heard from Steckman after the first plane struck
>the building when he phoned the station from the 104th floor to say that
>he was powering down the transmitter. All New York television stations had
>maintained transmitters on the WTC tower. A CBS source said that the New
>York affiliate lost two engineers who were stationed on the 110th floor.
>WPIX also reportedly had assigned an engineer to the site. Engineers from
>WNYW (Ch. 5) WBIS (Ch. 31), and WJNU (Ch. 47) were also believed to have
>been on duty. Of all of the stations, only CBS-owned WCBS-TV maintained a
>backup transmitter (at the Empire State Building). If not for that backup,
>some 1.7 million New Yorkers who do not have access to cable would have
>been left without TV coverage of the disaster in their city. WNBC-TV and
>WABC-TV said Thursday that they plan to install temporary transmitters in
>Alpine, NJ.

Message-ID: <tqa7ierb9p538@corp.supernews.com>
Source record: 13268

I got this list from Fybush.com:

WCBS-TV 2 (CBS) Now On-the-air from the Empire State Bldg
WNBC-TV 4 (NBC) Now on-the-air with a low power transmitter from the
Armstrong Antenna site in Alpine,New Jersey
WNYW-TV 5 (Fox) Now on-the-air from its HDTV site on the Empire State Bldg
WABC-TV 7 (ABC) To be on-the-air from using a low power transmistter from
the Armstrong site in Alpine, New Jersey early next week.
WWOR-TV9 (UPN) Only on-the-air for satellite and cable. Over the air
signal still down.
WPIX-TV 11 (WB) On the air supposedly from a site on E 42nd street (The
same building which houses their studios)
WNET-TV 13 (PBS) Only on the air for cable. To be back on-the-air
broadcast from the Armstrong site in Alpine, NJ early next week.
WPXN-TV 31 (Pax) On-the-air for cable only. No word on when the broadcast
signal will be back up.
WNJU-TV 47 (Telemundo) On-air for cable only. Again no word on when the
broadcast signal will be restored.

I was suprised there were fewer radio stations on the WTC. Here they are:

WKCR 89.9 FM Off-the-air until further notice according to the stations
web site.
WNYC 93.9 FM Has been using WNYE's signal. Expected to be back on-the-air
from the Empire state bldg using WKCR's studios sometime next week.
WKTU-FM 103.5 Using it's backup site at 4 Times Square.

I'm plesantly suprised to see that the New York TV stations feed the cable
system(s) in NYC directly. Is that done in other 'major' cities (ie LA,
Chicago, Boston, DC etc.)

Has anyone outside of NYC seen any of the local coverage from New York?
Viacom's Boston stations WBZ-TV and WSBK have carried some of the coverage
during the week and Saturday afternoon from sister station WCBS-2. For
someone who in the past has not been too impressed with the NYC stations, I
thought the coverage from WCBS was pretty good.

I'm sure many music stations had a lot of internal discussions about
when to resume normal programming. I know that we did.

KUZZ AM/FM, normally a 100 % simulcast country music station, switched
to all-news approximately 30 minutes after the first plane hit the
WTC. Using AP Network News and our own 5-person news staff, we
remained in non-commercial all-news mode through the day, until
President Bush's speech Tuesday evening. When Bush signed off, saying
"God Bless America," we segued to Lee Greenwood's "God Bless the
U-S-A" and returned to music, although the programming was not what
you would call "normal" and still isn't. We're mixing in a lot of
patriotic songs and montages, along with news updates and "community
bulletin board" type announcements of local events such as prayer
services and fund-raisers. We're also airing more listener calls than
usual.

It has been said that having a news department, especially on a music
station, is like an insurance policy. On Tuesday, ours paid off. No
one in our market could match our coverage, mainly because of the
reporters we could put in the field. We didn't have to run TV audio,
or simulcast some other station. And believe me, listeners noticed.

I also want to give kudos to AP Network News, which provided
continuous, non-sensational, non-speculative coverage. Their
operation, which is woefully understaffed for what they do, filled a
need for solid, non-hysterical, fact-centered journalism, and this is
one AP member station that really appreciates it.

WCBS has actually gotten good? I left NYC in 97 and at that point Ch2 news was a joke, and for good reason. The ratings have been terrible since then too.

Does anyone know whether there is still space on the Empire State Building tower for radio or TV transmitters? Who the owner of the ESB mast is? What the rental charges are? Whether the old TV transmitters on the ESB tower still exist on the site?

Were radio transmitter engineers on site at the time of the WTC collapse? If so, was there a joint facility or did they operate out of separate locations on different floors? (TV engineers, I understand, were lost at the 104th and 110th floors.)

The following is the item that I included in my newsletter, Studio Briefing, on Friday.

>WNBC-TV announced Thursday that William Steckman, one of its transmitter
>engineers assigned to the World Trade Center's north tower, is missing and
>presumed dead following the collapse of the building. The NBC-owned
>station said that it last heard from Steckman after the first plane struck
>the building when he phoned the station from the 104th floor to say that
>he was powering down the transmitter. All New York television stations had
>maintained transmitters on the WTC tower. A CBS source said that the New
>York affiliate lost two engineers who were stationed on the 110th floor.
>WPIX also reportedly had assigned an engineer to the site. Engineers from
>WNYW (Ch. 5) WBIS (Ch. 31), and WJNU (Ch. 47) were also believed to have
>been on duty. Of all of the stations, only CBS-owned WCBS-TV maintained a
>backup transmitter (at the Empire State Building). If not for that backup,
>some 1.7 million New Yorkers who do not have access to cable would have
>been left without TV coverage of the disaster in their city. WNBC-TV and
>WABC-TV said Thursday that they plan to install temporary transmitters in
>Alpine, NJ.

The report is false, and has been retracted. Darian is alive.

>Chicago, Boston, DC etc.)

Maybe it's more common than you think.
We do it in Austin, TX-- TV market 54.
We used to feed the cable 24-7 even though we signed off the air overnight.
Now we're 24 hours on the air, too.

>> WCBS has an alternate site on the Empire State Building. <<

WCBS also used that during the WTC bombing in 1993, but yet it isn't listed in the FCC database, although their digital TV setup on channel 56 is listed with a 349-kW transmitter on the Empire State Building.

>> The rest of the stations are using suburban UHF stations to carry their programming. <<

...except Ch. 25 WNYE, Ch. 41 WXTV, and Ch. 68 WHSE, which are full-power UHF stations that broadcast from the Empire State Building. All are now rebroadcasting other networks, mostly ABC (which appeared on about a half-dozen UHF stations last night, but some might have switched to other networks by now).

Also, last night here in central NJ I got a very weak, snowy signal on Channel 11. This could either be "DX" from some distant station, or it could be WPIX-TV fudging a weak signal on the air from some alternate site, perhaps with just enough power to cover the immediate NYC area. Anybody else see this?

I know a number of years back, ABC supplied different types of newscasts to affiliates, but was quite surprised to listen this morning to two different ABC affiliates which were running different newscasts. One was the standard newscast read by Doug Limerick with the ABC sounder. The station next to it on the dial featured a newscast by Richard Davies with no sounder, simply a one-line tease, a name, then the bulk of the newscast. It wasn't one of the status reports, as this was a full newscast.

How many newscasts does ABC supply these days to affiliates?

Jim

The following was received from Charles Pappas
Yahoo Internet Life <http://www.yil.com and is being forwarded to you in case you have not already received this information.
The mass murders in New York City, Washington, DC, and southwestern Pennsylvania may have stopped -for now, at least- but the terror and pain will persist. As Shakespeare said, "The evil that men do lives after them. The good is oft interred with their bones."
But that necessary American, Thomas Paine, spoke for his time and ours in The Rights of Man when he said, "My country is the world and my religion is to do good."
Even amid the chaos and disbelief and a magnitude of malice that is as astronomical as it is vile, we can do great good, too. Below are several sites and online resouces here you can donate money and blood and help. If you feel it's not worth it because the damage seems so great and your contribution seems so small, remember something else Shakespeare wrote: "How far that little candle throws his beams! So shines a good deed in a naughty world."

*The American Red Cross:
Make an online donation, or plug in your Zip code to find out where to give blood. Type O and all Rh Negative donors are the most urgently needed right now.
The American Red Cross
<http://www.redcross.org/>
Online Donation page
<http://www.redcross.org/donate/donate.html>
Online Forum
<http://pub70.ezboard.com/frunningthingsfrm18.showMessage?topicID=11.topic>
Online Blood Bank Locater <http://www.redcross.org/services/biomed/blood>
*New York Red Cross:
The New York branch of the Red Cross takes credit card donations (or donations made through your checking account debit card) here of at least $10: <http://www.nyredcross.org/>
*1-877-REDCROSS or send an email to: contribute@arcgny.org
If you're interested in making a donation of goods, please call this number or email this address.*Amazon.com's page devoted to the Red Cross Disaster Relief Fund: Here you can contribute from $1 to $100. Amazon has waived all fees for this project and is donating every cent you contribute.
<http://s1.amazon.com/exec/varzea/paypage/PKAXFNQH7EKCX/002-3768933-0187256>

*United Way of New York City:
One hundred percent of your online contribution to the United Way's September 11th Fund will go to support vital services for victims and their families: <http://www.uwnyc.org/>
United Way's September 11th Fund:

<https://www.uwnyc.com/epledge/sept11.cfm>
*Catholic Charities USA:
The 1,400 local agencies and institutions that make up Catholic
Charities provide social services across the country to more than
10 million people. You can contribute money directly online, make a
gift of stock to help out the needy, or use the site's database to
locate a Catholic Charity center near you:
<http://www.catholiccharitiesusa.org/>
*PayPal relief fund:
The popular payment transfer site has created, "a special fund to
help PayPal members provide assistance to those affected by this
tragic event." Registered users can easily money, which goes to the
National Disaster Relief Fund of the American Red Cross:
<http://www.paypal.com/cgi-bin/webscr?cmd=p/gen/relief-outside>
*FireDonations:
All proceeds you give to the Firefighter, EMS, and Rescue Relief
Fund through a credit card or electronic check will go to the
survivors of New York's bravest: <http://relief.yahoo.com/firedonations>

To purposefully fly a perfectly good airplane into the side of a perfectly good building makes no sense at all.

And removing express baggage check-in when that practice had no involvement whatsoever, makes no sense, either.

War has become the way of the rest of our world - no physical borders, it just took it longer to catch on.

In any event, since the question has been raised, my curiosity has me wondering why the New York Seven don't still have their antennas on the Empire State Building, or if they do, why none except for 2 is using it. Before moving to 1WTC, they were all there. I was under the impression that the Empire State Building then became the auxiliaries when the main signal started radiating from the new, higher tower.

For those who are not familiar with the NYC ADI, most viewers, pre-cable, only cared about WCBS-TV 2, WNBC-TV 4, WNEW 5, WABC-TV 7, WOR-TV 9, WPIX-TV 11, and WNET 13. (Ok, WNEW became WNYW in 1986 when the license was transferred to Rupert in the deal that made him a US citizen. And, in a separate case, WOR became WWOR 4 years after being deported to Secaucus in the General Tire mess.)

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

From darianotoole.com...

9/13/01 -
There have been news reports that Darian was a passenger on one of the aircraft involved in Tuesday's disaster.

These reports apparently originated as a rumor in New York that was spread by email.

We're very happy to report that Darian has been at home all this week, and is very healthy.

It's unfortunate that these reports may have brought grief, however temporary, to some of her family, friends and fans.

Darian and all of us at darianotoole.com send our best wishes to everyone directly affected by this tragedy, some of which are our family and friends.

Sincerely,
Mike Barker
Webmaster

Rey

I got this list from Fybush.com:

WCBS-TV 2 (CBS) Now On-the-air from the Empire State Bldg
WNBC-TV 4 (NBC) Now on-the-air with a low power transmitter from the Armstrong Antenna site in Alpine,New Jersey
WNYW-TV 5 (Fox) Now on-the-air from its HDTV site on the Empire State Bldg
WABC-TV 7 (ABC) To be on-the-air from using a low power transmistter from the Armstrong site in Alpine, New Jersey early next week.
WWOR-TV9 (UPN) Only on-the-air for satellite and cable. Over the air signal still down.
WPIX-TV 11 (WB) On the air supposedly from a site on E 42nd street (The same building which houses their studios)
WNET-TV 13 (PBS) Only on the air for cable. To be back on-the-air broadcast from the Armstrong site in Alpine, NJ early next week.
WPXN-TV 31 (Pax) On-the-air for cable only. No word on when the broadcast signal will be back up.
WNJU-TV 47 (Telemundo) On-air for cable only. Again no word on when the broadcast signal will be restored.

I was suprised there were fewer radio stations on the WTC. Here they are:

WKCR 89.9 FM Off-the-air until further notice according to the stations web site.
WNYC 93.9 FM Has been using WNYE's signal. Expected to be back on-the-air from the Empire state bldg using WKCR's studios sometime next week.
WKTU-FM 103.5 Using it's backup site at 4 Times Square.

I'm plesantly suprised to see that the New York TV stations feed the cable system(s) in NYC directly. Is that done in other 'major' cities (ie LA, Chicago, Boston, DC etc.)

Has anyone outside of NYC seen any of the local coverage from New York? Viacom's Boston stations WBZ-TV and WSBK have carried some of the coverage during the week and Saturday afternoon from sister station WCBS-2. For someone who in the past has not been too impressed with the NYC stations, I thought the coverage from WCBS was pretty good.

No wonder CC fogged all its stations nationwide, regardless of format, with bombing coverage. And please don't say they did it "out of the goodness of their heart." Al D'Amato started the Holocaust lawsuits out of the goodness of HIS heart -- during an election year. (He didn't win.)

>> Per WNYC's web site, the FM station's programming is being broadcast on the Board of Education's WNYE at 91.5 <<

Speaking of 91.5 WNYE, when will they ever fix their audio? For many, many years it has been "spitty", with a lot of distortion, especially when received in Stereo.

Anyway, WNBC-4, WNYW-5, WABC-7, and WPIX-11 are back on the air from the Armstrong tower in Alpine, NJ, although this is only a temporary solution because the signals are not nearly strong enough to cover the NYC metro area adequately. For the time being, WWOR-9, WNET-13, and WPXN-31 remain off the air.

This is a compression artefact - AFIAK there is no name for this specific artefact, but I know the one you're talking about well (although there seems to be something wrong with the link on your site). Most people don't notice it unless it's really obvious - you can make it obvious if you make the bitrate on an MP3 very low, for example - it really depends on how carefully you listen, how good the speakers you listen to it on are, and how much you listen.

The reason it is created is this: most audio compression (like MP3 and ATRAC) works by breaking the signal up into chunks larger than the samples and saying that for the whole of that chunk the sound is the same (that's over simplifying things enormously btw). This means that you can have a much lower data rate, however the larger you make these segments the more they become audible. This process works well for low and mid frequencies because they don't change very quickly, however, high frequencies, like cymbals especially, do change quickly, so what happens is that the cymbals make a kind of shimmering sound, because their changes are being lost when the compression throws the data away. Many codecs do have filters and clever algorithms that will reduce this to a degree, but as with any lossy compression, massive amounts of data are still being thrown away.

For San Francisco this is so. ATT get's it's feed of the Sutro
Tower stations directly. Normally demoded from the transmission
line.

I'm sure many music stations had a lot of internal discussions about
when to resume normal programming. I know that we did.

KUZZ AM/FM, normally a 100 % simulcast country music station, switched
to all-news approximately 30 minutes after the first plane hit the
WTC. Using AP Network News and our own 5-person news staff, we
remained in non-commercial all-news mode through the day, until
President Bush's speech Tuesday evening. When Bush signed off, saying
"God Bless America," we segued to Lee Greenwood's "God Bless the
U-S-A" and returned to music, although the programming was not what
you would call "normal" and still isn't. We're mixing in a lot of
patriotic songs and montages, along with news updates and "community
bulletin board" type announcements of local events such as prayer
services and fund-raisers. We're also airing more listener calls than
usual.

It has been said that having a news department, especially on a music
station, is like an insurance policy. On Tuesday, ours paid off. No
one in our market could match our coverage, mainly because of the
reporters we could put in the field. We didn't have to run TV audio,
or simulcast some other station. And believe me, listeners noticed.

I also want to give kudos to AP Network News, which provided
continuous, non-sensational, non-speculative coverage. Their
operation, which is woefully understaffed for what they do, filled a
need for solid, non-hysterical, fact-centered journalism, and this is
one AP member station that really appreciates it.

All the 7 analog broadcast television stations in the Minneapolis St
Paul market have fiber modulators in their respective master control
rooms to feed fiber to the cable directly - and not from the
transmitter sites.

They didn't play it because it's a pansy song......not someting a rock
station would play.

Try your local Easy Listening station instead.

This is done even in smaller markets. When my employer owned a TV
station (sold some years back), we fed cable headends directly. It
saved our bacon when our transmitter was destroyed in an arson fire,
as cable penetration in this market approaches 85%. For the vast
majority of our viewers, it was as if nothing had happened.

I was listening to the radio some on the day of the attack on the World Trade Center. I noticed that most stations seemed to find a news source to provide coverage.

Clear channel used the news resources of 1510-AM WLAC while most of the others used ABC radio. 96.3-FM WMAK carried the Fox News channel while their sister station WJXA-FM 92.9 carried news from our local NBC TV affiliate WSMV channel 4.

Most of these stations usually don't carry network news of any kind but they all have some syndicated programming. I was wondering; Did the networks provide coverage for any one who wanted it free of charge on that day and the 2 or 3 days to follow?

Hello, Hello..

I am quite accomplished in audio engineering and recording MUSIC and am acquainted with the professional tools of the trade .

I've recently been very interested in transferring my skills into radio/audio productions, mostly interviews of people with additional narration, music and backing ambience tracks.

Does anybody out there know what type of SOFTWARE & RELATED EQUIPMENT radio stations use to edit and create these kinds of programs today? I know there are a lot of hobbyists out here as well but I'm trying to get a handle on what say an NPR would use to produce a piece that I hear over the airwaves.

Also, if anybody can recommend any good sites or books on recording, editing and mastering broadcast audio it would be greatly appreciated.

thanks in advance

Apparently CBS made that available to affiliates after the network went back to entertainment programming; WLKY-TV in Louisville carried it for a while.

And here's a response to the previous article I posted a link to:
http://www.latimes.com/entertainment/printedition/calendar/la-000075068sep19.story

Personally, I can't blame the stations for being a bit gun-shy about playing songs about airplanes, crashes, etc. Although how much of this is actual sensitivity as opposed
to avoidance of accusations of tastelessness, angry calls, etc. is something that I'm really in no position to judge at this time...

Good grief!!

Try and follow this: Whether or not a radio station plays your request has nothing to do with whether or not you are living in what you call a free society. You have _never_, ever had a _right_ in this free society to have a song you like played on a radio station.

Try and follow this (Part II): Do you remember that a couple of airplanes crashed into a couple of buildings in a city called New York City a week or so ago? Catch any news lately? You might have heard about it. But maybe not. Anyway, I understand that 5000 or so people died. Almost all of them had friends and relatives. It's been a bummer for them for sure. And, you know what? There are probably quite a folks throughout the United States, even the world, who are a little bummed out by these deaths. I know it'll be hard for you to imagine that, but give it a try. They are a little "extra sensitive" about a lot of things right now, including, probably, the three words "Crash Into Me."

Can you conceive of that? Ah, probably not. What's the use?

Now I don't know a damned thing about "Crash Into Me" except that it's a song title. That's all I need to know about it. Now is probably not a good time to play that title. Maybe next week. OK? That's the way the call screener felt, anyway.

Have a nice day.

Don

Two corrections for you. One (assumed typo) is that Ch47 is WNJU. Second,
Ch31 hasn't been WBIS since Bud Paxson bought it. It's been WPXN since at
least 1998. I think the switch was around Aug 1997.

You think that's bad, one night back in mid '99 while local JO outlet
KDJM here in Denver was still in simulcast with its new sister
station, WTJM out of New York, I had called to make a request, however
the DJ **INSISTED** I request the song he was going to put on rather
than the one I wanted to hear (which was the Bee Gees' "Stayin'
Alive").

Looking back on it in hindsight, I should been more persuasive than I
was, even if it meant the song being played by the incoming DJ (I
didn't care WHO played it - Just as long as it was played).

Suffice to say, it's a moot point now as the two are no longer sister
stations and (last time I checked and heard), Jammin' 105 is now a CHR
outlet (or something to that effect). KDJM is now owned by
CBS/Infinity and is still a JO outlet to this day.

And I have since put up MY OWN online radio station. So there too.
:-) haha

Just my story... :-)

I can speak from experience here. I was transmitter supervisor for WNJU at the time of teh move. The cost of maintaining two plants(rent, etc) was very costly, and as a result, when we all built the transmitters at WTC, we shut down Empire. All but WCBS. Legend has it that it was actually a screw-up by someone at CBS for not cancelling their lease. A second legend has it that wehn they signed on from WTC the then CEO of CBS could not receive them in CT. Quickly switching back to Empire, and keeping that site until they could fix the boss' reception, and by that time having to renew the elase. Interesting stories, yes, but it has saved their over-the-air tail more than once.

CBS was also the first ones to build a transmitter at WTC. Theybahd the transmitters in there at the NE corner of 110 before walls were up, and before they had a lease.

As for me, I was glad to turn off the old RCA TTU-30 and get the Harris rig on the air, but we too had reception problems from day one.

Seeing teh building crumble live and in living color will donate nightamres to me for a while. MAny good, some bad (dealing with the PA) memories reduced to rubble. Someone needs to pay for this.

But I hope this answers your question about the leases.

The latest edition of the STAGE LEFT webcast went on line yesterday (September 19). You can listen to it any time with RealPlayer at http://www.stageleft.org or http://www.kdhx.org/listen.htm Please send me a note with your comments at chuck@stageleft.org

This week it's the Cinderella story as told by Rogers and Hammerstein (the 1957 and 1964 broadcasts of "Cinderella"), Rossini (a 1993 recording of "La Cenerentola" with Cecilia Bartoli in the title role), Prokofiev (his "Cinderella" ballet) and Will Severin and George David Weiss (the original cast recording of "A Tale of Cinderella" from 1994).

You can get both the current episode of STAGE LEFT and the last four shows at http://www.stageleft.org or http://www.kdhx.org/listen.htm. This week's play list is at http://www.stageleft.org/010919.html

Next Week (9/26): "Leonard Bernstein's New York" - A salute to the city that never sleeps - and knows how to handle a crisis - by one of the great composers of the 20th century.

besides the MP3 compressions... does anyone know why this same thing happens when stations fail to align the dishes of their STL's? I would figure digital wouldn't get a signal at all, what causes it to distort? I notice the same things on satellite feeds

How many stations across the country have alternate transmitting
sites? Why would NYC be any different?

3278. Gak! WXYT drops Kevin Wall ``Wall-to-Wall Sports''?

Newsgroup: rec.radio.broadcasting
Date: 2001-09-25 01:33:00 UTC
From: Ron Hardin <rhhardin@mindspring.com>
Message-ID: <tqvnmcpadoitcb@corp.supernews.com>
Source record: 13239

WXYT 1270 seems to have dropped Kevin Wall ``Wall-to-Wall Sports''
the only sports geek that I didn't flip off instantly (Wall being
on after Imus and not so intolerable that you'd get up to turn off
the radio right away).

They've substituted a screamer of some kind whose name I didn't
and don't want to catch.

http://www.wxyt.com under hosts still has Wall, if you want to
investigate and pick up a good sports show, such as sports shows are.

bio there reads

Kevin Wall was born to talk sports. His father
produced Kansas City Chiefs games for radio and
also worked with the legendary Harry Caray. Kevin
decided early on to get into the radio biz: "I can get
paid to talk sports? No time clock or heavy lifting?
Where do I sign up?"

With over 25 years of sports broadcasting
experience, Kevin knows his stuff. He's taken on
national stints with the One-on One Sports Network
and as co-host of Westwood One's coverage of the
2000 Summer Olympics in Sydney, Australia.

Wall-to-Wall Sports takes Detroit sports radio to a
new level. Stats and facts are put on the back burner as humor and
ophour ends with Kevin's signature Sports Graffiti segment, where you
can sound off on any sports topic
unscreened (just keep it clean, keep your radio off, and keep it to one
sentence or less!) It's all on
Wall-to-Wall Sports, weekdays from 10am-noon, only on Team 1270,
Detroit's Sports Leader!

image at http://wxyt.com/images/wall1.jpg

it's a better show than it sounds like.

>> How many stations across the country have alternate transmitting sites? Why would NYC be any different? <<

Regardless, space limitations would prevent all the NYC TV stations from going back to the Empire State Building. When the VHF TV stations moved to the WTC in 1970, the ESB's antenna was taken down and replaced with a shorter mast that only has enough room for the FM radio stations, a few UHF TV stations, and WCBS-2's backup.

Most of the NYC FM stations have a "backup" transmitter listed but if you look at the antenna height and transmitter power level you'll see that all these stations are actually sharing *one* backup on the ESB... not a different backup for each station.

Non-voting shares, by the way. Which is why, for example, HBC was able to literally wipe out CCU's CHR in San Antonio... because we compete with Clear Channel with no outside influence, as required by law.

Mark Howell <mhowellkuzz@my-deja.com> wrote:

"This is done even in smaller markets."

As small as Lima, Ohio. AFAIK quite a few stations only feed the cable company that serves their studio location, so the feed would only go to those systems interconnected with it in the metro area.

"When my employer owned a TV station (sold some years back), we fed cable headends directly. It saved our bacon when our transmitter was destroyed in an arson fire, as cable penetration in this market approaches 85%. For the vast majority of our viewers, it was as if nothing had happened."

We had an episode in Louisville in the late 1980s where WBNA-TV -- which was a religious station back then (they're now PAX) -- lost its only klystron and, for reasons still unclear, took *five months* to get back on the air. They weren't yet doing a direct feed, but the cable company here rushed to put one in to get WBNA back in business, even though it was a marginal station (which, when it went on the air in 1986, couldn't get carriage until must carry was reinstated).

Another interesting cable feed anecdote concerns WAVE-TV. When they went stereo in 1986, they installed an auto-switching stereo synthesizer (as many stations did then) to spread their mono audio. The CE decided to put the box at the transmitter site so that the night master control people wouldn't fool with it. As a result, when they put in a direct cable feed, cable viewers got their audio without the synthesizer in line. (Thank goodness.)

Lots of FM stations have alternate sites, at least in my area. Is an alternate TV site THAT much more expensive - relative to station income? I'll admit I don't know of any alternate TV sites anywhere aside from WCBS-TV.

Uh.... Well I am new to the broadcasting newsgroup, but I have a friend that works at an NPR station and they use Sonic Foundry software for thier spots. And record everything down to Dat or to their computer raid system. However, as for the national stuff NPR sends it via Satalite were its store on hard drives. I am not familiar with any additional software. Sonic Foundry's stuff is pretty easy to get a hold of most music stores actually have thier products. If for some reason you have trouble try marsmusic.com

Go back and read what the original poster said, specifically the part about it being "ALL REQUESTS LUNCH HOUR".

I believe some stations that do this sort of lunch hour request show, will let the jocks play requests.

what's getting your stupid request played, got to do with a free society?
radio broadcasting in america is private enterprize. radio stations can play
or not play whatever they want. requests are just a tool to reach out to
listeners, not a way for listeners to control the programming. you wanna
hear your songs played on the radio....buy a radio station!

some people are real dumb!

In the time I have been in radio, I have come across very few FM stations
that have alternate sites.

Right now, in Los Angeles, there are very few alternate sites in the world's
richest radio market. Many have alternate transmitters, and even an
alternate antenna at the same site. In LA, the only station I know that has
two totally separated and independent sites is KSCA; there may be others but
I'm unaware of them.

Keep in mind that occasionally a station will maintain an alternate at a
former main site after an upgrade. There are two reasons... first, the site
exists and is paid for.Second, keeping the site active may prevent another
station moving closer to the market on an adjacent channel that is precluded
by the old site but possible by the new one.

A few FMs may have an Aux on the building the studios are in; with RFI
problems this is slowly disappearing in my experience.

3294. WENR Chicago Call Letters

Newsgroup: rec.radio.broadcasting
Date: 2001-09-28 10:56:58 UTC
From: Don Forsling <ddforsling@qwest.net>
Message-ID: <tr8lrqhugkee8b@corp.supernews.com>
Source record: 13155

Perhaps someone in the group can answer this question:

Years ago, in Chicago, WLS and WENR shared a frequency (890). WLS was owned by The Prairie Farmer publishing company and WENR was owned by ABC. ABC later bought out the Prairie farmer share, dropped the WENR call letters and continued on a full-time basis with the WLS call letters.

I know what the WLS call letters "stood for," if you will: "World's Largest Store" from days long ago when the station was owned by Sears.

My question: For whom or what did the WENR call letters stand? Maybe nothing. Does any body know or know where I can find the answer?

Thanks.

Don Forsling

I'm not aware of an audience measurement service that surveys
shortwave stations. What do you consider "a large audience in North
America" and where do your figures come from?

Do you also have a super, state of the art log periodic antenna like
the other one?

Rich

3296. New STAGE LEFT episode on line: "Leonard Bernstein's New York"

Newsgroup: rec.radio.broadcasting
Date: 2001-09-28 10:57:00 UTC
From: thedoge@pobox.com
Message-ID: <tr8lrsde28ci8d@corp.supernews.com>
Source record: 13157
Cross-posted to: rec.arts.theatre.musicals,rec.radio.broadcasting,rec.radio.noncomm,stl.general

The latest edition of the STAGE LEFT webcast went on line today (September 26). You can listen to it any time with RealPlayer at http://www.stageleft.org or http://www.kdhx.org/listen.htm Please send me a note with your comments at chuck@stageleft.org

This week it's a well-deserved tribute to the City That Never Sleeps (and knows how to deal with disaster like a real trooper) from one of its most distinguished musical citizens. The show features music from "Fancy Free", "On the Town", "Wonderful Town", and "West Side Story".

And, as a special incentive, I have copies of the new Firesign Theatre CD "Bride of Firesign" for the first five listeners who become members of KDHX-FM during our pledge drive (September 27 - October 7). Just go to the secure membership page at https://ssl.kdhx.org/support.html and pledge on behalf of Stage Left.

You can get both the current episode of STAGE LEFT and the last four shows at http://www.stageleft.org or http://www.kdhx.org/listen.htm. This week's play list is at http://www.stageleft.org/010926.html

Next Two Weeks: Amy and I are on vacation, so we have two "Revival Webcasts" of our "Crime and Punishment" shows. Part 1 - The Stage will go on line October 3rd and Part 2 - The Screen will go on line October 10th.

I only know of one FM in the Portland, OR market that has a backup site (there may be others, but I have never seen or heard of them), and that is Portland Public Schools' KBPS-FM. If memory serves me correctly, their primary tx is at the KOIN-TV site in the west hills... their backup site is on Mt. Scott, in S.E. Portland.

ABC at that time was a wholly owned subsidiary of the Oscar
Mayer Corporation, whose headquarters were in Madison,
Wisconsin.
In order to make it economically feasible to broadcast from
Chicago, they set up studios in Belleville, Wisconsin - a
short phone line hop to the transmitter in Chicago.

WENR was the acronym for "wiener" - the best they could come
up with using just 4 letters.

I hope this clears up the mystery you presented.

I have EKKO stamps from both stations in my scrapbook.

Check out this website...

http://www.wlshistory.com/

It will have ALL the answers you will ever need. BTW....Before WLS &
WENR were moved to 890, they ORIGINALLY shared 870 Khz. when WLS first
signed on. WENR is now (I believe!) WMVP-am 1000 which is Chicago's
ESPN Radio affiliate.

My source of information - The website above.

Richard:
I'm glad our "fact police" is still on the job making sure people don't exaggerate or misstate facts on this group. I know business has been slow lately Rich, but you are really grabbing at straws taking ellijay to task for his statement. "Large" is a relative term. Now if ellijay claimed to have "thousands" or another specific number, or compared it to WWCR or WRNO's audience, you might have a legitimate complaint. Ellijay needs no Arbitron numbers, and doesn't need to define "large audience" to make his/her post factual.
Either you've got too much time on your hand, or you're lowering your standards. Get with it dude....

Atta...
didn’t he see?

I drive the street past the place where the plans and planes were discussed.
I shop the store where he shopped with the shelves full and wonder how he
didn’t see.
I pass the school a few blocks from where he planned and wondered , as he went
past, how he didn’t see.
I pumped gas at the pump he used..
I strode the length of the mall nearest him..a mall he must have known and
wondered, again, how he couldn’t see.
this man..who did such wrong...
Was here...in all these places.
How could he not see us...see America.

Written September 28, 2001 by Stan Major, national radio talk host who lives
about a quarter mile from hijacker Atta’s Coral Springs, FL apartment.

According to the FCC records, it has already. It's up and on the air
and can be heard over most of Atlanta. I'm on the mid-north side in
Dunwoody and it's coming in pretty clean (that's a good 40 miles from
Hampton). It's a "real rock" format and the station's tag is
"Atlanta's 107.9...The End".

WMVP was originally WCFL, later WLUP.

After ABC merged WENR and WLS, they kept the WENR call letters on FM 94.7 for awhile. I'm not sure when WENR-FM became WLS-FM.

WENR-TV was also the original call letters for Channel 7 in Chicago, until the United Paramount Theaters (WBKB-TV Ch. 4, the Chicago CBS affiliate at the time) merger in early 1953. The WBKB call letters then moved from Channel 4 to Channel 7.

Channel 4 was sold to CBS and became WBBM-TV at the same time. WBBM-TV moved to Channel 2 a few months later, pushing WTZR (the Zenith Pay-TV station) off the air. The WTZR facilities were donated to the Chicago Educational Television Assn. and used to start WTTW Channel 11 a couple of years later.

I whole-heartedly agree with your assessment that Celine Dion and Foreigner are boring and overplayed in most markets (but they test well, for whatever that's worth. Not much, if you ask me). And I'll admit, that I was once an avid radio junky, but I now find most of what's on the air uninteresting to say the least.
However, what's so wrong with a station going out and selling its commercials, even 20 minutes worth per hour? It is, after all, COMMERCIAL radio. It's supply and demand. If there are businesses willing to pay $xxxx to advertise on a crappy Celine Dion station, do you really blame the station for taking it? Generating revenue from advertising is what it's all about, and it's what it was all about years ago, when programmers took chances and you could tell what town you were in by turning on the radio.
On a side note, it behooves stations NOT to run 20 mins. per hour in competitive markets because competitors will likely be running less, plus if you limit supply to say 16 minutes per hour, you increase the value of those 16 minutes because demand for that time will increase. The advertisers who would have filled the 20 minutes will scramble for the 16, and the rate per minute will go up accordingly, so long as the sales manager is smart about the supply-demand curve.
I know that's simplistic, but you get the general idea.

I see everyone else is going off on the "free society" bit, so I won't beat that to death.
Then there's the tastelessness of the song in question at the time in question. The programmer probably pulled it from the playlist for obvious reasons (besides that it sucks).
The bottom line is, the FCC doesn't issue licenses to stations so you can hear your lame Dave Matthews song. It issues licenses to stations to serve the public good. And serving the public good doesn't involve playing the music you dictate, or even necessarily playing any music at all. It involves informing the public in case of emergency and entertaining when there is no emergency.
By the way, I haven't worked full time in radio since 1997, but I must give props to the broadcasters nationwide, most of whom served their communities well in the aftermath of the Sept. 11 attack. Part of why I left radio (aside from it doesn't pay Jack Squat) was that I felt community service was regarded as an afterthought. This incident proved me wrong on that count. It still doesn't pay Jack Squat though ;)

>
> My source of information - The website above.

Actually, WMVP was WCFL (and WLUP-AM in between WCFL and WMVP). WENR-AM disappeared when ABC bought out Prairie Farmer and merged the two stations. ABC's FM station at 94.7 remained WENR until the mid-60s, when the calls were changed to WLS-FM. Since then, the station's calls have been changed to WDAI (1970), WRCK (1980), WLS-FM (1981), WYTZ (1985), WLS-FM a second time (1991), WKXK (1996), WXCD (1997) and WZZN (2001). I'm not even going to go into all of the format changes--except that on Sept. 14 (yes, a few days after the WTC) the station flipped from modern AC to out-and-out modern to go after a slightly-older (say, 25-34) listener who doesn't want to hear the mullet-head favorites or Mancow on Q101, finds WTMX too poppy and feels XRT plays too many old farts. (For those who are wondering, Kevin Matthews was fired back in August--Brooke Hunter's now doing mornings and doing a music-intensive show.) Somehow, I have a feeling that if this doesn't fly, Disney's going to sell the station and get out of Chicago FM--the station's been an underachiever for way too long.

3324. Proposal for D/FW and Austin FM move-ins

Newsgroup: rec.radio.broadcasting
Date: 2001-10-01 22:16:11 UTC
From: chipk@metronet.com
Message-ID: <trhqpbaia5b1f@corp.supernews.com>
Source record: 13185

Looking at this week's FCC orders, there is yet another attempt
to relocate a bunch of signals in Texas and Oklahoma to create
yet another Dallas/Fort Worth market signal. This one takes
the prize in the number of stations that will shuffle, if the FCC
approves the changes to the FM table of allotment. In addition
to a new D/FW signal, it creates a new Austin signal by getting
KWTX-FM 97.5 Waco moved into the Austin market.

The problem with the proposal is that KWTX-FM would be moved to the
Colorado River in downtown Austin
(http://www.fcc.gov/Bureaus/Mass_Media/Orders/2001/da012238.pdf),
so the FCC is seeking clarification before acting on it.

The moves are listed below. Clear Channel is listed as a party to
this application and a lot of the stations shuffling about are Clear
Channel properties. The question is: why? There seems to be no
gain for Clear Channel and a lot of loss. Clear Channel is maxed
out of FM facilities in Dallas, Austin, Waco, and San Antonio.
Allowing a new FM in D/FW on 97.5 doesn't benefit them. Allowing
its KWTX-FM Waco to Austin doesn't benefit them since they would have
to sell it or another Austin signal. In the process, its Austin-
market KHFI is downgraded. Even if it sells KHFI or its KFMK, it
still ends up with the same number of class C's, C1's, and C2's it
has today and loses a Waco property. Maybe I missing something?
Anyone have thoughts?

Here is the proposed changes to the FM allocation table. I left
off the changes to vacant allotments in rural TX. As with many previous
D/FW move-ins (KMEO-96.7, KZMP-FM-101.7, KTDK-104.1, KTCY-104.9),
this one will remove another signal from the Sherman/Denison area.

KLAK 97.5C2 Durant OK (Sherman TX) -> 97.5C Keller (Dallas/Fort Worth)
KRZB 97.5C1 Archer City (Wichita Falls) -> 93.9C1
** required for KLAK to move to 97.5C Keller
KSEY-FM 93.9C2 Seymour -> 92.3C2
** required for KRZB to move to 93.9 to allow for KLAK to move to 97.5C
Keller
KZCD 94.1C2 Lawton OK -> 94.3C2
** required for KRZB to move to 93.9 to allow for KLAK to move to 97.5C
Keller; KZCD was once at 94.3A before moving to 94.3C2 years ago
KXOO 94.3C3 Elk City OK -> 94.5C2
** required for KZCD to move to 94.1 to allow for KRZB to move to 93.9 to
allow for KLAK to move to 97.5C Keller
KNOR 97.7C3 Healdton OK (Ardmore OK) -> 97.7A Purcell OK (suburban Oklahoma City)
** required for KLAK to move to 97.5C Keller

KKAJ 95.7C1 Ardmore OK -> Healdton OK (Ardmore)
** required to give service to Healdton since KNOR is leaving to allow
KLAK to move to 97.5C Keller

KWTX-FM 97.5C Waco -> 97.3C1 Lakeway (Austin)
KAJA-97.3C San Antonio -> 96.9C1
** required for KWTX-FM to move to 97.3C1 Lakeway
KHFI-FM 96.7C1 Georgetown (Austin) -> 96.5C2 Lago Vista (Austin)
** required for KAJA to move to 96.9 to allow for KWTX-FM to move to 97.3C1
Lakeway; this allocation has gone from 96.7A Georgetown to 96.5C2 to
96.7C1 and now apparently back down to 96.5C2
KBAE-96.3A Llano -> 107.3A
** required for KHFI-FM to move to 96.5 to allow for KAJA...
KLFX 107.3A Nolanville (Killeen) -> 97.7A
** required for KBAE to move to 107.3 to allow for KHFI...
KVCQ 97.7C1 McQueeny -> 97.7C1 Converse (San Antonio)
** KVCQ Cureo is working on moving to McQueeny to add some San Antonio
coverage
KLRK 92.9C2 Marlin (Waco) -> 97.5C2

The proposal also suggests allocating 92.9C2 to Waco to take the place
of KWTX-FM leaving.

Source record: 13187

Patrick Cook sez:

> Before WLS & WENR were moved to 890, they ORIGINALLY shared 870 Khz. when
> WLS first signed on.

...not actually...the source of much of the information below is http://members.aol.com/jeff560/jeff.html and various sub-pages...

...Sears' WLS went on the air in 1924, taking the time on 870 kHz that had been vacated when Westinghouse's KYW moved from 870 to 560. (Ironically, years after Westinghouse moved KYW from Chicago to Philadelphia in 1934, Westinghouse bought the station that later inhabited 560 in the Chicago market, WIND.) Both KYW and WLS shared time on that frequency with a religious station out of suburban Zion, WCBD. Sears eventually sold WLS to the publishers of Prairie Farmer Magazine...

...Rauland's WENR went on the air in 1925 on 1130 kHz, sharing time with Foster & McDonnell's WBCN. By mid-1927, Commonwealth Edison had purchased WENR, and both WENR and WBCN had moved to 1040 kHz. Several months after that, in an attempt to consolidate the two stations, Great Lakes Radio, WBCN's then-licensee, bought WENR from CommEd...

...by mid-1930, WCBD folded, and WENR and WBCN were moved to 870 to share time with WLS. A few months after that, NBC bought out Great Lakes Radio and WBCN was folded into WENR. In early 1941, NBC spun off its Blue Network (which WENR was assigned to) to what would become ABC, and in the great frequency shift of the Spring of 1941, both WLS and WENR were moved to 890. Things remained that way until ABC acquired the Prairie Farmer and WLS in 1959. At that point, the call sign WENR left the AM frequency (it stayed on 94.7 FM until 1965) and the AM station was officially folded into WLS to create a single unit...

> WENR is now (I believe!) WMVP-am 1000 which is Chicago's
> ESPN Radio affiliate.

...no, WENR-AM Chicago ceased to exist in 1959. WMVP was previously the Chicago Federation of Labor's WCFL (ironically, WLS' main Top 40 rival from 1966 to 1976). In 1987, the station became WLUP, the AM sister of the FM rock powerhouse. In late 1993, Evergreen switched the station to WMVP, as Chicago's first full-time sports radio outlet. Chancellor sold WMVP to ABC in late 1998...

Hi all, This Wednesday Oct. 3rd is The First Wednesday CCA AM night on 3880kcs!

Please come and join us for an evening of great sounding signals. REMEMBER you DO NOT have to be running Collins gear to checkin. Everything is welcome!

We will have 4 main ncs. One on the East coast, Midwest, Mountain area, and West coast. The main ncs will have others in their area helping with their hour. (Please note ONE HOUR). At the end of their hour the main ncs for that region will contact the next regions ncs and turn ncs over to them etc.

Each ncs will start at 08:00pm in their time zone.

Starting at 8:00pm EDT (0000 UTC) East coast ncs will start the net
At 01:00 UTC East coast ncs will turn ncs to Midwest ncs
At 02:00 UTC Midwest ncs will turn ncs to Mountain ncs
At 03:00 UTC Mountain ncs will turn ncs to West coast ncs

comments please to wa9vrh@ocslink.com

Have fun and enjoy the great sounding AM signals. 73's Larry WA9VRH

pcham@qwest.net (Patrick Cook) adds ...

>>
Before WLS & WENR were moved to 890, they ORIGINALLY shared 870 Khz.
>>

True.

The frequency move was mandated by 1939's North America Regional Broadcast Agreement (NARBA), which was implemented in 1941.

In accordance with that agreement, every station was reassigned frequencies as +0 kHz, +10 kHz, +20 kHz, +30 kHz, +40kHz or -10 kHz from their pre-NARBA assignments.

There were approximately 90 exceptions to this "table" method of reassignment, which table was explicitly designed to make room for new Mexican and Canadian Class I-A clear channels.

WLS/WENR was in that group which was reassigned +20 kHz ... from 870 to 890 kHz.

Similarly, WCBS (then as WABC) was reassigned +20 kHs ... from 860 to 880 kHz.

WCFL was reassigned +30 kHz ... from 970 to 1000 kHz.

>>
WENR is now (I believe!) WMVP-am 1000 which is Chicago's ESPN Radio affiliate.
>>

WENR ceased to exist when it and WLS were combined.

1000 was WCFL, owned by the Chicago Federation of Labor, hence the -CFL call.

>>
My source of information - The website above.
>>

Then that web site is inaccurate.

>WRNO's audience, you might have a legitimate complaint. Ellijay needs no
>Arbitron numbers, and doesn't need to define "large audience" to make
>his/her post factual.

Yes he does. Though all I asked him to do was to quantify what "large"
meant. That's the same simple question any smart buyer of time on his
station will ask. Since he chose this newsgroup to advertise his
product I'm simply giving him an added opportunity to expand on his
sales pitch.

>Either you've got too much time on your hand, or you're lowering your
>standards. Get with it dude....

Standards are still the same. I want people to back up their claims.
As most of us have discovered in this newsgroup, people who make
claims without backing them up usually get found out as either cranks
or con men.

He's the second person to try and sell time on some super powered
shortwave station. When the facts finally came out it was simply a
relatively low powered station with nowhere near the ERP he claimed.
The super duper state of the art log periodic wasn't quite so state of
the art. It might have been when the design was invented a few decades
ago, but It was, simply, a standard log periodic antenna.

I just want to know what he means by "large." Simple. Dude.

Rich

>to know that "aliasing" is the generic catch-all term most know it by.

To be honest, I had a hard time detecting anything wrong in that clip, but then I've dumped WinAMP in favor of AudioActive's MP3 player, which has far fewer nasty artifacts in its sound. (www.audioactive.com)

But when I opened the file in GoldWave, which is less forgiving, I heard what I would call "phasiness" in the sound. This often happens in MP3 files made in Joint Stereo mode from a less-than-perfect source, the most common culprit being a slightly mis-aligned tape head.

Joint Stereo tries to increase the effective bit rate of the MP3 file by doing a sum-and-difference kind of encoding, based on the assumption that the two stereo channels will have more in common than they will have differences. I have found that, at least with the codecs I have, Joint Stereo is often deaf to phase differences between the two channels and will add the channels together when it really shouldn't, creating phase cancellation effects.

I'd have to hear the file on your player to be sure this is what's bugging you, because the thing that bugged me the most with that file was the treble boost at about 8-10kHz. Or, you could try the AudioActive player and see if this file sounds any better to you. If you are making MP3 files, try Stereo (dual channel) mode instead of Joint Stereo.

I realize my explanation would not hold true for your complaint about digital cell phone calls which are single-channel sound. I haven't heard one, so I don't know what's going on there--possibly aliasing, where the sound is not properly filtered before sampling. Always use a brick-wall filter at slightly less than half your sampling frequency.

Kimba

107.9 The End will become Hot 108 or Hot 107.9 as a simulcast of Radio One's WHTA (Hot 97.5) next week.

Current thought is that after a brief simulcast period, that an urban gospel format will debut on 97.5.

Hey there everyone! We're a live 24/7 internet station broadcasting off

a high bandwidth server. Everynight at 7pm (EST) we have live shows,
each with a BROAD range of topics!

Tonight, Tuesday October 2nd is our best Talkshow - The Kris and
Craig show! 7pm - 10pm (or later) We take live callers, ICQ or AIM
users so you can participate at ANYTIME!

Join in NOW! We offer all major formats for broadcasting!

Listen in today!

Wouldn't Clear Channel be allowed to have more FM's in these markets if they sold off their AM signals? The FCC rule used to say you can have 8 stations in a market but no more than 5 FM's. Perhaps they have relaxed that to allow more than 5 FM's if you get rid of your AM signals. ???

Sounds like some kind of deal for Hispanic (nee Heftel), of which Clear Channel owns a piece (IIRC). I know their Dir Eng does this kind of stuff constantly.

I used to love the sound of that processor on Scott Shannon's Pirate Radio in LA. I was working at a local 100kw chr and we got the Pirate feed in production. That weird sounding processing they had really sound good on hard rock music although no other format could probably get away with using it.

What I'm looking for is the typical settings for one of those processors. I want to try to simulate the sound with Cooledit Pro.

Thanks
Scott

"WBBM-TV moved to Channel 2 a few months later, pushing WTZR (the Zenith Pay-TV station) off the air. The WTZR facilities were donated to the Chicago Educational Television Assn. and used to start WTTW Channel 11 a couple of years later."

I haven't found confirmation that Zenith ever put WTZR into commercial operation; if they had, I suspect they wouldn't have lost the station. The pay-TV tests were conducted under their experimental license, W9XZV, which had been used since 1939. Zenith also had an experimental UHF station, KS2XBR, which started right after the war and continued (eventually on channel 38) until some time in the 1960s or even 1970s, doing pay-TV system tests.

Hello gang:

I have a chance to bid on an fulltime AM radio station
in a famous Florida beach resort city.

Bids close at 2 PM on October 23, 2001. I intend to
bid about $47,000 and win the bid!

I seek active/inactive investors with at least $10,000
each to help me acquire this gem.

We will have 30 days from time of winning bid to full
payment of balance.

I am a semi-retired radio engineer. Ham since 1950.
FCC First phone ticket in 1951.

The book Prairie Farmer and WLS by James F. Evans =A91969 says that WENR started in 1925 on 1040 kc. In 1928 WENR was owned and operated by the Great Lakes Broadcasting Company and it was reassigned to 870 kc which it shared with WLS who was also on 870 at the time.

The Library of American Broadcasting web site at http://www.lib.umd.edu/UMCP/LAB/COLLECTIONS/kyw-wenr.html says "WENR was initially owned and operated by the All-American Radio Corporation" and was then purchased by the Great Lakes Broadcasting Company.

It appears likely to me that the call letters were randomly issued by the Federal Radio Commission and had no special meaning.

>> Joint Stereo tries to increase the effective bit rate of the MP3 file by doing a sum-and-difference kind of encoding, based on the assumption that the two stereo channels will have more in common than they will have differences. I have found that, at least with the codecs I have, Joint Stereo is often deaf to phase differences between the two channels and will add the channels together when it really shouldn't, creating phase cancellation effects. <<

I have found that the "LAME" encoder is much better at producing "Joint Stereo" files because unlike other MP3 encoders, it can detect when there will be problems in the sound with Joint Stereo and automatically switches to Independent Stereo (L and R channels with no L+R/L-R mixing) during the "problematic" part of the audio and then switches back to Joint Stereo when the audio quality would be okay with that method.

I call this a "mixed stereo" format but unfortuantely there is no special 'header' for it so your MP3 player will display it as being just a regular Joint Stereo file. It will play fine, however, as MP3 players check the header of every frame in the file and switch to whatever mode or bit-rate it was encoded with -- that's what makes it possible to encode Variable Bit-Rate (VBR) MP3 files!

Another important tip for producing MP3 files is to use an appropriate low-pass filter on the audio. For 128 kbps, you should use a 15 kHz cut-off on the audio because you really can't hear audio above 15 kHz anyway and these high frequencies will "waste" bits in the encoded stream that could otherwise be used to help produce more accurate encoding of lower frequencies that you *can* hear!

Anyway, I would love to hear people's opinions on the sound quality of RealAudio 8.0... it has a totally new system that is very good at low-bit rates. Its "artifacts" are completely different than MP3... it's hard for me to explain, but instead of the "chattering" or "phasey" effects you get with MP3, RealAudio 8.0 has a kind of "congested" sound to it that is sometimes less annoying than MP3 and sometimes more annoying than MP3! It doesn't really have outright "artifacts" that are plainly obvious; instead, there is a gradual degradation of the overall audio quality that you can't quite put your finger on, even with close listening. I like to call it "self-sacrificing" although that term probably doesn't make much sense until you actually listen to RealAudio 8.0 at low bit-rates (under 64 kbps) and hear it for yourself.

I guess they know the value of their product.

However, the advertising I've seen from other countries makes our stuff look like Jerry Fallwell is writing the copy. Other countries have very creative stuff that pushes every envelope I know of over the edge.

We use sex in advertising because we're embarrassed that we like to have it every once in a while. Other countries seem to see it as a natural part of life and their media reflect that lack of self consciousness.

I will admit that I've never seen foreign advertising using urination as a positioning statement. If peeing out the window makes one a "cool hero" I'll start carrying an umbrella everywhere.

Rich

Vigilante was Aphex System's Dominator on steroids. If I remember correctly it had very precise knobs so that settings could be repeated. It was also *just* a limiter, and a very good one at that. An absolute brickwall on peaks and multi-band as well. But trust me, there was more to Pirate's sound than just the Dominator.

I'm just guessing but there was leveling compression, multi-band compression, limiting, clipping...and I'll never forget the picture in the trades of Shannon at the board with the needles pegged!

These things are getting all the more common. In Puerto Rico, there is a
similar plan that includes about 10 stations in PR and the USVI... and it
was started by a very small rural broadcaster.

Possibly, CC just gets a wad of money for allowing their stations to be downgraded.

I wonder if KLAK will move from 97.5 over to 102.5 (which is being moved into the Sherman/Denison market from Madill, OK, and will broadcast from KLAK's current tower site)?

Voice compression schemes for telephony are often adaptive differential, which means if you lose a chunk of signal, when you rejoin it, you're probably at a different step-size, and small changes can be made huge, and vice versa. If there's also high background noise in the source signal, some of the effects can be hilarious.

My partner calls such digital effects that interrupt cell telephony, "Eventide Moments" from the Eventide Harmonizer and line of digital processors. Did you ever think that what used to cost about $3,000 to do in a studio has become a nasty side-effect?

BTW, I still can't get the link to work.

I'm not saying that the LAME encoder doesn't work, because I haven't tried it, but the Variable Bit Rate technique produces a large number of complaints about unplayable MP3 files, in my experience. (The usual complaint is that the file stops playing or the player software seems to get "lost" and stutters.) I wonder if LAME's mixing of stereo formats within one file produces some of the sonic problems that people hear and can't attribute a cause to. Just speculating.

>Another important tip for producing MP3 files is to use an appropriate

I think you may find some who disagree about the upper frequency limit to hearing, but certainly as the audio frequencies approach one-half the sampling frequency you do run the danger of aliasing, which is very nasty. And, depending on the filter characteristics, a gentler filter at a lower frequency may indeed sound nicer than a brick-wall filter near the highest frequency limit.

"Congested" is a good term for it. I would add "muffled". Truthfully, I haven't noticed a difference over previous versions of Real Audio but if I'm offered a choice of formats, Real is always bottom of my list, so I don't listen to it as often as other formats. IMO, Real still can't touch Windows Media at equal bit rates. And if you think MP3 sounds phasey at low bit rates, try the AudioActive player.

I have. A French wireless carrier, Nomad, did a TV spot in which a couple gets married and goes on their honeymoon. When they get into the honeymoon suite they go at it hammer and tongs, but then the bride excuses herself to go to the bathroom. The groom crawls to the foot of the bed to sneak a peek, and -- horror of horrors -- sees that she's urinating standing up! The spot ends with their slogan, "Nomad: le portable sans engagement."

And coming back to the U.S., don't forget the Logitech mouse ad in some computer magazines several years ago that showed a baby wearing a diaper with the caption "Feels Good," and on the opposite page showed the same little boy with no diaper, peeing in the air, with the caption "Feels Better."

3356. Missouri and Indiana stations silenced

Newsgroup: rec.radio.broadcasting
Date: 2001-10-05 01:07:03 UTC
From: markrobt@hotmail.com
Message-ID: <trq1tnbq3ok369@corp.supernews.com>
Source record: 13117

The Federal Communications Commission has ordered five radio stations off the air after terminating all appeals by its owner.

In 1998, the Commission concluded that Michael S. Rice of St. Louis was no longer qualified to be a broadcast licensee as a consequence of multiple felony convictions of sexual assault involving children. According to the Commission, Rice was incarcerated from 1994 to 1999 as a result of those convictions.

Companies controlled by Rice owned KFMZ(FM), Columbia, Missouri, KBMX(FM) Eldon, Missouri, and three stations in Terre Haute, Indiana. Those stations were WBOW(AM), WBUZ(AM), and WZZQ(FM).

While Rice's companies had told the Commission he had been removed from working control of the stations as a consequence of his arrest and preliminary hearing in 1991, a Commission administrative law judge found (in FCC 98-133) that Rice continued to be involved in station operations after that time. The full Commission confirmed the ruling in 1999. The D.C. Circuit Court of Appeals upheld the Commission and, earlier this year, the Supreme Court refused to hear an appeal.

On July 5, the Commission issued a public notice allowing the Rice stations to stay on the air for ninety days while interim operators could be found. According to the latest Commission order, Rice subsequently filed petitions to extend the station's temporary authorization. Rice had earlier argued that the Commission had not properly considered certain key information about his convictions. He had further argued that he had successfully completed treatment for a bipolar behavioral disorder.

The FCC order (FCC 01-300) states that there are multiple sources of radio service available in all the communities that were served by Rice's stations and, considering Rice's record, the Commission says that "the public interest is better served by allowing Rice's authority to operate these stations expire than by renewing" that authority. The Commission order goes on to say, "Rice's criminal acts and the deceit of his companies in misrepresenting his continuing involvement in the management of the Rice Stations require this result."

The Commission has not selected interim operators for the five stations.

No.

Over the past 15 years or so, 80% of all creative people were forced out of the radio biz by management losers who hired consultants who wrote liners. Anyone not sticking strictly to those liners, those "top of the mind awareness" crap, unfunny and safe liners were soon out of work. Years ago, at a radio conference, Rush Limbaugh warned of homogenized radio soon to come, lacking in real talent. Those with talent, potential and real but perhaps not developed, were never given that chance to hone and perfect. What's left now are people like the ones who made the commercial you mentioned.

C3DTV was as on satellite a year ago. Lasted for several months. They sold a Kerr Cell based pair of glasses which were synced to the alternating side frame rate.

System worked okay. In color. But the station died for lack of programming. and subscribers.

Mostly sharks under water and an old sci-fi move about the Hu-mans vs. the Ro-mans.

Why they didn't rent the really "good" 3D movies from the 50's, I could never figure out.

For those interested in rural Pennsylvania radio, WQZI, Laporte (103.9) has signed back on. Right now, it is repeatedly broadcasting Simon and Garfunkel's "Sound of Silence." It's owned by Kevin Fitzgerald (WPHD-Tioga, PA) and there is no word yet as to what the actual format of the station will be.
Laporte is about 30 or so miles northeast of Williamsport.
The station was on the air as a satellite rocker a couple of years ago, when it had the calls WRPA.

I have not seen a graphic equalizer in an audio chain for a long time. The processors like the Optimod and the Omnia have multiband processing which is superior. The problem with a graphic EQ is that it will just increase the noise floor if there is little or no audio in a certain frequency band.

Shortwave radio Station WWFV has many many many excellent hot button topic talk shows on our transmitters! see our web page www.wwfv.net (it's a little stale but useable)

If you want your own program on shortwave radio using our 100 kw transmitters the cost per hour is $ 50.00

We are looking for upstart networks to broadcast to a global audience via our facilities.

People all across The nation are buying shortwave radios to hear whats going on.

The new breed of Shortwave listeners are content (your program) orientated!

We are looking for a Getner TS 612 telephone system for out talk shows. any leads?????

CHEERS!

Most of the commercial FM stations in the Washington, DC, area have aux sites.

WCSP(non-com), WPGC, WASH, WIHT, WMZQ, WHFS, WBIG, WWDC, WGMS, WJZW, WJFK

And I'm not counting those which have an auxiliary installation at their main site,
which are WETA(non-com) and WRQX.

Commercial stations with no aux are:

WTOP-FM (rimshot), WAVA, WMMJ (class A), WHUR, WARW, WKYS

None of the TVs have a backup at a different site.

>gospel
>> format will debut on 97.5.
>>
>
>That would be a waste of TWO good frequencies. Gospel and crip hop rap.

Well, the fact is that if Radio One is doing it, it's probably because people will listen to it.

We had this discussion back in, um, what was it, '99?

Radio One had bought WERE-AM and WENZ-FM here in Cleveland and flipped WENZ to urban, specifically playing current rap and R&B hits.

Some participants here bemoaned the fact that The End was gone, but the fact is that people hadn't been listening to it. It NEVER got good numbers.

Clear Channel could afford to keep it running because they raked in Tons-O-Bucks from their Classic Rocker, WNCX. But then they bought up a chunk of stations and sold WNCX to Infinity. Suddenly, they didn't have anything with which to prop up The End's crappy ratings.

Now Radio One, which programs primarily to urban markets, has WENZ. They bought WJMO-AM and WZAK-FM from Infinity and are serving the markets that they serve best - with current R&B and rap on WENZ, "Adult R&B" (with a broader mix of music spanning three decades, and no rap) on WZAK, and either Solid Gold Soul or gospel on WJMO-AM, I forget which.

Folks, there are now more Hispanic and African-American people living in the city of Cleveland than white people. The population of Cleveland is roughly 500,000, and the metro area has about 1.5 million people. Cleveland's one of the 25 largest radio markets in the country, and the minority market is a rather large market here. It was about time that someone did what Radio One did; it made much business sense to do so. Z107.9 is very popular among my friends who listen to rap.

I'm just surprised a Spanish-language station hasn't popped up here yet.

3369. List of the rec.radio newsgroups

Newsgroup: rec.radio.broadcasting
Date: 2001-10-08 05:31:44 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <9prdo0$c9m$1@news.hawaii.edu>
Source record: 13130
Cross-posted to: rec.radio.amateur.space,rec.radio.broadcasting,rec.radio.cb

```
Archive-name: radio/personal-brief-introduction

In an effort help ensure a poster's article reaches the appropriate
audience, below is a list of the rec.radio newsgroups. In most cases,
a group's name will explain its purpose. Cross-posting should rarely
be necessary.

rec.radio.broadcasting (devoted to the broadcast industry; moderated)
rec.radio.cb
rec.radio.info (periodic informational bulletins; moderated)
rec.radio.scanner
rec.radio.shortwave
rec.radio.swap (for buying, selling, and trading; not a discussion group)

rec.radio.amateur.antenna
rec.radio.amateur.boatanchors (tube-type communications equipment)
rec.radio.amateur.digital.misc (packet, pactor and other digital modes)
rec.radio.amateur.dx (long-distance amateur communications)
rec.radio.amateur.equipment (questions, comments regarding commercially-
built amateur gear; not for buying/selling)
rec.radio.amateur.homebrew (devoted to home-building ham gear)
rec.radio.amateur.policy (issues include code, restructuring, local
restrictions in conflict with FCC R&R)
rec.radio.amateur.space (satellites, meteor scatter, EME)
rec.radio.amateur.misc (any amateur topic not covered in the above groups)

(At least two other English language radio hierarchies exist, prefaced
with "uk" (United Kingdom), and "aus" (Australia), in place of "rec.")

Again, cross-posting should rarely be necessary. Many times, a long-
running thread results from a single cross-posted article, and its
content drifts further and further away from being "on-topic" in the
various NGs which receive each and every followup.

For more detailed information, see "Guide to the Rec.radio Newsgroups"
posted on the 15th of each month.

Have you had a chat with an NYC real estate broker, lately? When a
studio apartment that would barely fit a 1kw solid state transmitter
goes for $2500 a month, imagine what roof/tower space coupled with
room for a transmitter would run.

I believe the attack will have an effect on rental rates because
people don't want to live in tall buildings anymore. It's a shame that
a terrorist attack is the only thing that can reduce the incredibly
expensive housing costs in this city.

I think we know why Meyer is "semi-retired"...cash flow a little tight
and wants somebody else's life savings to finance his retirement on
the beach. Nice try, wish I'd thought of it.

3372. Station uses stereo to broadcast two different programs

Newsgroup: rec.radio.broadcasting
Date: 2001-10-10 02:39:39 UTC
From: jeffreyh@Hawaii.Edu
Message-ID: <ts7d7beha9v5b3@corp.supernews.com>
Source record: 13133

The following item is from the October 1998 issue of Reader's Digest -- thought it might be of interest:

"KSHN-FM Radio, which serves the two cities of Liberty and Dayton in Texas, has found a clever way of covering high school football when both teams are playing at the same time. The station broadcasts the games simultaneously by using its stereo broadcast capability. Listeners in Liberty turn the balance control on their radios all the way to the left and hear the Liberty High School games. With the balance control all the way to the right, Dayton fans hear the Dayton High School game. The stereo effect is lost, but the station doesn't have to choose one team's game over the other."

Is this something unique or is it an industry norm?

Nothing like stale advertising to impress prospective clients.

>People all across The nation are buying shortwave radios to hear whats
>going on.

If they are, it's not to listen to wacko shortwave talk show hosts.
They're listening to the BBC or stations from their homelands. Nothing
on your station will have any relevance to someone wanting news.

Frankly, I think they're buying weather alert radios (I did) so
they'll be warned of impending danger. Otherwise they're listening to
and watching commercial radio & TV connected to worldwide news
networks with experienced people actually on the scene.

>We are looking for a Getner TS 612 telephone system for out talk shows. any
>leads?????

If you can't afford a new telephone system how can you afford the news
department all these" new breed" shortwave listeners will want to
listen to? How many reporters do you have in the Middle East right
now?

I think you need to rethink your advertising/marketing scheme to
reflect what you'll actually be broadcasting. My guess is more
religion and the same folks who stocked up on Spam for Y2K.

How many AMs do? There are many buildings in NYC with antennas on them
that could be put into service. Not much space to around the city for
alternate am installations. In fact, those stations with sites across
the river in NJ are being asked/told to move because the property
values are incredibly high. Unless you're a broadcaster, those towers
just take up valuable real estate some strip mall could use.

Nice to see that racism is still alive and well.

Radio One is a black-owned company that specializes in urban and gospel formats--what do you want them to do, moronic Maxim-magazine-style talk or idiotic metal?

And doesn't Macon have a sizeable black population?

When the move was made to WTC in the late 70's the deal was that if we stayed at Empire the rent would be outrageous, so most opted not to. Actually, all opted not to. At the last minute for some reason(folklore has it as an error on CBS part) CBS kept the Empire spot. Then 68 built at Empire and moved from West orange, and 41 moved to Empire FROM WTC in the early 90's. There's some kind of LPTV there as well.

But the cost was too high to maintain both locations. Besides, till Sept. 11th who would have thought...???

Ed-Long time no see.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

Well this well orchestrated stunt by radio one has to be one of the greatest played on Atlanta radio listeners.

Even I do not expect the hottest billing on Gospel 97.5 it will have good ratings. Macon, Raleigh, Columbia all have good rated gospel stations on FM. I would expect it to be the highest rated religious station in Atlanta bumbing the fish down a little. I am being a realist considering the FISH is my favorite music station. I do find an irony with the type of music that Hot plays will be a total opposite message to the futrue gospel FM.
Since both stations will have a good sized audience I can not call them wasted signals. I do not like either format but I am not going to call either station a waste for that reason. I do not like Z 93, 96 Rock, V 103, Kiss 104.1, Smooth Jazz 107.5, 99X, Fox 97 but they are not wasted stations. Now I do only like the morning teams ons 99x, 96 rock and Q 100 but I do not really like their music mixes. I can tolerate MIX, B, Peach and J though. Now the argument that Q is a wasted signal since the audience is still small after 9 months.

I do not see how gospel would do better on 97.5 then 102.5 but i guess putting it on the stronger signal might help it.

Any talk of the End popping up on 102.5 makes absolutly no sense.

This is something that wouldn't work on most radios now.. at least not the ones I've seen in cars, when the signal gets weak it automatically goes into mono to save the signal, losing stereo.. depending on the strength of the station, driving around in a car you'd periodically hear both games at once

I bet that really sounds neat on a monaural receiver. Also, I would
suspect that's it's not legal.

Ray

I don't know if it was this station, but there was a discussion here
a couple of years ago about this practice. It is NOT the norm -- but it
is done. As I recall some posters felt it was illegal. Stereo stations
are supposed to transmit their signals so that mono listeners can hear
the same program as stereo listeners.
I would imagine it would be quite confusing for the person at the
studio as well.

Broadcasters in Southern California have found that AM transmitter
facilities and warehouses can coexist nicely. You just build little
fences around the tower bases and the guy-wire tiedowns and tilt-up
concrete prefab everywhere else.

KGER has done this and so has KFI.

I've never heard of this. It doesn't seem like a terribly bright idea. Many walkman type receivers don't have a balance control. And of course, if you can't get a good signal, you're going to revert to a very confusing monophonic program...

>Jeff, KH6O

Well, I'd vertainly have to give the PD a bit of credit for coming up
with that solution to a (to them) unique problem.

Now the question is, is it even legal to do that, where the left and
right channels aren't related to each other? I don't know without
checking the rules which are 30 miles away ATM.

Cheers, Gene

I've never heard of an AM with an aux site. Two-site AMs have operated
from one of their sites when they lost the other, but with greatly
reduced coverage [WWLG for example].

...actually, KTVT started with legal IDs a couple of weeks ago as part of the new CBS promo design. However, there *is* one thing I'm a little confused about -- I thought, of the four network stations available on Dish Network, KXAS and KTVT were licensed to Ft. Worth and WFAA and KDFW to Dallas, whereas I've seen them all state "Dallas-Ft. Worth"...

In 1969, floods in Southern California took out KFOX's AM transmitter near south Pacific Coast Highway at the Long Beach/Seal Beach border in Southern California.

I was a kid working for the station and worked with the chief and a couple of other Long Beach broadcast engineers bringing up a standby AM. Because you don't need much more than a long wire to get a signal out there, AM emergency transmitters can be put up fairly easily.

We got up and running in two days, as I recall. We first (and I am not making this up) tried to use the fire standpipe in the building we were in as an antenna, but that failed, so we resorted to the old site at 220 East Anaheim, where a longwire still remained.

Since we had no remote control authorization, and it was a pretty flakey setup, we babysat it for several weeks.

3403. WTC Transmitter Backups

Newsgroup: rec.radio.broadcasting
Date: 2001-10-12 00:16:18 UTC
From: HBPrice@aol.com
Message-ID: <tscdiimkvtb98@corp.supernews.com>
Source record: 13064

Greetings All:

Rich Wood has touched on the economics of the NYC transmitter backup issue. And while backup facilities in a market this large and lucrative would seem to be a no-brainer, keep in mind that appropriate plots of empty land that are out of the flight paths of three giant airports don't really exist here anymore. And also keep in mind that for all the tall bldgs that exist in NYC, not all are suited to high-power TV broadcasting.

To answer the obvious question, why not just establish backups at the Empire State Building -- once and again NYC's tallest builing -- simply put, the place is full up. When the TV primaries left for WTC, the ESB telecommunications managers brought in other clients (paging, microwave and other wireless apps), and completely rebuilt the master FM antenna in what used to be the master TV antenna space. What TV space remained already has been spoken for by those stations which maintained their sites at ESB, or are using it for DTV operations.

The relatively new FM antenna system at ESB is a large, heavy array of panels that take up a lot of space. Plus, several of the FMs have installed their own antennae atop Empire as either primary or auxiliary facilities.

There is also no space below the antennae for the transmitter facilities -- unless someone leaves.

Other tall buildings (the Chrysler Building, Citicorp Center, the GE Building among them) don't have rooftops currently configured for TV transmission.

The Conde Nast building in Times Square -- one of the newest skyscrapers on the NY skyline -- was, in fact, design from scratch to accommodate a large transmission facility. And, in fact, all of Clear Channel's NYC FMs maintain their backups there. There is room for more tenants, though the antenna system there was designed for FM and not for TV. The building is also surrounded by much taller buildings which would create horrendous nulls and multipath problems for TV signals.

Todt Hill, on Staten Island -- the highest natural point in the region -- has many public service radio systems atop it. And there has been some talk of late of establishing some sort of transmitter site on Staten Island.

Likewise there has been talk of expanding the historic Alpine tower on which most NYC TV stations currently have their temporary transmitter facilities. The tower on the Palisades in northern Bergen County, NJ -- at which Major Armstrong established FM radio -- has a structural configuration akin to a high-tension tower, with huge arms extending from three levels. Not the optimum design for TV propagation.

Alpine and the communities which surround it are very tony bedroom communities -- and it's a safe bet site managers would face a zoning fight if that already-imposing tower were to be expanded.

Remember, too, that TV broadcasters -- and the four FMs which also lived atop WTC -- also lost two-way radio, STL and RPU systems for which tall-tower space also must be found.

A plan floated in recent years to build a 2000' foot community supertower on the now-abandoned Governor's Island in New York Harbor was sniffed it by city officials, who scoffed at the esthetics for a place they hoped to develop for recreational and commercial mixed use.

But that was well before the events of September 11th, 2001.

It is inconceivable to me that local TV and radio would be the only industries not receiving help from local government...so I personally believe that in the next few years you'll see government and the broadcasters working together to site a new master antenna comparable to WTC within NYC proper. Where exactly is anyone's guess.

Even after new, permanent transmitter facilities are built, the issue of backups will remain. And given the difficulty of creating one primary site in or around NYC, the backup issue will likely circle back around the aforementioned issues and start from square one.

You just build little fences around the tower bases and the guy-wire tiedowns and tilt-up concrete prefab everywhere else.

KGER has done this and so has KFI.
>>

The first such installation in L.A. was KTNQ (ex-KGBS), now home of KTNQ and 1150.

The installtation was complicated by the fact that 1020 utilized a counterpoise.

Or, perhaps a better description would be the warehouse had to accommodate the existing 1020 counterpoise.

I do not believe any other AM in L.A. uses a counterpoise.

I posted something about this awhile ago. I think it IS a good idea for
people who live in those towns.
People who live outside of Liberty or Dayton (or don't have high schoolers)
will most likely not listen
to the station on game day. People who do live in the area won't lose the
signal (making it mono)
and get the over-lapping.

A good idea, whether it's legal or not.. that's another story.

It doesn't need to be in stereo.. many Astros games are in mono because it's
voice.
I hated when KLOL did the Cowboys in "Stadium Stereo"... play music, damn it
:)
If you want the statium affect, watch it on TV surround or better yet GO TO
THE GAME! :)

Not exactly an aux site, but what used to be WLSQ Montgomery, Ala (950 AM)
had two sites, their original daytime site, and a directional array when they
got nighttime authority.
In late 1981, an ice storm hit Montgomery, taking out most of the AM, FM and
TV station when either the power lines were downed or the towers iced up. Our
FM at the time, then-WREZ was at 30% power due to tower icing. Big BAM (WBAM
AM-FM) and us were the only radio stations on the air at the time when Mayor
Emory Fullmer declared a state of emergency for Montgomery. WBAM had an aux
generator that kept their stations on the air. It was funny to hear 100,000
watt WBAM-FM say "If we are fading out, tune to WBAM-AM". (WBAM-AM was a
50,000 watt daytime only station that recieved emergency night time authority
during the state of emergency, as we did also, being able to use our daytime
site during the emergency, since the power was knocked out at the nighttime
site).

Check out Jim Hawkin's excellent radio site, especially the section on
WABC. Apparently WINS keeps a 10-kw offsite backup transmitter in Lodi at the
WABC transmitter site for use when doing maintenance on the main site, using
the WABC aux antenna. Also, WNYC-AM shares the WMCA site through diplexing.
This is becoming common because of heightened restrictions on RFI exposure,
real estate costs, and other considerations.
Theoretically, how many AM stations could use the same antenna array
before it became overcrowded?

Way after KFI moved to La Mirada, the 5 kW auxiliary Tx was moved to the original downtown KFI site when the second 317 was installed at La Mirada. A 317C and perhaps a 317B or A.

Before that, La Mirada had the 317 and the aformentioned 5 kW.

Of course, before the 317 there was an RCA.

I would agree with Rich's tounge-in-cheek assesment of the real estate
assertion, but Jerry is correct as well.
For many years, WOKY-AM Milwaukee had it's towers and transmitter site near
the Southridge mall prior to moving it to their present site in the early 80's.

I would agree that it wouldn't sound pretty on a mono set.

There was a spot a few weeks back on a local FM (here in Toronto) that used this technique, though. IIRC the copy went something like "if you're person type A, turn the balance knob right, if you're person type B, turn the balance knob right."

As for legality, I'm not sure about it in the US.

In Canada, though, I've never seen this in Toronto on FM on regular programming, aside from the spot I mentioned. I do remember that several years ago when Telemedia owned The FAN 590 (CJCL-AM) and had b-cast rights for both the Blue Jays and Leafs, and both were playing at the same time, one would get bumped to Telemedia's E-Z Rock 97.3 (CJEZ-FM).

As for other signals, it's common practice here for TV stations put O&Oed radio in their SAP channel (Rogers' CFMT-TV 47 puts 680News (CFTR-AM) in theirs, and CBC's CBLT-TV 5 has Radio One (CBLA-FM 99.1). CHUM Television's CP24 all-news channel had CHUM-FM in their SAP too, last time I checked.

(If it is legal here, I can see one situation where this WOULD make sense -- in bilingual markets like Montreal and Ottawa: French in one ear, English in the other.)

> There is also no space below the antennae for the transmitter facilities -- unless someone leaves.
>

Since WCBS-2 is still operating there, I guess that auxiliary becomes (or reverts to) primary. what about a multiplexing with WNBC-4 and WNYW-5?

>
> Other tall buildings (the Chrysler Building, Citicorp Center, the GE Building among them) don't have rooftops currently configured for TV transmission.
>
> The Conde Nast building in Times Square -- one of the newest skyscrapers on the NY skyline -- was, in fact, design from scratch to accommodate a large transmission facility. And, in fact, all of Clear Channel's NYC FMs maintain their backups there. There is room for more tenants, though the antenna system there was designed for FM and not for TV. The building is also surrounded by much taller buildings which would create horrendous nulls

and multipath problems for TV signals.
>

bad Idea, then it appears that location will be ok for aux.'s but not for primary use.

>
> Todt Hill, on Staten Island -- the highest natural point in the region -- has many public service radio systems atop it. And there has been some talk of late of establishing some sort of transmitter site on Staten Island.
>

too far south for high power use

>
> Likewise there has been talk of expanding the historic Alpine tower on which most NYC TV stations currently have their temporary transmitter facilities. The tower on the Palisades in northern Bergen County, NJ -- at which Major Armstrong established FM radio -- has a structural configuration akin to a high-tension tower, with huge arms extending from three levels. Not the optimum design for TV propagation.
>

too far west for high power use

>
> Alpine and the communities which surround it are very tony bedroom communities -- and it's a safe bet site managers would face a zoning fight if that already-imposing tower were to be expanded.
>
> Remember, too, that TV broadcasters -- and the four FMs which also lived atop WTC -- also lost two-way radio, STL and RPU systems for which tall-tower space also must be found.
>
> A plan floated in recent years to build a 2000' foot community supertower on the now-abandoned Governor's Island in New York Harbor was sniffed it by city officials, who scoffed at the esthetics for a place they hoped to develop for recreational and commercial mixed use.
>

Understandable, with all of the other tall structures around, why invest in all that guy wire and worry about storms, such as Hurricane Gloria in 1985.

>
> But that was well before the events of September 11th, 2001.
>

My, how perspectives change overnight (or in this case, by 10:30 in the morning)

>
> It is inconceivable to me that local TV and radio would be the only industries not receiving help from local government...so I personally believe that in the next few years you'll see government and the broadcasters working together to site a new master antenna comparable to WTC within NYC proper. Where exactly is anyone's guess.
>

The FCC appears to already be working with the broadcasters. Since there was no previous authority to operate at Alpine.

>
> Even after new, permanent transmitter facilities are built, the issue of backups will remain. And given the difficulty of creating one primary site in or around NYC, the backup issue will likely circle back around the aforementioned issues and start from square one.
>

Right! And after the 1993 bombing of WTC, eyes were closed to the possibilities of another try.

>
> Howard Price
> News Assignment Editor
> WABC-TV/NYC

Most of the current problem would be corrected if there is a definitive decision to rebuild at least 1WTC the way it was before. Until then:

This is a long term problem that is looking for short term solutions. When Maltz moved WHTZ from West Orange to ESB, it allowed WJRZ to move 9 miles north to compensate for the distance and better cover the Toms River/Bricktown area. With short spacing added into the mix and re-evaluating contours, this is a monumental task to please everyone affected - and definitely an exciting one to watch how it all shakes out.

This is the Best of Times coming out of the Worst of Times.

It seems I have read it here earlier, but does anyone know why the radiation plots are backwards on the Kodis "Broadcast Station Location Page"? They have been screwed up for some time. I know John Kodis does not maintain or host the page or it's code any more, but somehow the current incarnation got screwed up a while back. They backwards on AM, FM and television plots. Any know what's up?

That was a common situation in the 1960s in Boston - WHDH owned the broadcast rights to the Boston Bruins, Boston Celtics, and Boston Red Sox. If there was a conflict between the Bruins and Celtics, one would get bumped to FM. There was an instance in 1968 or 1969, I think, where all three teams were playing on a Sunday afternoon and so the Red Sox were on AM, the Bruins were on FM, and the Celtics were forced to a radio tape-delay -- which was somewhat ludicrous, since other stations would already have the game result.

How about 515 Madison Avenue? That's the old WABD site, and at last report the tower was still up on the roof. (Does anyone know if NBC, back in the 1930s, ever considered putting their TV transmitter on the then RCA Building rather than Empire? I haven't seen anything to suggest that they considered that option.)

Alfa Lima schedule for the upcoming 5 months

Our station can still be found every weekend on the frequency 15070 kHz AM
mostly parallel to a frequency into the 48 mb somewhere between 6317 and
6280 kHz AM around 22.30 utc Saturday evening till 07.00 utc Sunday morning.
Sometimes we broadcast a few hours longer.
Also for the upcoming moths we will maintain the same schedule but we might
be there also from 13.00 till 18.00 utc at Sundays. Also than we have times
that we broadcast a few hours longer.
Keep an eye on our announcements in the SW pirates group (info below) for
our transmissions on 21890 kHz. As soon we are going to use that frequency
it will be parallel to 15070 kHz or to the 48 mb.

Also want to ask people to send us there pirate station loggings of SW and
MW pirates worldwide so that we can post them on our webpage . email to send
this to is alinter@rendo.dekooi.nl

To sort of put a spin on this topic.... Does any FM station that covers one game, rig their setup so that the play-by-play and color commentators are heard on separate sides, for true stero effect?

I've always thought it'd be kind of cool to do that, as it gives the impression that you're sitting slighty behind, yet in between the two guys...

Message-ID: <tskq6lkdq1i2b5@corp.supernews.com>
Source record: 13090

I recall the "panic" of the management and upperclassmen at college when a back-hoe severed the underground cable running from our studio up to the transmitter shack. They were all running around gathering up old equipment (turntables, mics, mixer, etc.) from across the campus in order to set up a temp studio at the transmiter.

I was only a freshman, but I just went into the shop and got a pair of clip leads and reconnected the program feed pair and we were back on the air. Of course we had to hike up to the transmitter every half-hour to take meter readings, but it was good exercise.

Campus maintenance made sure the replacement duct (which they built on their own dime) was properly marked on ALL the blueprints after that.

I note that WXXI has taken the economy move of discontinuing RealAudio webcasts in favor of Quicktime.

I don't find many webcasters using Quicktime, but I notice that nearly all of them seem to be lower in quality, especially at lower bandwidth speeds, than Real or even Windows Media, including WXXI's -- though your AM's Realaudio webcast was always fairly low-res, as well.

The Quicktime plugin doesn't provide a lot of technical information to the user, so I don't see what sort of bandwidth your webcasts are using. Could you provide us with that information?

Also, did you ever consider using an open-source MP3 encoder, and webcasting in straight MP3? I'm curious about the decision process that led to Quicktime.

Thanks.

I'm sure there are many cities where the twinkling lights of the TV towers have become part of what identifies the city skyline.

Next time you see "Austin City Limits" on PBS, check out the backdrop mural. You'll see it includes a number of vertical rows of red lights. That's the TV antenna farm in West Lake Hills, just west of downtown Austin.

The DT200V is the better choice by far, and a fine shirt pocket radio, very
sensitive on AM.

The DT300VW is less sensitive, the weather doesn't work, and it's impossible
to operate in the dark, having extremely complicated button pushes and modes.
Its only advantage is being smaller.

Channel 50 Gary had been dark for several years--it was a non-com allocation and a public TV station went out of business in 1981. Fred Eyechaner, the owner of WPWR, had just bought out the owner of the station that shared channel 60 with him (WBBS--a shotgun marriage made so that the unsuccessful SportsVision pay service could happen). He then got the FCC to switch allocations for the two Gary channels (50 was non-com, 56 was commercial). He then got the license for channel 50 and sold channel 60 to Home Shopping Network. Early in 1986, he made the switch to channel 50 and HSN took over channel 60 under the calls WEHS. The next year, the Northwestern Indiana Public Telecommunications Authority activated channel 56 as PBS station WYIN.

Nowadays, Eyechaner still owns WPWR (but will probably be getting offers from Viacom and Fox to sell his station pretty soon, if he hasn't already), WYIN's still in existence and providing an alternative PBS service to WTTW and WYCC, and WEHS, after HSN's acquisition by Barry Diller and the failure of his "City Vision" concept before he was able to convert his Chicago station, is now owned, as are all of the former HSN/USA stations, by Univision. WEHS is still running HSN, but will probably to Univision's new TeleFutura Spanish-language network at the beginning of the year.

As a gag once, we did a bit called "Choose Your Own Adventure Radio," modeled after those paperbacks for kids, where you'd jump to different pages based on your choices as the adventure unfolded.

Of course, you only have 2 options, so the story didn't make much sense, and most listeners didn't really get the joke. And a couple of my friends, listening on a clock-radio, thought it was just a mistake, as, I'm sure, did people with marginal reception and listeners on the low-bw internet stream. I'm still proud of the idea. :)

Mark; its been years; but wasn't the old Sportsvision PPV run on channel 44 at nights--after the demise of the late, great *old* WSNS-44 (where I used to remember back in the late '70s that a usually drunk Harry Caray would run the promo late in Sox games that "Creature Features" will follow the ballgame immediately). :-) Or am I thinking of the old ONTV being on 44?

>Nowadays, Eyechaner still owns WPWR (but will probably be getting offers
>from Viacom and Fox to sell his station pretty soon, if he hasn't already),

Why would Fox want WPWR? They already own WFLD-32, which you obviously know is the Fox affiliate there.

FWIW; Eychaner also owns KTVD-20 (UPN here in Denver) and KTVS-3 in the NE Colorado city of Sterling (which is a rebroadcaster of KTVD). Haven't heard anything about him wanting to sell those stations. Plus; Eychaner is happy with KTVD's ratings when the NHL season starts (particularly the playoffs) since KTVD is the over-the-air home of Avalanche hockey/Nuggets basketball. The Avs have had the best local ratings among NHL teams on over-the-air telecasts more than once; and pull absolutely mindboggling ratings for the playoff games they air. From what I heard; Eychaner wasn't much on sports, particularly hockey, until he was shown the ratings a few years ago. When the Avs moved because of KTVD's lack of repeaters around the state (particularly in the mountains) about 3 years ago; KTVD didn't waste too much time getting those translaters/repeaters in place; and thus the station got the Avs games back for the playoffs, and have been there ever since.

>Univision. WEHS is still running HSN, but will probably to Univision's new
>TeleFutura Spanish-language network at the beginning of the year.

What happened to the rumors that WEHS-60 was going to become an independent (ala WCIU-26) and ditch the HSN programming; because Uncle Jerry Reinsdorf is unhappy with the White Sox getting few games on WGN/being second fiddle to the Cubs (which they always will be on WGN)? Supposedly; the Sox/Bulls over-the-air games would move to ch. 60 when that happened (ala what happened a few years ago with WAMI-69 in Miami--which was the HSN station under the same ownership as in Chicago; and ended up with Marlins/Heat games.

Message-ID: <tssfggrc0k7pf8@corp.supernews.com>
Source record: 13009

I need to vent about the new "subscription" fees for internet broadcasts.
It seems that lawyers and artists got together again to shoot themselves in
the foot.
Now they want the radio stations to pay an additional fee for broadcasting
over the internet.

They have screwed up the real beauty of the internet. People from all over
the world could connect
to any broadcast that they wanted. I am a college student away from home and
my only contact with
my home town was through the internet broadcasts of stations.

The horrors of September 11th prompted me to try to get any news that I
could from my home town.
Was a time of uncertainty and fear and the broadcasts from local radio
stations helped me find out what
was happening to my town.

It is very sad that the American Federation of Television and Radio Artists
are dealing a blow to the rebirth
of radio.

(You WILL eventually get to the part of this Email which reveals exactly
what Jenkins said to to Chicago Tribune Reporter. Be patient :-).
=====================================
The NPR Apologia--

The quote from Jenkins was taken out of context. More importantly, it does
not
reflect the careful approach that NPR News and Jenkins have taken to this
important story. NPR always takes into account the safety of American
troops
and would not, contrary to the implications of the story, report on the
location
of a covert commando team or otherwise compromise the safety of troops. The
entire editorial team at NPR lives by these standards and our coverage
reflects
our careful editorial practices in this regard.

Below is a statement by NPR Vice President for News, Bruce Drake, on this
subject. We have released it to individuals and news outlets who have
inquired
on this matter.

Please let me know of any listener feedback or press reports on this
subject, or

if there is any other support that NPR may offer in this regard.

I think your blame is misplaced. Complain to the advertising agencies who are unwilling to pay the artists for their work. It was the ad agencies who told radio stations to stop webcasting their spots, not AFTRA. You might also blame radio stations who are too cheap to use commercial insertion software to replace the forbidden spots. Remember: forbidden by ad agencies. Remember, also, that performers make their living from those spots and should be paid when they're used. Do you work for free?

Secondly, radio never died, so no "rebirth" is necessary. Radio is very healthy, thank you, and is suffering at about the same rate as the rest of the economy. Let's see what the ratings will show for News/Talk stations in the next ratings survey. Let's see just how dead radio is. The economic impact in radio will be felt most by the News/Talk stations because of the cost of coverage, especially in New York and Washington. Other stations will feel the impact of running for several days commercial free. It was their choice, not because radio is dying. If anything, the World Trade Center attack shows just how vital radio is and how we depend on it.

If you expect webcasting to have any significant impact on anything more important than your ability to listen to radio from home, you're in a dream world. When I went to college I couldn't listen to my home town radio and I grew up without too many emotional scars as a result.

I went to school in Boston at a time when radio was either tremendously good or my memories are improving it. WBZ, WRKO, WHDH, WJIB (which I programmed) were all great stations to listen to. My hometown radio (Westfield, MA) couldn't hold a candle to it. A simple phone call to my parents would bring me up to speed on home town issues just fine.

If you try real hard, maybe see a shrink to help weather this "sad" situation, you just may grow up to be a fully functional adult. I know it'll be hard without your webcasts, but I'm rootin' for ya.

Rich

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

I'm curious, are may broadcast stations now using EQ on the live personalities air voice, or are you just still EQing to take care of room/booth ambience... the hardcore make up/polish/limiting is done at the transmitter.
With the new digital - snap shot audio enhancement devices now in the marketplace is anybody using them to enhance the on air personalities voice.....its theotherical one could set up a memory bank of enhancement for each shift??

Thanks,

Bill

A time in America when life was poor. Think of it, a time when even

owning a radio meant one was well off. Just think, something most each and every one of us own, a radio, use to be thought of as a luxury item. But what a luxury item. At this time, what a thing a radio was. When radio was this, it held such wonders as Fibber McGee and Molly, Jack Benny, Fred Allen, Arch Oboler, Orson Welles, and hundreds of Hollywood legends. Looking back on it now, at least as a fan of both radio and Hollywood, what a bargain it truly was. For a few dollars, even back then, only a few dollars bought the best entertainment that ever existed. Of course, that is said with a personal bias. My first exposure to entertainment was radio, even still, after movies, television, and computers, I still think olde tyme radio is the finest entertainment ever produced. It requires neither sight nor complexity. All it requires is a set of ears, an imagination, and a long for entertainment without sex involved. With that, Olde Tyme Radio is the best radio entertainment which has been created to date.
All this having been said, why is Old Tyme Radio put on radio stations late at night? Time's when only those who are night owls can enjoy it? Sure, in some locations, like my own Detroit, there are early times to listen, but in many parts of the country, OTR is on only in the

early morning, if at all. Why has such a great medium been reduced to the late night time slot?
Olde Tyme Radio deserves prime time. Yes, it's on the internet 24/7, yes, I even run such an internet radio station with OTR, but it deserves more than that. It deserves great financial backing on a networks radio station which reaches everyone. Why should we, those on the internet, be the only to enjoy OTR? Those who would most enjoy it aren't even on the internet, at least in mass. By that, I mean those over 60. It is they who would enjoy this.
So, why isn't OTR readily available? It should be. It's a great service, a great entertainment. Olde Tyme Radio is great. It is entertaining. And it is easy to provide. It's time that a new generation

of the world came to realize that, and the older generation was able to listen once again.

It's not just them.
The Art Bell show used to stream over the net, but that's ended and is now only available if you pay a monthly fee. Art blames the accountants in this case, not the lawyers or artists.

From a radio-lover's perspective, I fully agree with you. The Internet around 1998 was great, the free-for-all information, entertainment, and everything free.

But from a broadcaster's perspective, I realize how incredibly expensive streaming is, and generally leads to nearly no return on the investment. Banner ads have gone nowhere fast, so I think we will be faced with the choice between paying and losing.

Inflated station sale prices during the recent consolidation feeding frenzy created "a mortgage" that already had station management under extreme profit pressure.
Then comes 9/11/01...
Which kick-started a recession already looming...
Meanwhile, many Rush Limbaugh affiliates -- already struggling with stiff clearance fees -- held their breath, wondering what Limbaugh's biggest-contract-in-Radio-history could cost THEM.
THEN...the bombshell: Rush is going deaf. Affiliates are still numb.
Clear Channel stations are in a particularly tough position.
They will be forbidden to drop Limbaugh's show, since it's co-owned.
Where will THOSE stations cut back?

> downgraded.

Or they get Hispanic to buy it....increasing their market share (since CC owns 26% of HBC)....also remember Powell is broadcast owner friendly and he has hinted at removing restrictions even more on the number of stations that can be owned in one market (which in my personal AND professional opinion is totally assinine!)

> I wonder if KLAK will move from 97.5 over to 102.5 (which is being moved
> into the Sherman/Denison market from Madill, OK, and will broadcast from
> KLAK's current tower site)?

102.5 is being moved to Whitesboro....just up the road from Collinsville.. in fact I think the proposed tower site for 102.5 is the new Salem tower going up 8miles east of Collinsville....100.7/103.3 and 94.5 will move to this tower when completed....leaving CC's 2000ft tower with 89.7 (Class C) and 104.5 (Class C2) on it...talk about reduction in rent :) BUT I would bet anything 102.5 will file for an upgrade to C after 102.5 The Bear (Waco market) completes its new antenna buildup and gets sold BACK to CC...as agreed upon when it was spun from AMFM...

Aint corporate radio fun??? NOT!!!

Bill,

Compression and EQ are used with a few exceptions. Usually they are in the same unit (along with a mic pre). They are called "mic processors". EQ (along with compression) is used to tailor the sound of the mic to the format. And yeah, there are "mic processors" that can be setup with multiple pre-sets for each jock but it's a real pain and frankly unnecessary. Plus, who's gonna switch it? Can't really see a busy engineer stoppin' by the studio to punch up the right pre-set. If the jocks can get to it, it might distract them, if ya know what I mean. I know guys that would tweak on it the *entire* air-shift.

Internet webcasting Free ride is about over!

RF broadcasters have to pay out the ASS to broadcast so should internet broadcasters fair is fair!
Internet broadcasters should PAY bandwidth - spectrum use taxes just like cable companies and RF broadcasters pay
Hey congress man, FCC man, music licensing companies Put it to the internet broadcasters / streamers just like you put it to RF broadcasters

hooray! the free ride is coming to the end!!!!!!!!!!!!!!!!!!!!!!

In article <tsv4kmet2hmj84@corp.supernews.com>,
>
>You are thinking of ONTV on 44. If I recall Sportsvision was on 60 and
>Spectrum was on 66. When cable started catching on in Chicago ONTV and

Holy cow (you can see I was a Harry Caray fan); I completely forgot about Spectrum. Jeez; that was a long time ago... :-)

>Spectrum went away and their frequencies became Spanish

I remember that ch. 66 was an English independent sometime in the late 1980s when I was back there on vacation (either 1986 or 1989). I remember trying to watch something at my relatives' house; but the signal on 66 was so weak that it was snowy reaching the NW Indiana area.

>language. Sportsvision moved to cable since they had a base of Chicago
>sports teams and subscribers to draw on.

And obviously evolved into what is now Fox Sports Chicago. I remember that SportsVision used the same logo that the regional networks in other areas like New York, Philadelphia, Boston, Miami used to use as "SportsChannel" (which you know that SportsVision became before becoming FSC. I still think that was a cool logo they had.

>Fox has been looking at acquiring second stations and the UPN affiliates
>are a good target. Wish I still had the article from earlier this year on
>that.

That would be interesting to read if still available. The only thing I remember about FOX/Murdoch out here was that they tried to acquire Tribune-owned KWGN here in Denver, but the Trib wouldn't go for it. When all the affiliations changed; they tried to affiliate with the now-NBC affiliate, to no avail. They finally ended up buying their affiliate here (KDVR-31) for $70M and then built an impressive new facility on top of that.

>I'd still think the Sox should take WCIU and let the Cubs go back to WGN
>full time. MLB broadcasting rules are what started this silliness.

I've wondered why Uncle Jer didn't move to WCIU-26 either. It would make sense; 26 has been all-English for years; is an independent station, and has a good signal. The Sox could have FSC produce the games (such as what happens in most cities where the local Fox Sports regional channel produces both the cable and free telecasts such as here in Denver with the Nuggets/Avalanche/Rockies) and WCIU would have a good situation. But that probably makes too much sense; and the Sox/Bulls would lose the national games on WGN that they presently have. I thought the Sox/Bulls contract was up around now; but I see that the Bulls will be back on WGN/WCIU again; so I assume the Sox will be

as well next season, and that Uncle Jer just renewed the deal.

That makes a lot of sense,
Evil and un-bathed, stinky, Jose' Scott [KFJC FM Satanist],
is asking for funds for KFJC FM, yet it is Jose' Scott who
is guilty of stealing personal articles, money, at KFJC FM.

That makes a lot of sense,
giving money to a completely satanic radio station, with one
of the lead satanists, Jose' Scott, who is asking for support.

If it isn't nailed-down, or locked-up, Jose' Scott will
steal it, perpetually unemployed [spic bum scum], Jose' Scott
deals in drugs, sells them at the radio station, and no-doubt
always looking for some extra cash to satisfy his fix.

After stealing it, Jose' Scott was forced to return my 1979 F.C.C.
license certificate in October 2000 - of which I have it now
including the incriminating evidence from Jose' himself.
Jose' Scott is just a dirty stinky thief.

Satanist Jose' Scott:

> the ballgame
> immediately). :-) Or am I thinking of the old ONTV being on 44?

You're thinking of ONTV on 44. SportsVision was on 60 and Spectrum was on 66. Besides, "Creature Features" was always on channel 9--or so I thought.

> >Nowadays, Eyechaner still owns WPWR (but will probably be
> getting offers
> >from Viacom and Fox to sell his station pretty soon, if he
> hasn't already),
>
> Why would Fox want WPWR? They already own WFLD-32, which you
> obviously know
> is the Fox affiliate there.

1. Duopolies are now allowed.

2. They already own UPN affils in New York and LA, along with their own Fox stations. Chicago would be the trifecta.

>>Univision. WEHS is still running HSN, but will probably to Univision's new
>>TeleFutura Spanish-language network at the beginning of the year.

>What happened to the rumors that WEHS-60 was going to become an independent
>(ala WCIU-26) and ditch the HSN programming

Diller's "CityVision" concept was a big bust--WAMI in Miami couldn't draw flies, even with Heat and Marlins games. The other converted stations in Dallas, Atlanta and Boston didn't even attempt the "CityVision" concept, outside of local sports--their master controls were in USA's Orange County facility, with promos produced in Miami. Only sales offices were in those cities. Diller threw in the towel and sold all of his stations to Univision.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

I got in late on your posting in rec.radio.broadcasting, but relating to your posting is very easy for me.

The very first place I ever noticed this was on Premier Radio Network's After Midnite with Blair Garner. While working at a 100kw country station I often heard their audio both over the air and in "program". My shift was M-F 6p-11p and After Midnite came on afterward. Some nights they would sound pretty good and others downright hideous. It was absolutely some of the worst digital audio ever.

Before bit rate reduced digital audio came along (what most people call compressed digital audio) the worst thing I'd ever heard in digital audio was some early low level non-linearity in some CD players and some early 80's CD's.

Today it's very common. I worked with a guy that listened to a Rio with the original 32 mb memory and no expansion. He said "I can had an hour of music on that". I said "yeah at 96 kbit/s in stereo which sounds like shit" and he said "it's good sound to me".

Then after getting a DVD player, imagine my disappointment to hear the same problem on a couple badly authored DVD's. James Bond For Your Eyes Only which is pretty recent and there is no excuse for the 96 kbit audio on the supplements. There isn't enough on the disc to have filled it up with high bitrates. The other was The Right Stuff which really pissed me off. That was one disc I was looking so forward too getting after my wife bought me a DVD player. Throughout most of the movie (especially in Glenn's first space flight which was the worst sounding part) that artifact was present. I give Warner the benefit of the doubt despite this since it was one of the earliest DVD releases. Their later stuff is above reproach (except for that damned snapper case).

After hearing about Napster and MP3's, I decided to try it and quickly noticed the apparent large number of deaf/clueless/indifferent music lovers in the world. With most of the file being at 128, with few exceptions, they sounded like crap. Once is a blue moon an excellent 128 comes along. What's even worse is that some 256 files sound bad too despite their large file size. I don't know where some people are getting their encoders, but they are useless. If you look at most of the more recent music exchange sites you'll notice more attention being paid to bit rates. Too little too late.

Sorry for the excessive rant but I simply cannot understand how people can't be bothered by this.

Let's be generous and say 50% efficiency. That's 200 kW out of the wall plug. Do they pay 5 or 10 cents per kWh? At 5 cents, the electric bill would be $10 per hour, twice that if 10 cents per kWh. That leaves $30 or $40 per hour for incidentals such as tubes, rent, and a large staff paid huge salaries.

Hey everyone!

Ok, I have been reading the post from this newsgroup for a few weeks now. I have recently gotten a job mixxing a live radio show via an Allen and Heath Console hooked up to an old Marti RPT-15 Remote unit. Which is then transmitted to the radio station to be processed and sent to the transmiter. Now, since I am new to this situation having relatively little or no traning during my former audio school days.... My question is this... During the last few broadcast the Emergancy broadcast Tones will sound interupting my program. However, there isn't any announcment to follow it just goes back to my program material. SO??? Is there a reason for this or is this the result of some sorta human error? I have to admit for the audience of my radio program it is very annoying and I have no answers to give my boss when he ask me about it other then it something being done at the station. I would like to have something more concret to tell him. Can anyone give me some information to better understand what happening??

Thanks,

Vibekat

That's certainly possible, since the Spanish language broadcast chains seem to have a fondness for DFW rimshots that don't reach their target audience.

> also remember Powell is broadcast owner friendly
> and he has hinted at removing restrictions even more on the number of
> stations that can be owned in one market (which in my personal AND
> professional opinion is totally assinine!)

I agree with your opinion, and it is not just assinine, but really scary -- a free media with diverse ownership is something that we've had for many decades in this nation, and I don't understand why we seem to be so casually discarding this ideal in the past several years.

> 102.5 is being moved to Whitesboro....just up the road from Collinsville..
> in fact I think the proposed tower site for 102.5 is the new Salem
> tower going up 8miles east of Collinsville....

Unless they've filed yet another CP application, KMAD in Whitesboro is supposed to transmit from 33-41-31N, 96-26-36W, which is the coordinates of the current KMKT/KLAK tower located between Denison and Bells.

However, I'm sure that if the opportunity exists to upgrade KMAD 102.5 to a full C and sell it for $20million exists, Next Media will jump at the opportunity -- so who knows where this station will ultimately end up?

A lot of audio compression is bad, but a lot of it is darn near indetectable, unless you are listening to the speaker with unforgiving ears. I had a Rio MP3 player and have to add it was the worst compression I had ever heard, and ended up giving it away. I did put songs on it at 256, but then you could only fit 5 or 6 songs on (even with expanded memory).

The best recent compression model I ever heard and still like, is ATRAC, as used in minidiscs. Minidisc is a beautiful thing, but I prefer solid state memory now myself...

I believe that most people today (young people, mind you, 35 or less), are actually willing to go backwards on sound quality for a while due to the novelty of the Internet, and MP3 players. Which will mature rapidly and get better soon.

You probably hear compression in radio and tv largely because of generational transfers, as opposed to poor workmanship or compression codecs. By the time a show gets to the listener or viewer, it has probably gone through 2 or more stages of loss. And, if you are sensitive to sound (like you are and I am) you will detect it.

Most broadcasters use compression even today, though hard disks are cheap, broadcasters are cheaper. And if they think you can't hear or see it in general (and most people don't), they don't care. I know, I am in radio, and we compress a lot of the audio in our system now, because we are running out of space and there is NO budget right now for more hard drives that are going to be obsolete next week!

Some time ago, I worked for a medium market chain in the Northeast (five stations.) They ran their EAS tests faithfully, but did not put any audio before or after the tone(s). They simply dropped the EAS-Buzz into the middle of a spotset, and got back into regular audio as quickly as possible. No warnings, no "this is only a test."

1) Is this the norm?
2) Is this legal?

>too.

The ones who get paid "pretty well" are the big celebrities. They get paid for limited use, usually 13 weeks. If you want to use it longer, you pay them again, every 13 weeks. If a spot is recorded for TV you pay the TV rate. If the audio is stripped for radio, you pay an additional fee for radio.

What AFTRA is saying is, instead of 13 week increments, you pay for a full year's use in a different medium.

This isn't really very different from writers demanding to be paid by newspapers for the use of their work on web sites. They were originally paid only for the newspaper. If a writer allows a magazine to publish an excerpt of a novel, for instance, the magazine pays for its use. The concept that once it's written it can be used anywhere isn't kosher.

I know many voiceover people who make a large part of their living on residuals. The precedent has always been that you pay for use. If you ask AFTRA in New York if there's such a thing as a "buyout" they'll tell you there's no such thing. In places where there is, the cost is high.

Rich

>During the last few broadcast the Emergancy broadcast Tones will sound interupting my program. However, there isn't any announcment to follow it just goes back to my program material. SO??? Is there a reason for this or is this the result of some sorta human error?<

It could be. The Emergency Alert System (which supplanted the old EBS more than 4 years ago) uses two types of tests:

--The Required Weekly Test (RWT), which is six data bursts (three bursts, followed by three shorter bursts, often nicknamed "duck farts). No voice announcement is necessary. On non-automated stations, this test is normally sent manually, between programming elements, and should not interrupt anything else.

--The Required Monthly Test (RWT), which consists of three data bursts, the old two-tone Attention Signal, a voice announcement, and three short data bursts. This test must be relayed within 15 minutes of reception of the test from another station. Many stations' EAS equipment is set to relay this test automatically, and if there is no operator on duty, often this relay will interrupt whatever is on the air at the time.

Agreed. Are they working as hard when they recorded the ad as when it plays
a hundred times later and people tune out because of it? Ridiculous!
They should pay to have someone hear that likely poorly produced commercial
that is the dominant creation on radio today.

As for the music industry, it is time for stations to CHARGE for playing
songs. If I were a DJ, I would want to be paid very well for having to
listen to the 4th rate rubbish that is called music today. I think Clear
Channel and others should start charging record companies now!

That is funny since I am usually anti NAB (I love LPFM), but this royalty
issue is quickly climbing up Mount Greed.

MOST of their payment, Jim, comes in the form of residuals.

>and he has hinted at removing restrictions even more on the number of
>stations that can be owned in one market (which in my personal AND
>professional opinion is totally assinine!)
>

This is why I posted it originally since I don't think they can do that
either. Clear Channel tried to sell off some its extra stations to
HBC as part of the AM/FM acquistion. The FCC rules didn't allow that --
you cannot sell a station you are forced to divest to accomodate
market caps to an entity you own part of. So, the FCC did not allow
CC to sell KEYI 103.5 Austin and KKFR 92.3 Phoenix to HBC.

If they did buy 97.5 and move it into the D/FW, they would have to
sell it or divest another property -- KZPS, KEGL, KDGE, KDMX, and KHKS.
I wouldn't think they would dump any of their current facilities --
i.e. trade a Cedar Hill facility with a full signal for a rim-shooter.

By moving KWTX-FM into Austin, they've created the same situation where
they would have to unload it or another property -- KASE, KVET-FM,
KFMK, KHFI-FM, or KPEZ. KWTX-FM will move in as a C1. Now, CC
has 1 C, 2 C1s, and 2 C2s (KPEZ, KFMK). At first, it looked like they
might get an upgrade (add KWTX-FM and sell off one of the C2 facilities).
However, KHFI gets downgraded to a C2 to accomodate KWTX-FM's move.
If they keep KWTX-FM and sell off either KPEZ or KFMK, they end up with
the same facilities (1 full C, 2 C1s, 2 C2s); if they sell KWTX-FM,
they lose a Waco and Temple/Killeen signal and have weakened the
facilities of one of their Austin holdings (1 C, 1 C1, 3 C2s).

1a. November Schedule Changes
Effective 11/01/2001
A Quick Over-View

The reason that these changes are necessary is due to our upcoming
Christmas schedule. We need to adjust things a little bit so we
can give you some wonderful entertainment during the month of December!
We hope this won't cause to much of a problem for you, and your ability
to listen to your favorite radio shows.

On Sunday....

Instead of 5 and a half hours of Magic Island, we'll have :

1:30am The Haunting Hour

2:00am - 7:00am CBSRMT
A Trip Through It's Years

On Monday....

7:00pm The Aldrich Family moves here from 8:00pm

8:00pm Mary Noble, Backstage Wife begins it's(Mon-Sat) airings until
November 29th.
That date brings The Cinnamon Bear.

8:15pm Chandu, The Magician begins it's new (6 times per week) time
slot.

On Tuesday....

8:00pm Mary Noble
Backstage Wife

8:15pm Chandu,
The Magician

On Wednesday....

8:00pm Mary Noble
Backstage Wife

8:15pm Chandu,
The Magician

On Thursday....

8:00pm Mary Noble, Backstage Wife

8:15pm Chandu, The Magician

On Friday....

7:30pm Gunsmoke Moves from 8:30pm

8:00pm Mary Noble, Backstage Wife

8:15pm Chandu, The Magician

8:30pm Damon Runyon Theater moves from 8:00pm

9:00pm Fibber McGee & Molly moves from Thursdays at 8:00pm

9:30pm Maisie moves from 7:30pm

On Saturday....

9:00am The Magic Island, 5 Chapters, a New Time Slot

11:00am Our Miss Brooks moves from Tuesday Nights

11:30am Richard Diamond moves from Wednesday Nights

8:00pm Mary Noble, Backstage Wife

8:15pm Chandu, The Magician

9:00pm The Whistler moves from 8:00pm

---

2. New Nite

Welcome To Another New Experience from CSRO!

What is New Nite? Well, simply, it's show's you've never heard on CSRO before!
More than likely, it's show's that you've never heard anywhere before! Of course,
there are exceptions to that, but hey, there are exceptions to everything!
New Nite, on the most part and for most people will be a place for ya'll to hear
shows' ya never knew existed before! For instance, for New Nite #1, here is the line-up we've got scheduled :

New Nite Audition Broadcast : November 21st, 2001

7:00pm CBS Radio Adventure Theater
8:00pm The Creaking Door
8:30pm GI Journal
9:00pm Let's Pretend
9:30pm Ozzie and Harriet
10:00pm Paul Temple
10:30pm Rocky Fortune

11:00pm Story Lady
11:30pm The Unexpected
12:00am The Green Hornet
12:30am The Green Hornet

Note : Yeah, I know, we play The Green Hornet every Saturday morning, but most don't know that! So we'll play two episodes from the series at midnight EST!

New Nite, a place, a time, an experience. An experience of Olde Tyme Radio
that only Classic Stars Radio can bring you!

CSRO Listeners Note :

After New Nite Airs, a CSRO Vote will be put up on our web-site. This vote will give you the chance to vote on the series' you heard on New Nite and tell us which you would like to hear on our regular schedule!

3.CSRO Presents

CSRO Presents
Jack Benny, The Early Years
Saturdays at 2:30pm EST

Jack Benny in "The Bee"

If you are a fan of OTR, or of Jack Benny, it's more than likely you've heard of the feud between Jack Benny and Fred Allen. What you may not know is how or when it started. It is this famous feud and how it started which will be the focus for CSRO Presents during the next 9 weeks.

This entire feud, which ends with the "King for A Day" skit on The Fred Allen Show several years later, began on January 3rd, 1937. This episode of TJBP saw Jack attempting to play a violin piece called "The Bee." Needless to say, at least for those of you familiar with Benny, what should sound like The Bee comes out sounding like a cat in distress. The result, Fred Allen latching on the following Wednesday, poking fun at the misery Benny inspires and advises everyone to leave the country and escape the misery of Jacks violin. The following Sunday we find Benny retorting with his extraordinary wit, thus giving birth to the feud.

The weeks following find the insults dished out by Fred destroying Benny's self confidence. This is seen in how he delays his final performance of The Bee week after week. Finally, it's to much. Jack is forced to play his violin in an effort to prove he is better than a ten year old who Fred enlisted to help poke fun at Jack.

Here is your chance to hear how it began, at least from Benny's point of view. CSRO will broadcast The Jack Benny Program, dates 1-03-1937

through 02-28-1937 over the next nine weeks. Following the concluding episode of 2/28, we'll bring you the famous King for a Day skit as a closing tribute to radio's greatest feud.

DJ Twain

---

4. CSRO Holiday Season

4a. Greetings everyone! Here is the news of the year!
For those of you who have been with us for a while, you already know what to expect of our Christmas broadcasts. But for those of you who have just joined us this year, then you are in for some great Xmas surprises!

4b. Thanksgiving Broadcast

Since Thanksgiving this year falls on 11/22/1963, an American Historical Date, we will not be doing a Thanksgiving broadcast. Instead, as every year on 11/22, we will be broadcasting our JFK assassination day broadcast from 1:35pm EST until 12:00am EST.

4c. Cinnamon Bear Daily Broadcast

November 29th - December 24th
Every Night at 8:00pm EST, 5:00pm PST

4d. December, Christmas Weekends, Christmas Week

Each Weekend in December, leading up until Christmas, CSRO will be broadcasting OTR Christmas shows. Tune in from 6:00pm - 12:00am EST, re-played 12:00am - 6:00am EST, for Olde Tyme Radio, Christmas Tyme!

December 1, 2 Show Details Coming in November
December 8, 9 Show Details Coming in November
December 15, 16 Show Details Coming in November
December 22, 23 Show Details Coming in November

4e. December 24th, December 25th, and December 26th

Tune in for non-stop Olde Tyme Radio Christmas shows. From Lux, to Fibber McGee, to The Complete Run of The Cinnamon Bear, also XMAS music thrown in thanks to the big band era. CSRO will be a great stop on your families Christmas train!

The Cinnamon Bear will be broadcast in it's entirety on Christmas morning. The series broadcast will begin 12/25/2001 at 9:00am EST. All 26 parts will be played for your Christmas morning enjoyment!

In <tt9hk1q77gekb9@corp.supernews.com>, Rich Wood <richwood@commspec.com>
wrote:
> The ones who get paid "pretty well" are the big celebrities.

I guess it's relative, Rich. The four or five people who seem to have
the voice-over work sewed up locally can subsist on what they make
doing production. Hell, one made enough to support a nice cocaine habit
for awhile. They aint "big celebrities" but make an awful lot more than
I do. And I know when I was doing voice-over stuff umpteen years ago
that I was getting more for 20 minutes in the studio than I'd make that
day slugging away at the radio station. (And I didn't get residuals).

Perhaps it's just me. If I voice something, I'm paid for it, and
I'm quite content with that. If someone, for some reason, wanted to
dredge up one of my old spots 20 years from now and, say, sample it
in some rap, it makes no difference to me. Then again, if I were
interested in money, I'd never be in radio.

> This isn't really very different from writers demanding to be paid by
> newspapers for the use of their work on web sites.

So I should demand extra cash because my newscasts are also
simulcast on the web? I know what the boss would say about such
a novel concept. :)

Sorry. Still sounds to me like a cash grab attempt by well-paid
people with the listening public coming out the loser.

Jim

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

>They simply dropped the
>EAS-Buzz into the middle of a spotset, and got back into regular audio
>as quickly as possible. No warnings, no "this is only a test."
>
>1) Is this the norm?
>2) Is this legal?
>
So far as I know it's legal. Somebody will answer authoritatively in a moment, I'm sure. It is also stupid because listeners will take it as a mistake.

My uncharitable guess is that your management had such comtempt for the intelligence of its listeners as to assume that they were too stupid to notice. Or perhaps that they weren't paying enough attention to notice. In the latter case, why would anybody buy a spot on the station? If management assumed nobody was paying attention.

GH

3492. FAQ: Old Time Radio (OTR)

Newsgroup: rec.radio.broadcasting
Date: 2001-10-25 20:04:04 UTC

Table of contents:

Q01. What is "OTR"?
Q02. You haven't mentioned OTR music, why not?
Q03. Where can I buy recordings of old radio shows?
Q04. Which vendors have (lower prices) (higher quality) (faster
response)?
Q05. Are OTR shows rebroadcast? If so, where and when?
Q06. I remember a great show called (x). When was it aired?
Q07. Are there any books about OTR?
Q08. Does anybody trade tapes of OTR shows?
Q09. What's this stuff about Copyright?
Q10. How can I get my local radio or TV station to broadcast OTR
programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the plots or
themes of OTR programs?
Q16. Is there a World Wide Web page (URL) I can access for more info?
```

Q17. Is there an email newsletter on OTR? How do I subscribe to it?
Q18. What ever happened to the person that played [insert character] on [insert name of show]?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your site?
Q25. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q26. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q27. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?
Q28. I am interested in re-creating some OTR drama. Where can I get scripts?
Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?
Q30. Can I chat with other OTR fans on the internet?
Q31. Where can I buy 1970s CBS Radio Mystery Theater programs?
Q32. Is there an internet news group for old time radio?
Q33. OTR network shows were usually heard at the same local time, no matter what the time zone. How did they do this?
Q34. I'd like all the information there is about [insert name of OTR show]. Is there a FAQ that covers all the shows ever on the radio?
Q35. Is there any information on OTR conventions?
Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?
Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?
Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?
Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?
Q40. What MP3 player is best for OTR?
Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?

Q01. What is "OTR"?

A01. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories,

comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama". Purists even discriminate between the "Golden Age" (late '30s and the decade of the '40s) and the "Silver Age" ('50s). In any case, there are plenty of programs of various types that are enjoyable entertainment. Best of all, they don't require a large screen TV to enjoy 'em -- the "visuals" are provided by the listener's imagination.

Q02. You haven't mentioned OTR music, why not?

A02. There was a good deal of big band, bluegrass, country and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band or the various news groups specializing in music of various types. Bluegrass fans might enjoy the Old Time Music on the Radio WWW pages. (They happen to use the same acronym, "OTR", but are not affiliated with The Original Old-Time Radio (OTR) pages). In addition, there is a Big Band and Other OTR Music BBS at www.old-time.com/otrbbss.html/

Q03. Where can I buy recordings of old radio shows?

A03. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from the www.old-time.com site. Many public libraries have a small stock for perusal as well. Some vendors and collectors even have their own WWW pages.

Q04. Which vendors have (lower prices) (higher quality) (faster response)?

A04. Prices, quality and service differ somewhat among all vendors. Check with other OTR fans to learn of their experiences, then check with potential vendors.

A comparative price chart, listing many vendors, is available at the www.old-time.com site.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the www.old-time.com site

---

Q05. Are OTR shows rebroadcast? If so, where and when?

A05. Yes, several AM and FM radio stations, satellite feeds, a shortwave station, and at least one Public Access TV station rebroadcast OTR. Check the Old-Time WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the National Radio Club's AM Radio Log, 17th Edition: Complete Listing of U.S. and Canada AM Radio Stations (Mannsville, N.Y.: NRC, 1997). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's FM Atlas (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has maps of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx. $1.00 s/h]

The M Street Radio Directory, M Street at +1 615-251-1525 voice, or +1 615-251-8798 FAX. The address is M Street Corp., PO Box 23150 Nashville, TN 37202 The price for the 8th edition is $65.00 plus S&H

Q06. I remember a great show called (x). When was it aired?

A06. If the show was heard nationwide, look through the program databases / logs at the Old-Time site or at Jerry Haendiges' site (see answer A14 below). If the show was only on local radio, you will have more difficulty in finding an answer. Checking with your local radio stations is probably the best bet.

Q07. Are there any books about OTR?

A07. Yes, there are many books related to OTR. See the www.old-time.com site for a bibliography of several hundred books. There is also a page where you can read or enter critiques or reviews of various books on OTR.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt. 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services that will help obtain old/out of print books for a fee.

Q08. Does anybody trade tapes of OTR shows?

A08. Yes. Check with the various on-line OTR services. Leave a note in the OTR Digest, alt.radio.oldtime, or Ray Plumlee's OTR Traders BBS at http://otr-trader.com/ Remember to observe copyright laws!

Q09. What's this stuff about Copyright?

A9. The copyrights on some OTR shows have expired. Several copyrights have been renewed, and some may have fallen under "common law" copyright (even though they were not originally copyrighted). 1970s era Berne Convention agreements further cloud the issue for non-lawyers. See the Old-Time WWW site for the latest "common sense" and legal citations.

A concise answer was given by 'A. Joseph Ross' (lawyer@world.std.com) (used with his permission):

Just to get a little perspective in this
controversy, copyrights do expire. Under the old
copyright law, a copyright was good for 28 years
from the date of first publication, renewable for
another 28 years, for a total of 56. Under the 1976
act, those copyrights were extended to 75 years,
provided they were renewed. Copyrights under the new
law, which took effect on 1 January 1978, are good
for the life of the author plus 50 years. Copyrights
on anonymous works, works made for hire, etc. are
good for 75 years after first publication.

So, since otr has just barely been around for 75
years, little or none of it is in the public domain
yet by reason of having been around for a long time.
The question of what constitutes publication, and
the fact that sound recordings could not be
independently copyrighted until the new law took
effect add additional complications.

Q10. How can I get my local radio or TV station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase the number of listeners and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us:

The days of radio being ruled by the artisans is over, and
for some time now it has been in the hands of people who
only look at the bottom line, so to reach them you must
talk through public radio pledges, or through sponsors

on commercial stations.

Don Fisher (dfisher@sover.net) has been successful in getting his local Public Access TV station to rebroadcast OTR. In fact, Don is the MC of the program. Contact him for hints on how to get your Public Access TV station to do something similar.

Elizabeth McLeod (lizmcl@midcoast.com), who has spent more than 15 years working in local radio, gave the following advice:

I can tell you that one phone call from a listener means absolutely nothing to a program director. PD's are totally under the thumbs of their General Managers -- and GMs, in turn, base their decisions EXCLUSIVELY on sales issues. It doesn't matter how many people want to hear something -- if the GM doesn't think he can sell it, if the GM doesn't think it'll bring hard cash into the station, it won't get on the air. Period.

The only reason a commercial station exists is to make money for its owners. ALL decisions at the station, be they about programming or anything else, are made with this in mind.

Don't bother to approach the station itself, APPROACH THE STATION'S ADVERTISERS!!!

Listen to the station and figure out who its biggest sponsors are. Generally, they'll be local banks, car dealers, insurance agencies, and appliance retailers. Do you know anyone connected with these advertisers? Then approach these people. Tell them you've heard their ads on such and such a station, and that you think a lot of people would be interested in hearing OTR, and that advertising on an OTR series might be a good strategy. And get your friends to do the same. And be persistent! In other words, SELL THEM ON THE IDEA!

You need to keep in mind that some types of stations are more likely to air OTR than others. If your local station is has a firmly-defined format, you are probably "S-O-L," as the saying goes. They won't break format, no matter what. On the other hand, if you have a local non-commercial community-type station, way up on the left side of the FM dial, you may have a very good chance of success.

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

There are several computer programs available to convert analog sounds (as on a tape) to a digital format (e.g. WAV file). Some of these computer programs also have noise reduction, filtering and enhancement capabilities. In many cases, application of digital technology will improve the sound of a noisy or deteriorating analog tape. There is a problem, however, if the digitized rendition is re-recorded to tape, and subsequently re-digitized for further treatment. Since digitization is a sampling technique, sampling a sample can result in extremely degraded sound patterns.

A very nice program that will convert analog material to digital format is Audiotools by Andrew Fish. For more information on this software, visit the Audiotools BBS at www.old-time.com/otrbbss.html or Andrew's site at http://www.unrelatedinventions.com/Audiotools/

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of the master tape when duplicating - ed.]

Q12. Are there any OTR clubs near me?

A12. Check the club listings in the Old-Time WWW page, and leave a note in one of the on-line OTR groups asking about local clubs for your area. If you find a club that is not listed at www.old-time.com, ask a club officer to send a note to the webmaster with particulars about the club.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program series?

A14. Some on-line OTR collectors have contributed Program Logs for several well-known series. The logs are available at www.old-time.com/otrlogs/ . While you are logged in at that site, check the "Humongous OTR Database" (a database of contributed catalogs and libraries), which is searchable with your WWW browser.

The "logs and publications" entry at the Old-Time WWW site gives names and addresses of several vendors of these items (thanks to RadioJoe5@aol.com (Joe Coleman) and others).

Jerry Haendiges maintains a VERY complete set of OTR program logs, at his Vintage Radio Place: (http://www.otrsite.com/radiolog)

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of The Ultimate History of Network Radio Programming and Guide to All Circulating Shows. You can see more info at http://www.old-time.com/sponsors/hickerson.html

Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the plots or themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of OTR plots or themes, send them to the on-line OTR services or to webmaster@old-time.com for inclusion in one of the databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at http://www.otr.com and http://www.old-time.com.

David Hassell maintains a growing selection of program summaries at
http://members.aol.com/DavidLHsl/otr/otrlist.html

Also check Frank Passage's logs at the old-time WWW site; most
contain a short synopsis of the program.

Many of Jerry Haendiges' logs contain excellent summaries of not only
the program series, but of each episode as well.

Many of the local and national OTR clubs maintain informational
libraries with this material.

Q16. Is there a World Wide Web page (URL) that I can access for more
information?

A16. Yes, there are several WWW sites. Each site contains different
information, so you might want to visit them all. The major OTR WWW
sites all have links or pointers to each other, so you can explore
many topical areas within old time radio. Good places to start
exploring are:
www.old-time.com
or www.otr.com
or www.otrsite.com

A fairly lengthy list of WWW sites with some kind of OTR affiliation
is maintained at www.pe.net/~rnovak/jack.htm

An excellent database of OTR-related WWW sites, with an explanation
of the contents of each is at
www.otr.com/cgi-bin/cgiwrap/otr/db.cgi?uid=default

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Several newsletters currently exist. Here his how to get the
best:

The Old-Time Radio Digest (AKA "Internet OTR Digest") is a very
popular and freely available electronic newsletter, delivered
nightly. Its purpose is to foster general discussions about the hobby
of collecting, preserving and listening to OTR. To subscribe, send an
email

TO: old.time.radio-request@oldradio.net
SUBJECT: subscribe
(The body of the message is ignored)

Q18. What ever happened to the person that played [insert character]
on [insert name of show]?

A18. Check the "Personality Pages" at www.old-time.com for home
pages of several well-known OTR personalities. Also check the Where
Are They Now pages at www.440int.com.

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2,000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the take-up reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS or 7 1/2 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time. There is very little fidelity loss when using this medium to duplicate programs.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

From: vintage@infohouse.com (Andy Blatt)

I wholeheartedly recommend Play It Again, Sam of Lakewood, Ohio. They also sell used Pioneer reel decks with a warranty and accept major credit cards for repair or used machines. The address is 12611 Madison Avenue in Lakewood, Ohio 44107. The phone number (no answering machine, no fax

machine) is 216-228-7330. As far as pitch control cassette decks, Marantz offers several one of which is the three-head portable PMD-430.

[Play It Again Sam has a WWW page at www.playitagainsam.com - ed]

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibility with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or

video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO (click) TWO (click) TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Several hobbyists are now investigating the utility of using CD-ROM or MiniDisks for archival purposes. CD-ROMs can hold hundreds of hours of program material, but at the cost of time-consuming conversion from analog to digital representations. Selection of appropriate encoding and compression technologies is extremely important to prevent digital artifacts. MP3 (MPEG III) compression seems to be more favored than is RealAudio(R) compression.

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating

alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish (lodeston@bluemarble.net) also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70s, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-'80s. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130
degrees Fahrenheit. It is entirely possible to bake a
tape twice if the first time doesn't do the trick. You
get about a three-week "window", sez Tom, before the tape
starts to re-absorb water. So the best deal is to bake
the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios,
phonographs and accessories is the rec.antiques.radio+phono news
group, created by Bill Robie. A pointer to his FAQ may also be found
at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m) -
Focuses on radios, phonos, and related materials made before the 60s
- Avoids "ham" radio gear (the Boat Anchors group covers that) - Has
a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast
Pioneers' Library". This is an excellent resource for the serious /
professional researcher. It can be accessed through the old-time WWW
site, or directly via the URL: http://www.lib.umd.edu/UMCP/LAB/

Additional sites with pictures of old radios or other hardware
resources may also be found at http://www.old-time.com

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an
excellent choice for picking up distant AM stations that carry OTR
programming. Although the tuning dial has notoriously poor
calibration, the sensitivity and selectivity seem superior to other
radios.

Some readers have had good success with the Select-A-Tenna antenna
advertised in several magazines, and the Grove Catalog. The S-A-T
seems to be rather directional, and may eliminate off-axis
interference.

Ham Radio magazines sometimes carry information about small loop
antennas for AM DX-ing. Some pointers to instructions on how to build
them are at http://www.old-time.com. Also, Dan Hughes
(dan@soltec.net) left this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, visit my website
at http://members.soltec.net/~dan

If you are interested in AM Broadcast Band reception, and technical articles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

(The National Radio Club also has a WWW page, at www.nrcdxas.org/)

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at http://www.old-time.com):

Atlanta Radio Theatre Company: www.artc.org
ZBS Media http://www.zbs.org/zbs.html
LodesTone Productions
http://www.bluemarble.net/lodeston/lode.html
Midwest Radio Theatre Workshop http://www.mrtw.org/mrtw

Q24. I have only email access to the Net. Can I still get the files at your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.
To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message

TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

I have also initiated a simplistic file server. At present, it can handle only a few files. If you have ONLY email access to the Internet, and want more information on what is available by email, send an email in EXACTLY this format:

To: files@old-time.com
Subject: send help.otr

do NOT put anything in the body of the message (it won't be read)

Q25. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A25. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Many of the soundbytes can be downloaded, and played on your computer's sound card, others will play "realtime" through your multimedia system. There is also a news group, alt.binaries.sounds.radio.oldtime, that tries to transfer OTR shows (news groups are notoriously inefficient at transferring large binary files, however).

You can select from many moderate-length soundbytes at Jerry Haendiges' Preview Listening Lounge at www.otrsite.com/ra/preview.html
---

Q26. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A26. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).

They have two catalogs: one for audio and one for
video. Cassette albums are available in a large
number of different styles, sizes and capacities.
The 8-cassette albums I use are CPCN.4+4M/WHT in
white and CPCN.4+4M/RBLU in royal blue. Outside
dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit
well on a bookshelf. This model also seems to cost
less per cassette than any of the other models,
though logic might lead you to the conclusion that
the larger capacity ones would cost less.
[Polyline has a website at www.polylinecorp.com, and their new
address and phone number are:

Polyline Corporation
1401 Estes Ave.
Elk Grove Village, IL 60007]

Q27. All this new software is a bit difficult for me to use, as I am
blind. Can you give me any assistance on how to read your page?

A27. Yes. Although my WWW page is best viewed with Netscape or
Microsoft Explorer, most pages render well with LYNX and associated
reader software.

Blind visitors who depend on DOS-based software to access the net, or
who use a reading program to audibly display their computer's output
might be interested in a program called "Nettamer". The Nettamer home
page is at www.nettamer.net/

Q28. I am interested in re-creating some OTR drama. Where can I get
scripts?

A28. Check your local or national OTR clubs. Many have a "print
library" that includes scripts. You can also point your browser at
the University of Maryland's script page, at
www.lib.umd.edu/UMCP/LAB/scripts.html

Jack French (OTRpiano@erols.com) said:

One excellent source is the book. "One Hundred Non-Royalty
Radio Plays" compiled by William Kozlenko, Greenberg Publ of
NYC 1941. It's certainly out of print now, but many libraries
would have a copy. I bought mine at a used book store a few
years ago. The 100 radio plays in the book include adventure,
mystery, fantasy, comedy and historical. Most were originally
produced on educational stations in the 30s. Authors include
Saroyan, Julian, and Liss.

Larry Groebe, of the Generic Radio Workshop, has several pages
dedicated to on-line OTR scripts at http://www.genericradio.com
---

Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?

A29. In addition to the old radio being mistuned, similar problems can be caused by one or more of the tape recorders used before you received your copy of the program. Print-through has already been mentioned in Q & A 19. Bob Burnham has a nice explanation of two more problems: crosstalk and channel leakage.

Crosstalk and Channel Leakage are 2 different things. OTR collectors seem to have the most problem with channel leakage.

When you hear another program faintly playing in the background in normal direction, this is usually Channel Leakage. This is a leftover problem from the 1970s & early '80s when most collectors traded on open reel tapes which were quarter-track mono -- there were different (separate) programs on left & right channels. This allowed 6 hours of shows to be placed on one reel. Unfortunately, many collectors would duplicate L & R shows simultaneously. Depending on the quality of the equipment (and its condition) it was common for one program to bleed into the opposite channel...especially if the collector was careless and allowed over-modulation.

Crosstalk results when a tape is recorded (or played back) on a machine with mis-aligned tape heads. It can also occur when trying to record over a 1/2 track recording with a 1/4 track machine with dirty or mis-aligned erase head. You usually will hear another program playing IN REVERSE in the background.

HOW TO PREVENT CHANNEL LEAKAGE AND CROSSTALK...

If duplicating quarter track reels, copy ONE channel or track at a time. As for crosstalk, make certain your machines are kept in proper alignment. Use a high quality BULK ERASER if you re-use old tapes... this is especially true for those who use reels.

Sorry, there is NOTHING you can do to remove these flaws once they are there.

Q30. Can I chat with other OTR fans on the internet?

A30. Yes. Lois Culver (lois@chatlink.com) and other OTR fans meet every Thursday at 8:00 PM Eastern time, on Channel #OldRadio, on the StarLink-IRC. If you are unfamiliar with Internet Relay Chat, please get software and instructions from your favorite Internet Service Provider or shareware/freeware software site, or connect to www.old-time.com/irc.html for basic instructions.

Q31. I'm looking for copies of old "CBS Mystery Theatre" radio programs, primarily from the 1970s era. Does anyone know where I can call or write to obtain such items? I'd like to purchase a complete set if possible.

A31. Jack French (OTRpiano@erols.com) left the following information:

You most certainly do not want a complete set of this series, because you couldn't afford it. There were 2,970 shows aired so even if you could find them for a buck an episode, you'd have to cough up three Gs. The series ran from 1-6-74 to 12-31-82 and since it came so late in radio history, every episode was recorded by somebody. All episodes are still copyrighted, and CBS enforces their copyrights. Therefore no dealer is going to list them, and collectors are reluctant to sell or rent them. Your only hope is to find some way to get copies in a fashion not in violation of copyright law.

Editor's note: By my count, there were about 1400 different CBSRMT shows. The rest may be duplicates.

Q32. Is there an internet news group for old time radio?

A32. Yes. alt.radio.oldtime is available via some news servers. Since many news servers ignore alt.groups, you may need to contact your ISP to get that news group listed locally. See www.old-time.com/newsgroups.html for more information. Also try www.deja.com to sample some of the messages.

Q33. OTR network shows were usually heard at the same local time, no matter what the time zone. How did they do this?

A33. Two ways: Many networks used telephone lines to carry the show from the studio to transmitter sites. The show was done live at least twice - once for the East coast, once for the West. After Bing Crosby spearheaded the introduction of recorded shows (about 1948), the East coast show was recorded for later telephone transmission to the West coast.

Q34. I'd like all the information there is about [insert name of OTR show]. Is there a FAQ that covers all the shows ever on the radio?

A34. No. There are many books (Remember them? They have words printed on pieces of processed dead tree) written about what we now call "OTR". See answers A7 and A37. If you would like to contribute an original article about one or more facets of OTR, many of the webmasters of on-line OTR sites would be happy to consider archiving

it.

Q35. Is there any information on OTR conventions?

A35. Yes. There are several. Here are some of the larger ones:
* Annual OTR and Nostalgia Convention in Cincinnati, OH (April)
* Radio Classics Live, Brockton MA (May)
* Annual Lum and Abner Society Convention (June)
* REPS Radio Showcase (June)
* Friends of Old-Time Radio (October)
* SPERDVAC (November)

See the convention page at www.old-time.com for specific dates and contact person info.

Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?

A36. Yes. Try Old Time Radio Bulletin Boards at www.old-time.com/otrbbss.html. That page contains a list of several old-time radio oriented WWW bulletin boards. You can also access OTR message boards at http://www.lofcom.com/nostalgia/phorums/

Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?

A37. Jack French, an expert on old-time radio and editor of Radio Recall, gives us this information:

There's good news and bad news....the good news is if Jay's compendium says they are in circulation, somebody has them. The bad news is there is no guarantee you'll find them. Let's start at the beginning. If they're in Jay's book, and there is either the initials of a dealer, log preparer, or collector with that entry, the assumption is that person has some or maybe most. If the entry is devoid of such, we push on. Few dealers list rare shows in catalogs since so few people want to buy them. Generally the catalog represents a small part of a dealer's or collector's total holdings. There are at least forty OTR dealers in the country so you can contact each one with a specific inquiry. Most collectors belong to at least one OTR club. There are about 20 clubs. Most will publish your request in their newsletter for little or no cost. Most of the members of OTR clubs are not on-line so this is the only way to reach them. There are over 25 state and college archives that may have the shows. Most have no catalog but will

answer any reasonable inquiry. Contact them all. All of the contact addresses for OTR clubs, pubs, dealers, and archives are contained in NARA OTR Source List. Contact me separately if you're interested in this low-cost research aid.

Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?

A38. Just as with home made recordings of any type, the quality of OTR MP3s varies considerably. Some of the online MP3s may have been converted from low sample rate RealAudio(tm) files, others might have been "ripped" from low-generation masters. Most CD-ROMs for sale on the WWW were recorded using these varying-quality MP3s. In other words, the MP3s in themselves are "collectable" only for the enjoyment one might get from listening or further trading. They have little intrinsic value, and are of unknown quality. It might help to associate your estimate of quality with the provider's name, to attempt to predict quality and avoid long downloads of poorly prepared material. Another point to remember - some OTR is still under copyright protection. Please observe applicable copyright laws.

Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?

A39. A large number of OTR personalities were interviewed by the author John Dunning. Stewart Wright, Editor of the RHAC Newsletter gave us the following information. (You can learn more about RHAC by checking their page at http://www.old-time.com/sponsors/rhac.html)

The Radio Historical Association of Colorado (RHAC) has tapes of many OTR personalities interviews that were conducted by John Dunning in the 1980's. Several Radio personalities such as Elliot Lewis were interviewed more than once. The following is a fairly complete list of the Dunning interviews in the RHAC library.

Steve Allen, Elvia Allman, Eve Arden, Hy Averback, Parley Baer, Parley Baer and Georgia Ellis, Parley Baer and Sam Edwards, Parley Baer and Whitfield Conner, Bill Baldwin, George Balzer, Harry Bartell, Andre Baruch and Bea Wain, Court Benson & Grace Matthews, Bernice Berwin, Mel Blanc, Ray Bradbury, Curley Bradley, Frank Bresee, Candy Candido, Hal Cantor, Charles Collingwood, Whitfield Conner & Haila Stodd, Whitfield Conner and Parley Baer, Whitfield Conner and Virginia Greeg, Norman Corwin, Mary Jane Croft, D Day Program J Macvane & Lar, Dennis Day, Rosemary De Camp, John Dehner, Kenny Delmar, Jerry Devine, Howard Duff and Dick Joy, Richard Durham, Ruth Duskin Feldman, Sam Edwards, Sam Edwards and Janet Waldo, Alice Faye, George Fenneman, Morton Fine, Al Flanagan and Dick Mcdaniel, Paul Frees,

Fred Friendly, Alice Frost, Art Gilmore, Roberta Goodwin (Bob Bailey's Daughter), Gale Gordon, Virginia Gregg, Virginia Gregg and Whitfield Conner, Phil Harris, Clarence Hartzell, Dennis Horseford, John Houseman, Bill Idelson, Raymond Johnson, Jack Johnstone, Jim Jordan, Dick Joy, Roland Kibbee, Sheldon Leonard, Phil Leslie, Larry Lesueur, Elliot Lewis, John Macvane, Fletcher Markle, Fletcher Markle, Grace Matthews & Court Benson, Dick McDaniel and Al Flanagan, Dick McDaniels and Pete Smythe, Marvin Miller, Shirley Mitchell, Carlton E Morris, Morris Kaplan, Frank Nelson, E Jack Neuman, Nelson Olmstead, Vic Perrin, Michael Raffetto, William N Robson, Eric Sevareid, Anne Seymour, William L. Shirer, Penny Singleton, Pete Smythe Collegiate Band, Olan Soule, Berne Surrey, Glenhall Taylor, Irene Tedrow, Cliff Thorsness, Les Tremayne, Lurene Tuttle, Veola Vonn, Janet Waldo, Gertrude Warner, Peggy Webber, Anne Whitfield, and Dr. Paul Winchell.

The Radio Enthusiasts of Puget Sound (REPS) also has interview tapes of many Old-Time Radio personalities. Most of these interviews have been conducted in the 1990's. Personalities include:

John Archer, Harry Bartell, Frank Buxton, Chris Conrad (Son of William Conrad), William Conrad, William Conrad & George Walsh, Stewart Conway, Norman Corwin, Sam Edwards, Herb Ellis, Charlie Flynn, Jim French, Sandra Gould, Burl Ives, Peggy Jordan (Granddaughter of Jim & Marian Jordan), Merrill Mael, Jo Anna March, Les Tremayne, Janet Waldo, Anne Whitfield Phillips, Rhoda Williams, and Douglas Young.

The REPS web site is located at:
http://www.homestead.com/repsonline/index.html

Yesterday USA on the Internet is doing a series of live interviews with OTR personalities about one every two weeks. They start at approximately 8 PM (ET) on alternate Sundays and are about 1 hour in length. The interviews are conducted by John or Larry Gassman. So far they have done Harry Bartell, Herb Ellis, and Conrad Binyon. Listeners can call in questions.

You can find out more information on upcoming interviews by going to the YUSA Home page at http://www.yesterdayusa.com/

Q40. What MP3 player is best for OTR?

A40. MP3s can be played on most computers, memory (RAM)-based players, hard-drive players, and CD-ROM based players. Each player has advantages and disadvantages. A chart comparing various CD-ROM players for OTR playback suitability is at www.old-time.com

---

Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?

A41. The Library of Congress (LOC) does indeed store copies of many old-time radio shows. Any qualified person can access this material, or even get copies. There are, however, some restrictions on its use. Elizabeth McLeod (lizmcl@midcoast.com), who has done much research in the area, gives us this information:

LOC material may be listened to at no charge at the Library's Recorded Sound Reference Center by "qualified researchers" working on a project intended for public distribution -- from a full length book to an article for your local OTR newsletter. You cannot, however, make copies of the material due to the contractural and copyright restrictions which the Library is required by law to observe. (While the LOC preserves and houses the material, it doesn't own it.)

It is possible, though, to obtain copies of the material from the LOC by going thru a process which is neither fast nor inexpensive. But if you have the patience and are willing to spend the money for material you can't get any other way, here is what you do:

1. Locate the specific item in the LOC's SONIC database, accessible from the Recorded Sound Reference Center Homepage, http://lcweb.loc.gov/rr/record/

2. Make note of the LOC Call Number and description of the item you need.

3. Phone, fax, or email the Recorded Sound Reference Center with the items you are requesting -- contact information is available on site. The Reference Librarian who handles these things is Brian Cornell.

4. The Library staff will determine what legal permissions will be required in order to copy the items you want, and will contact you with the names and addresses of the people who must be approached in order to get these clearances. If the item is from the NBC Collection, you will need to clear rights with their Intellectual Property Department in New York. Additional clearances may be required if the program is under a separate copyright.

5. You must write to the people specified and ask permission to have a copy made. It's a good idea to specify why you need the copy -- and don't just say "because Joe Blow is my favorite radio comedian." If you don't have a professional-sounding reason, make one up.

6. Wait to hear back from the Legal Entities. If you've written to NBC Intellectual Property, you will get a letter back from them in about four weeks. Two copies of a legal contract will be enclosed, specifying what you may and may not do with the recording. Sign both copies, and send one of them back to NBC.

7. NBC will advise the LOC that it has granted permission, and in about three weeks you will get back a requisition form from the Library's Phonoduplication Lab. You'll need to check it over, sign where specified, and send one copy back to them with your check for the lab fee -- which starts at $86 per hour, not including the cost of tape stock. Then, fax the other copy of the form, and a photocopy of your check to the lab, and they'll begin processing your duplication request. (Yes, the fee is outrageous -- but there are worse places to spend your money than with the entity which has done more for the physical preservation of broadcasting history than any other organization in the United States....)

8. In about four weeks, FedEx will deliver your tape. Needless to say, you may not make any commercial use of the recording in whole or in part -- and you had to sign a contract to that effect in order to get access to it. Commercial permissions are a whole separate case.

Like I said, this is not for everyone -- but if you're working on a serious project, it can be a valuable resource for getting access to material that simply isn't available anywhere else and which is unlikely ever to be released on the commercial market.

Elizabeth

3493. R&R ratings?

Newsgroup: rec.radio.broadcasting
Date: 2001-10-27 03:11:16 UTC
From: sjsobol@NorthShoreTechnologies.net
Message-ID: <ttk9ekc6lpu5ff@corp.supernews.com>
Source record: 12954

Is it just me, or is rronline.com out of date?

Ok, the ratings page for Cleveland shows numbers for last year, but I'm surprised the ownership hasn't been updated. WKDD hasn't been owned by Barnstable in over a year. WZOO hasn't been owned by Ashtabula Broadcasting in over six months (at least). Both were bought by Clear Channel.

I've been interested in television history for many years. I would appreciate any information on finding current and old broadcasting tables. Websites, books, etc.

One question I've had, in relation to WPWR, why did it switch to channel 50 when the HSN affiliate signed on?

I suspect none of these stations have large staffs, further, it's also doubtful said stations are paying $00.05 per kilowatt hour either. Their electric bills may very well hurt, but in the real world, it's also doubtful they're paying rent on land most likely already owned by the station owners. You'ld be lucky to find one staffer available to run whatever recorded medium is provided or patch through the audio from a purchaser of time.

Let's also be honest, these are the equivalent of brokered time stations struggling to survive when many of their normal better paying customers have other more attractive markets, and the economy is apparently about to go south. Even if $50 per hour is the break even point, said station is also competing with WWCR among others for the same purchasers.

IMHO, it would make sense for Suseqehanna to trade their 93.3 facility with Z's KZMP-FM (101.7). The 93.3 location is such that it blankets a heavy concentration of the Hispanic audience. Meanwhile the Azel site would give Merge a better signal targeted to the far North suburbs.

- Speaking of Susquehanna...what's happened to the audio processing on KLIF? Driving home tonight, I was within site of their towers (on Crosby Road at Stemmons) and adjacent KTWO at 560 was actually louder than KLIF.

3500. SPECIAL EVENT ON DIGITAL BROADCASTING IN THE UNITED STATES

Newsgroup: rec.radio.broadcasting
Date: 2001-10-27 03:11:28 UTC
From: "David K. Bialik" <dkbialik@erols.com>
Message-ID: <ttk9f0r6pntc0c@corp.supernews.com>
Source record: 12961

For immediate release:

111TH AES CONVENTION COMMITTEE FEATURES
SPECIAL EVENT ON DIGITAL BROADCASTING IN THE UNITED STATES
"Digital Broadcasting is Changing the Way
Consumers View Television and Listen to the Radio"

NEW YORK, October 25, 2001-The AES 111th Convention, taking place November 30
- December 3, at the Jacob K. Javits Convention Center, is again featuring a
special event on digital broadcasting in the United States. The event will take place on Saturday, December 1, at 9:00 am.

With the advent of digital television, satellite delivered digital radio, and
in-band on-channel digital radio beginning broadcast, the audio community
will be expected to deliver the highest quality of audio utilizing all these
mediums. The Audio Engineering Society first began presenting the forum in
1988, to familiarize the audio engineer and interested parties with the latest technology being used in audio for digital broadcasting. The impact of
the various broadcasting services on the audio industry will also be presented.

"Digital broadcasting is changing the way consumers view television and listen to the radio," says David Bialik of DKB Broadcast Associates and 111th
special events chair. "Today's television viewers can experience DTV (digital
television) with high definition video and surround sound."

Europe and the rest of the world have adopted the Eureka Standard for Digital
Radio, while United States is going forward with In-Band On Channel (IBOC).
This allows for the delivery of both digital and analog signals to the listener. Additionally, the United States has licensed two companies for the
delivery of audio via satellite: XM, which was recently launched, and Sirius
Radio, slated to be launched early next year. These emerging technologies are

promising better reception.

In addtion to representatives from both XM and Sirius Radio, the elite group
of panelists who will discuss the best methods for delivering high quality
audio in broadcasting includes: Jerry Butler, PBS; Ralph Justus, CES; David
Layer, NAB; Jeffrey Riedmiller, Dolby Labs; Deepen Sinha, Ibiquity Digital,
which is in the process of implementing IBOC (in-band on channel) digital
service for AM and FM.

"At the last New York convention this event was standing room only," adds
Bialik. "We expect even more interest in these topics since this is the last
mile in many audio productions."

For more information on this and other events of the 111th Convention, please
visit www.aes.org.

KWTX-FM is moving on 97.3 from their current 97.5. In order to do
that, CC is going to downgrade and move KAJA 97.3 San Antonio from
97.3 as a full C to 96.9 as a C1. In order to do that, KHFI has to
vacate 96.7; hence it being reduced to 96.5 as a C2.

Satanist Jose' Scott
as a "croaking lizard", the evil lying serpent he is.

Jose' Scott [Hawkeye Joe] of KFJC FM appears in rec.music.reggae.
Why ?
Like an anniversary of sorts, for it was last year Oct. 2000,
that Jose' Scott was forced to return I's 1979 FCC license
certificate, after having conspired against I since I arrived
at the station - that he and other satanists changed KFJC FM
into 'The Devil's Radio'.

Ever hear of reggae selector Spliff Skankin ?
That's Dennis Edward Bishop [666]
Chief satanist Jose' Scott is his live-in room-mate.
No way Jose', your gay vibes and threats won't go here !
Never did, you are evil, satanist to boot !

http://www.angelfire.com/journal/mikaelenoch/kfjc

Jose' Scott who plays and promotes the most crude,
depraved, anti-christ artists, music, complete nonsense
and totally evil comments and attacks against all, at KFJC FM.
Like a Cheech of Cheech and Chong, now the silly Satanist Chicano PIG,
Jose' is always with the pigs, false accusations to get people in
trouble. Full lies, full conspiracies, Jose' was the one who stole
my license !
No way Jose' !

All the skulls and demonic tattoos that you have on your body
satanist Jose'
No way !

The police already know about your e-mail threats Jose'
so don't worry about meeting, assault and battery I'll
enjoy slapping on your ass !
Savage knows about your evil vibes too !

Interesting, my 1978-1979 FCC license was obtained while at
KSFH 90.5 FM in Mountain View, at Saint Francis High School. '

In KFJC's filthy bathroom there Jose' put another certificate
he stole, with Jose's characteristic handwriting and marks,
from a unregenerate grafitti vandalize culture, where his
are evident on a real Papal Pope Blessing from Rome.
Interesting is that the receipient of the gold painted poster
is none other than Ira Higgins, the same woman who lives next
to Saint Francis, and donated land to the High School.
Jose' Scott again the thief and vandal !
Who has the certificate Jose' ?
I know.
Which High School awaits, as the story is worked up big ?
Do you understand ?
No way Jose' the bathroom and your satanic (x) writings,
and theivery of InI's 1979 license is what is the issue here !
Satanists !
Satanic conspiracy !

Speaking of amusing web page of lies,
happy that I am such a nemesis to them,
for they to create lies, half-truths, distortions.
Where it becomes obvious that the crimes are that Babylon
and the faggots don't like what I say or write,
or even what I might dare to look upon.
The creator of the page,
an unregenerate anal feces excited guy, publicly professing
this, who amongst the other queers in a newsgroup: ba.broadcast.
A closed clique of queer conspiracies, and
directly part of the coup that took I out at KKUP FM.
The totally homosexual magazine "Out" did a piece on InI,
falsely accusing I of stalking of a lying tarot witch in San Jose,
a city I avoid anyways, as San Jose' does suck.
How fitting to Jose' Scott.
San Jose' and the Silicon Valley does suck !
You and Spliff Skankin !

I suppose you didn't realize that
gays conspired against John F. Kennedy.
Godless gays and satanists.

If you had actually read what you told someone else to read, you'd know that whether or not there are voice announcements on the weekly tests has nothing whatsoever to do with a state EAS plan. The tests are required by the FCC and are run in a format mandated by the FCC. There is no requirement in either state plans or Part 11 of the FCC Rules for voice announcements with the Required Weekly Test.

For Release: October 24, 2001
Contact: Corey Deitz, Jay Hamilton
(501) 219-2400 (KLEC-FM)
USA@homefrontradio.com

Troops To Hear Local Radio
(Little Rock) - Beginning this holiday season, American Troops overseas will be able to listen to local radio from their hometown thanks to a couple of Little Rock radio personalities. The Homefront Radio Network will launch on November 15th and stream continuously from Live365.com comprised of segments recorded from all over the country.

Radio shows across the United States will participate by recording special segments of their regular show, converting the audio to mp3 files and then emailing them to the network where the segments will be "strung" together, uploaded and then streamed through the Homefront Radio Network channel at Live365.com

The network is the idea of radio veteran Corey Deitz and is being produced by Deitz, his radio partner Jay Hamilton and their morning show producer Bill "14K" Morrow. "What we're doing is giving local stations everywhere an easy way to let their listeners say hello to and salute local service men and women. " Deitz said. "Stations will provide us with a new 10 minute segment every two weeks and our job will be to change out the audio and keep it fresh while maintaining a professional sound to the station, " adds Hamilton.

The Homefront Radio Network will launch November 15th and in addition to the local radio segments will also feature some Christmas music through December 31st. KLEC-FM, Little Rock, where "The Corey and Jay Show" originates each weekday morning, will act as the flagship station for the network.

"We think the network is going to be a real morale booster for our troops, " said Deitz. "Think of it as the USO of radio."

Radio shows or radio stations interested in joining the network can find all the details at:
http://www.homefrontradio.com

3515. Shenanigans abound along the Stateline

Newsgroup: rec.radio.broadcasting
Date: 2001-11-02 03:16:15 UTC
From: "King Daevid MacKenzie, UltimaJock!" <kingdaevid@elknet.net>
Message-ID: <tu43vvt0lcbm4e@corp.supernews.com>
Source record: 12976

Okeh guys, check this out. It ain't pretty. But it's what I've had to deal with over the last two months.

The already published facts are these: Paul Wozny, General Manager of WSLD in Whitewater, was busted on September 6th on charges of sexually assaulting three boys while as a Boy Scout leader. He was initially charged with nine offenses in Walworth County, but Dodge County is also investigating him on many more incidents. He's looking at a maximum sentence of 390 years in prison on the Walworth County charges alone.

Now to the stuff inside WSLD's licensee, WPW Broadcasting. Up until September 12th, I worked for WMCW in Harvard, Illinois, which is co-owned with WSLD. Wozny also served as a salesman for both WMCW and WSLD. I had been promised by WMCW PD Mike Bellamy (he of those moronic Old Style commercials on WGN's Cubs games) that, beginning September 17, I was to co-host WMCW's midday chat show with Chris Hammerberg, then a sportscaster and salesman with WSLD. In fact, the promises from Bellamy continued all the way through to September 11th. Sponsors had already been sold on the show, specifically around Chris and myself doing it.

Upon Wozny's bust, WPW CEO David Madison decides to fire Wozny and put himself in as GM of WSLD. Suddenly, he comes up with a new policy about how all WSLD employees -- air staff, salespeople, office workers -- are to sign a non-compete agreement barring them from working at another station within a 100 mile radius for 18 months. He claims that he doesn't want anyone bailing out on him and taking jobs in Chicago, Milwaukee or Madison now that he's lost his GM and WSLD is surely going to come in for a lot of bad publicity because of Wozny. Of course, the only person on the staff who has ever received a job offer in any of those markets is Hammerberg, who the Mustangs wanted to hire for their play-by-play. So the non-compete is a lot of BS designed to intimidate his staff, no more, no less.

Hammerberg refuses to sign. So what comes out on the 12th? That Madison has ordered the WMCW midday show cancelled and bars Hammerberg from working it. Of course, with no Hammerberg, the spots that have already been sold will have to be returned. And I'm out of a weekday gig.

But the real capper comes when Bellamy says that the blame for the show's scuttling is Hammerberg's! Not Wozny's for raping kids, not Madison's for pulling his tinhorn act, but Hammerberg's for not being available. Of course, Bellamy is too gutless to admit that Hammerberg isn't available because Madison dictates his inavailability. He simply blames Chris for it and leaves it at that.

Thus, after having my intelligence insulted by said gutless Bellamy, I toss him the key to WMCW and tell him where he can stick his piddly little weekend hours, too.

And what's happened since then? Well, Hammerberg's out, too. Chris' sin was to attend one of Wozny's initial court hearings. Of course, that's Chris' right as an American citizen to attend a court hearing. But Madison goes ape-stool and claims he's afraid that he (Madison) will be sued for one of his employees attending any of Wozny's trial. You figure it out.

So now Hammerberg's on the beach, too. But Madison is putting a bogus story around that Hammerberg quit, which Madison knows is a lie as Madison's the one ordering Chris' dismissal.

Such is life on the WPW plantation. Don't stand up for your rights or Massa Madison will crack the whip...

Source record: 12978

Couple things have contributed to the popularity of QuickTime. From the user's point of view it's free, stable and easy to download and install. From the broadcaster's point of view it's cheap as hell to license hundreds or thousands of simultaneous audio streams, and reasonable to maintain them.
RealAudio also has its patrons (and we support it) but it's MUCH more costly for the broadcaster because it requires a lot more server space, and costs a lot more per stream license.

Windows Media Player is losing steam nowadays because it's technically at a disadvantage compared with either QT or RA in stability. And it's not cheap.

Bob Smith, afternoons WXXI-AM 1370, Rochester NY

3522. Steppin' Out

Newsgroup: rec.radio.broadcasting
Date: 2001-11-04 17:51:49 UTC
From: Vgeller@aol.com
Message-ID: <tub01l3ckqa5da@corp.supernews.com>
Source record: 12982

Dear Airwaves:

I'm writing as I thought you might be interested in a current project I've involved with...
It's a 12 Step Meeting on the air called "Steppin' Out-the 12 Step Radio Show.' Basically it's just people telling their stories of addiction and recovery. The stories are the "star." It's true "reality radio." The stories are funny, tragic and powerful and it's a great show.

And it worked. Steppin' Out had a 1,200% increase in ratings 12+ in its first year, (0.3-3.2) airing Saturday nights at midnight on WEVD in NYC. When ABC/ ESPN took over the station, Steppin' Out was the only show they kept. I'm
strong arming a bunch of clients to take the show as it's a winner. Not only is it a riveting radio show, it's brought in NEW listeners to radio (the recovery community out there is HUGE), and of course bringing in new bodies to AM radio is Always a Good Thing.

The show is being offered to stations beginning in December, (right before New Years, "resolution time..." when the listeners are thinking seriously about quitting drinking, drugging, gambling, overeating etc.) Steppin' Out will come on c.d. in "stand alone" hours, so you can air one or two hours of the show, at anytime you'd like.

Several major stations and markets are already onboard. If you are interested, or know someone who might be, please pass along the word. You can hear Steppin' Out on the audio on the web site at www.powerfulradio.com or Denise McIntee can send you a c.d. of the show. I wanted to let you know about it.
Send smoke signals and stay in touch.
best always

3523. Jackson Armstrong signoff MUSIC - WKBW Buffalo

Newsgroup: rec.radio.broadcasting
Date: 2001-11-04 17:51:50 UTC
From: Mark Wozniak <bfowoz@acsu.buffalo.edu>
Message-ID: <tub01mfcgs3cdd@corp.supernews.com>
Source record: 12984

Does anyone know the name of the instrumental music that Jackson Armstrong used when he signed off from WKBW Buffalo in the early 1970s? I'm NOT talking about his patented verbal signoff, but the music bed that he used in the background. I don't know if he used it at any of his other stations. Sorry, I couldn't find a realaudio link for you to hear it.

Thanks for any insight!

talk1370@aol.com (Talk1370) wrote:

>Couple things have contributed to the popularity of QuickTime. From the user's
>point of view it's free, stable and easy to download and install.

Not from this user's POV.

I realize that whatever player I download, it's going to want to take over my system and be the ONLY player I will EVER use for ANY media. But the last installation of QuickTime I had did not offer the options necessary for me to maintain my computer the way I want it, and uninstallation left me with a mess that I never did get completely straightened out.

Furthermore, QuickTime video performance has always been FAR inferior to either Real or Windows Media. It's been a while since I encountered any audio-only uses for QuickTime, but my experience was that QT was also the poorest-performing of all availabe formats.

Now that I have a new PC, I have no intention of installing QuickTime and I don't feel that I'm missing anything worthwhile.

No, they are likely paying 5cents or LESS per KW hour....
Commercial and large industrial accounts are charged LESS than
residential.....MUCH less and get volume discount on bulk usage..
so the more they use, the less per KWHour they pay...
(I used to work for Gulf States Utilities and know something
about rates for ind/commm vs residential; WE had several large
customers paying LESS than 5cents per KWH....especially
since Residential were about 7cents...and now Entergy/GSU is
I think the 2nd lowest rate of investor owned utils in the country!)

paying
> rent on land most likely already owned by the station owners. You'ld be lucky

Low overhead and if they run any commercials at all, thats additional
revenue...

Chris

3533. Re: EQ on the Board??

Newsgroup: rec.radio.broadcasting

Usually there are mic processors in the control room, etc...
I like the Symetrix line myself (the 528 is a popular model..
especially the current E series)....that has some EQ, etc in it
but the main processing is done in the station processor..
either at the studio (in engineering before the STL gear) or
at the transmitter....the location depends on the STL path,
the types of STLs (analog or digital) and the characteristics
of the STL equipment...its generally accepted that the xmtr site
is the best place for the processor...but its easier to deal with
at the studio..
But I have heard remotes where no processor was used locally
on the mics and the station processor made up for it and
sounded pretty good...but a mic processor is always a better
addition! Can comp for room variance and mic differences...

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their

own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

You're right....after hearing a rumor of CC buying KLIF, I think
this may be a trade more than anything...CC gets 97.5 upgraded
and then trades a C rimshot to Sus for an AM signal...???
Hey stranger things have happened :)

> If they did buy 97.5 and move it into the D/FW, they would have to
> sell it or divest another property -- KZPS, KEGL, KDGE, KDMX, and KHKS.
> I wouldn't think they would dump any of their current facilities --

> they lose a Waco and Temple/Killeen signal and have weakened the
> facilities of one of their Austin holdings (1 C, 1 C1, 3 C2s).

Wonder if maybe a trade or something else may happen??? Who knows...
look for any possible movement with possible trades for AM signals.
(Randy Michaels loves AM.....but 18million for 1190??? cmon!!!!
They will NEVER get a good ROI on that)

Chris

Netmusic Countdown To Provide Content For Homefront Radio Network

(Little Rock) - The nationally syndicated "Netmusic Countdown", hosted by David Lawrence, is the latest affiliate to join the Homefront Radio Network. Lawrence has agreed to provide three hours of programming each week in three different formats for the Homefront Radio Network which will stream through the internet and provide hometown radio for America's Armed forces around the world.

"We're very excited that David has committed so much time and resources in helping us to provide quality programming for servicemen and women," said Corey Deitz, co-founder of the project. "David has been a big supporter of the idea since we first approached him."

The Homefront Radio Network is set to officially launch on November 15th and will include segments from a wide variety of affiliates who will earmark portions of their shows especially for rebroadcast on the network. The current roster of affiliates include:

"Gene & Carie In The Morning", KVTY-FM, Lewiston, ID

The New Z 92.5, Alliance/Canton, OH

"Mike & Boomer in the Morning", KHAZ (99 K-Z Country), Hays, KS

Carl Campos, Alice @ 96.5, Reno, Nevada

"Morning Stampede", Real Country WBJI, Blackduck/Bemidji, MN

Phil O'Brien, Two Double X, Paraparaumu, New Zealand

David Lawrence, "Net Music Countdown", Nationally Syndicated

"Kit and Liza", KMGI, Idaho Falls/Pocatello, ID

"Dave James and the 'J' Crew", 94.7 WMAS, Springfield, MA

"Kelly and Alpha Show", B-98.5 FM, Atlanta, GA

"Daevid MacKenzie's Technicolour Breakfast", The Edge 91.7, WSUW, Whitewater, WI

"The Corey and Jay Show", KLEC-FM (Lick 106 3.com), Little Rock, AR

Any English-speaking radio station who wishes to join the Homefront Radio Network can find out more information at:
http://www.homefrontradio.com

I've noticed that...it's kind of startling when they run a test with no intro...on one station here (WAWZ) they just cut in, I presume, at the moment of the test with the screeching and then back to our program like nothing happened...for a few seconds you wonder if World War III is nigh...yikes.

Aparently they've ditched Truth Radio and are playing a bizarre mix of music. In the time I've been listening this morning I heard "Love Is A Wonderful Thing" by Michael Bolton, "Call Me" by Blondie, "Temptation Eyes" by the Grass Roots, "This Magic Moment" by Jay and the Americans, and a country song I am not familiar with. (In that order) They're also running promos saying how affordable their advertising rates are inbetween every 8th or 9th song... Does anyone know if they've been sold or something?

I have heard Cheap Channel may be buying KLIF from Susquehanna...
if thats the case, how much you want to bet it will be a trade
so Susquehanna takes the 97.5 move in and CC gets 570 in the trade
so both are happy and legal! :)

> - Speaking of Susquehanna...what's happened to the audio processing on
> KLIF? Driving home tonight, I was within site of their towers (on Crosby
> Road at Stemmons) and adjacent KTWO at 560 was actually louder than KLIF.

Possibly a lightning hit may have damaged their processor (I
cannot recall if its at the xmtr site or not...)...

I worked for the United Broadcasting Network a few years back, and most of our host broadcast out of their homes. We generally set them up with a RE-20 microphone with a Symetrix 528e processor, a Mackie 1202 console and a Comrex ISDN unit. I have since grown to love the Telos Zephyr unit for ISDN. We did the call screening at master control and used IRQ for telling the host the info, but there are alot of better ways to do it. If you are going to be doing the screening at you location, I would use the Gentner 516 phone system and software. I use it now at a radio station that I engineer for and have installed it at several radio and television stations that use call screeners on live shows.

to G.T.TYSON & Steve Sobol re WABC site:
from the FCC public data base, coordinates are 40:52:50 74:04:12.
using www.topozone,com, enter these coord's, choose scale 1:25000, you will find the Topographic map is marked "radio tower WABC", yes, in Lodi, NJ, in a open area between route 80 (highway?), route 46, and railroad tracks. If you can't get this map, Email me and I could Email the map segment as a jpg.

[Moderator's note: That'd be Interstate 80 and U.S. Highway 46. 80 runs south of Lodi, and 46 runs north of Lodi, IIRC.]

With respect to the article, the issue of Governor's Island has been discussed. I guess Alpine was chosen because of the immediacy involved in getting a signal back on the air after permanently vacating ESB in the move to 1WTC.

Governor's Island is located at 40°41' N by 74°01' W.
ESB is 40°44'N x44' W.
Alpine is 40°57' N by 73°55' W.
1WTC was the easiest to remember at 40°42 N by 74° W.

Just by the coordinates, it appears as though that will be the way to go by way of the least amount of interference to adjacent and co-channel stations.

Then, again, you run into the environmental concerns.
This antenna, if built, would not only have the NY Seven and Co., but their new digital signals as well. The digital channels appear to have overall more ERP than the analog counterparts. The radiation factor is additive.

If they rebuild the WTC after building Governor's Aerial, will the radiation to the upper floors in the new, or existing, buildings, be of acceptable levels from G.I.? Remember, that when the New Yorkers were at ESB the first time, the radiation levels were acceptable then to the observation deck, but now they aren't. The politics have changed. When the UHF'ers turned on 1WTC, radiation into 2WTC upper floors were originally unacceptable at full power.

Will the New Yorkers continue their arrogance of not having redundant sites in the event of a problem?

What if, after they do all this, the reflections off of the nearby Manhattan Buildings is unacceptable? Channel 7 had the reflection problem in New Jersey with 2WTC.

A lower than 2,000 foot level for that antenna may not be worth it.

Remember, not everyone can be at the same level unless they have some sort of candelabra design. If they did that, would there be a reaction that would directionalize the signals to interfere with the co-channels.

In another, smaller market, these questions wouldn't be much to answer. Some would be taken care of just by the building of the antenna. In the area as densely populated as this, a small problem becomes a costly one to investigate.

We haven't even scratched the surface of real estate value - ask the AM'ers "way down in the swamps of 'Jersey." (Bruce Springsteen - Roselita)

Did I mention Hurricane Gloria in 1985?

OBITS
KRUX DJ Lucky Lawrence [Larry Wright] died Oct. 7. Wright worked at KRUX from 1956 to 1968. Wright has conducted Sunday morning Bible study at Abundant Life Church in Phoenix for many years. This message was posted at the church website:

On Sunday, October 7, 2001, Larry Wright died of a heart attack as he prepared to do what God had gifted him to do so many times before - "Preach the Word".... after calling 911, they had to restrain him from heading to the pulpit - sounds just like Larry! He always said he wouldn't stop talking about Jesus Christ until he was physically and verbally unable.

Philippians 1:21 says: "For to me, to live is Christ, and to die is gain". Larry is enjoying the grand prize; pain free and with a new body. As much as we will miss him, praise God for the many brothers and sisters in Christ who are going to experience eternal life with our Lord and Savior because of his faithful and bold witness. Now absent, Larry wants to "know of us standing firm in one spirit, with one mind striving together for the faith of the gospel".

I found "Music of Your Life" on Yahoo broadcast about a year ago. I like it very much and used to always have it on while I was around the computer (it's not on any radio station I can get.)

Now Yahoo has taken it away with an advertising scheme that makes it impossible to listen to it. They have a way of embedding ads in the data stream that take over your computer, stops whatever you're doing in whatever program you're running, starts up Explorer then displays a page with the ad in it. They do that 4 or 5 times every 15 minutes during the Music of Your Life programming, which makes it impossible to have it on while you're doing any work.

Is anyone else bothered by this or am I the only listener? Is there any other way to get Music of Your Life without Yahoo?

-- Bill

Source record: 12919

I was listening to WJR 760 Detroit, from 20 miles east of Columbus,
and hearing WRFD 880 Columbus (religious format) underneath.

Hmm. It's got no splatter, no distortion, it's just squarely on 760.

So I fire up the Kiwa MW loop, tune it sharply to 760 so there's no
chance of hearing 880, null out WJR 760 and there is WRFD squarely
on top, on 760.

So it's not an image, it's there. The receiver is a Drake R8B which
is completely shielded; the Kiwa loop just verifies it with vast
preselection.

I called WRFD and they assured me that (1) I'm probably hearing
a harmonic because AM radio is subject to harmonics; and (2) they check
their frequency very very carefully every day and they're on 880
not 760.

But thank you for calling, no you can't talk to an engineer, goodbye.

So I don't know what to do. How do you get self-righteous people
on the right frequency?

I was talking the operations manager, she said. They don't need
an engineer.

William Cooper Killed in SWAT Raid
A Sierra Times Special Report 11/06/2001

From his Website:

"...God bless my family. I love my wife & children more than life itself.
Everything I do is for the future of all my children. They may not understand why I have sacrificed so much, why I am so dedicated to this work; but someday they will. I want them to know
they are the most important People in my life, and how very, very much I love them..." - William
Cooper

EAGAR, AZ - William Cooper has been killed and an Apache County sheriff's deputy wounded in a
shootout, authorities said.
William Milton Cooper, 58, of Eager, had hosted a talk show broadcast on the Worldwide Christian
Radio out of Nashville, which receives it via phone from his home in St. Johns.

The deputy, whose name was being withheld by authorities, was shot twice in the head while trying
to arrest Cooper, a state Department of Public Safety spokesman said today. Cooper was killed by
another officer.
Several deputies were attempting to arrest Cooper, who was armed with a handgun, said Officer
Steve Volden, a spokesman for the DPS, which was investigating the shooting.
He said details of the shooting would be released later today.

The deputy was in critical condition at a Phoenix hospital early today, Volden said.
Cooper was one of the most widely known Shortwave radio broadcast, "the Hour of the Time", heard
worldwide and on the Internet. "William Cooper may be one of America's greatest heroes and this
story may be the biggest story in the history of the world." said Mills Crenshaw, KTALK, Salt Lake
City.

William Cooper was reared in an Air Force family. As a child he lived in many different countries,
graduating from Yamato High School in Japan. Since he has traveled through or lived in many different foreign countries Mr.

Cooper has a world view much different than most Americans.

William served with the Strategic Air Command, United States Air Force. He held a secret clearance
working on B-52 bombers, KC-135 refueling aircraft, and Minuteman missiles. William received his
Honorable Discharge from the United States Air Force in 1965.

William joined the United States Navy fulfilling a dream previously frustrated by chronic motion
sickness. He served aboard the submarine USS Tiru (SS-416), USS Tombigbee (AOG-11), Naval Support
Activity Danang RVN, Naval Security and Intelligence Camp Carter RVN, Danang Harbor Patrol RVN,
Dong Ha River Security Group RVN, USS Charles Berry (DE-1035), Headquarters Commander in Chief
Pacific Fleet, USS Oriskany (CVA-34).

Cooper was a member of the Office of Naval Security and Intelligence serving as a Harbor and River
Patrol Boat Captain at Danang and the Dong Ha River Security Group, Cua Viet, Republic of Vietnam.
William Cooper was awarded several medals for his leadership and heroism during combat including
two with "V" for Valor.

He served on the Intelligence Briefing Team for the Commander In Chief of the Pacific Fleet.
William was the Petty Officer of the Watch and designated KL-47 SPECAT operator in the CINCPACFLT
Command Center at Makalapa Hawaii.
There he held a Top Secret, Q, SI, security clearance.
William Cooper achieved the rank of First Class Petty Officer, QM1, E-6 after only 8 years of
Naval service, a difficult task in any branch of the United States military. William Cooper
received an Honorable Discharge from the United States Navy on December 11, 1975.
William attended Long Beach City College where he picked up an Associate of Science Degree in
Photography. He founded the Absolute Image Studio and Gallery of Fine Art Photography in Long
Beach, California.
William held the position of Executive Director of Adelphi Business College, Pacific Coast
Technical Institute, and National Technical College. Mr.
Cooper was the National Marketing Coordinator for National Education and Software.
He produced several documentaries covering subjects such as the Kennedy assassination and secret
black projects that have built flying disk shaped craft. William is an internationally acclaimed
radio personality broadcasting the Hour Of The Time on WBCQ worldwide short-wave 7.415 MHz from 10
PM until 11 PM Eastern Standard Time (0300 to 0400 UTC) Monday through Thursday nights.

William Cooper is the author of Behold A Pale Horse. The book has become the best selling underground book of all time. It is read and promoted by word of mouth by People of all races,
religions, and nationalities.

Mr. Cooper is a world class lecturer, one of the few other than superstars, monarchs, and Popes
who have appeared at Wembly in London. William Cooper has lectured for 10 years in every State.

William Cooper, Trustee, has founded for Harvest Trust, the CAJI News Service, VERITAS national
full size newspaper, The Intelligence Service, Harvest Publications, and has helped over 700 low
power FM affiliate stations get equipped and on the air... including the station he managed as
Trustee for the Independence Foundation Trust, 101.1 FM Eagar, Arizona, broadcasting to 7,000
people.

Under his leadership Harvest Trust ventured into the publishing trade. The first book under the
Harvest Trust imprint was Oklahoma City: Day One by Michele Marie Moore... the definitive classic
on the Oklahoma City bombing of the Alfred P. Murrah Federal Building on April 19, 1995.
Shortly after the bombing of the Alfred P. Murrah federal building Rush Limbaugh read a White
House memo on the air during his broadcast which named William Cooper, "...the most dangerous
radio host in America". Mr. Cooper considers William Clinton's pronouncement the greatest compliment that he has ever received.

William Cooper's FBI file, promulgated by the investigation required by his security clearances
while in military service, was one of those unlawfully in possession of the White House in what
has become known as, "Filegate". Shortly after this discovery President Clinton ordered all federal agencies to begin investigation, persecution, and prosecution of Mr. Cooper to shut him
up.

After years of filing FOIA requests and researching the IRS William Cooper brought suit against
the IRS in Federal District Court in Phoenix Arizona to force the IRS to produce proof of jurisdiction and delegation of authority which the IRS was unable to do. To short circuit Mr.
Cooper's attempt to reveal the true nature of the criminal IRS, and to carry out the orders of the
White House, the agency lied to a Grand Jury, not allowing William Cooper to testify, and secured
indictments against Mr. Cooper and his wife Annie. This ploy successfully stopped Mr. Cooper from
continuing his suit against the criminal IRS for fear of being arrested.

In 1998 VERITAS and Harvest Publications was sold to Hallmark Creative Corporation along with the
copyright and all rights to all written material produced or ever to be produced by William Cooper
including Behold A Pale Horse and Oklahoma City: Day one. Hallmark Creative Corporation has contracted to insure this material is always available to the public.

In 1998 copyrights and all rights to all audio and video material produced or ever to be produced
by William Cooper was sold to Excel Studios Corporation including the Hour Of The Time broadcast.
Excel Studios has contracted to insure this material is always available to the public.

In March of 1999, Cooper William Sent his family out of the United States for their security. He
lived and worked alone with his two dogs, one rooster, and one chicken.

For those that do not know who he is, He wrote a book called BEHOLD A PALE HORSE, some say he was
a agent provactuer (sp?) and that he was with the CIA, well now he's dead.

3560. Help: Should a UK-bought DAB-radio work abroad?

Newsgroup: rec.radio.broadcasting
Date: 2001-11-11 20:22:42 UTC
From: nn <lurex.zdne@nomail.com>
Message-ID: <tutngint11421f@corp.supernews.com>
Source record: 12921
Cross-posted to: uk.radio.amateur,uk.rec.audio,rec.radio.broadcasting,rec.radio.amateur.digital.misc,alt.radio.uk

What are the difference between digital
broadcasts (DAB) in different countries?

And consequently: Should a radio from country A
work fine in country B?

Example:

VideoLogic sells an 'UK' model DRX-601E/ES
for _a lot_ cheaper than their 'European'
model DRX-602ES.

The UK version of the radio band III (whatever that is)
and in many countries DAB broadcasts seem to
come in band III.

So, if the country to which you'd take the UK
radio broadcasts in band III, shouldn't this UK
model work fine there, too? (As for example
in Finland and Sweden -- but NOT in France,
where they have this other frequency area.)

-Sure, some accented characters might not
show in the lcd-display of the UK-version set,
but the sound should be ok, as long as both
countries use this band III, no??

Or what do you think? Are there other things to
consider before mail-ordering a DAB-radio from
another country?

Please, do comment if you know anything!
I am sorry if this get to a newsgroup that does
not deal solely in these matters, but it seems
very difficult to get any response let alone solid
information anywhere.

Thanks for your time!

> methods or in a digital system? Or, for example, when a local show has been
> pre-recorded or voice-tracked in advance?

I've heard announcements when they re-run talk shows from earlier in the
week ("Best of...", etc.) "This show is a replay. Please do not call".

We're not talking about the seven-second delay, are we?

>
>
> At one time you'd frequently hear the disclaimer, particularly on TV, now you

> recorded

Key words are "in which time is of special significance...create the impression
that it is occurring simultaneously with the broadcast". In other words,
if there is any possibility that the taped program might be confused with
a live one, the announcement must be given.

The aforementioned talk show repeats, are one example. Any others?

The only way I know of is to use a box from a company whos name excapes me right now. It was 3 mic channels and would mute the monitors when you turned a channel on. I don't knwo fo anyway of modifying the 1402 to mute montior out when you bring a channel up. I have 1642's in 3 of my Prod rooms. The users in their have learned the hard way to turn a knob down before they bring their mic up.

That is water, not atmosphere. The propagation over water is permanent, the atmosphere is a changeable situation.

I don't know what radiation hazards would realistically exist on a roof with no (permanent source of) radiation.

> Can the buildings
> physically support a mast tall enough to get the antenna high enough to not

I think a Japanese firm bought the RCA/GE building at 30 Rock in 1986. I don't know the specifics. There is no additional rent if you own the building, you also own the roof. The same thinking may be on the lease, also.

> That said, they really *should* have learned a lesson from 1993.

But "they" haven't and won't. "They" is constantly changing. If a new GM thinks he can increase (or lessen the loss of) the bottom line without the additional expenditure,

he/she will do it and take their chances. The little known and used "Public Interest" variable is hoped that nobody notices.

> not, try again.

What does "tests" mean when you are talking about millions of dollars in revenue in playing with a wind dependent signal. No, for TV Marti (which is, unfortunately, a joke anyway) ok. But a balloon is no solution for a market as serious as New York. Experiment with ham equipment, not with people's livelihoods. Tiger is a much more professional organization and they do that for a living.

Sutro is a self supporter and on top of a mountain. It is an eye sore to a lot of San Franciscans. I doubt anyone would accept a 2000' Sutro for New York, even if they put it in the garbage dump of Staten Island's Fish Kills.

Better get his book 'Behold a Pale Horse' from Amazon or Barnes & Noble whilst they still have them.
The used book sellers are asking upwards of $100 for them. Barnes & Noble has it for $20.00 while
Amazon is asking $25.00.

There is a yearly publication that you can get listing all US and Canadian stations, both AM and FM. I'll be back at the office on Wednesday and try to remember to get the name of the publisher for you.

Best,
JL

|
|The aforementioned talk show repeats, are one example. Any others?

I know this is a radio group, but... What about the tape-delayed morning TV "news" shows - Today, etc. I'm not sure about Mountain and Pacific, but Central time zone gets the show with an hour delay. Certainly when there is very major breaking news, they go live, but most of the time, the news is an hour or more old to parts of the country with no disclaimer.

There is an add module made by another company that
will mute the spkrs, etc so you can use the Mackie consoles
as on air backups, etc....
I cannot recall who it is.....but just ask Mackie! They will
have the info...or Harris Broadcast...
You really cannot modify the console itself without tearing
it apart...it is NOT EASY at all...and even as a broadcast engineer
myself, I would not try it...too much trouble..

> problem. (because they use the same channels as NYC)

I think the Philly stations are most quoted because FM has co-channel: 100.3 and 101.1 are just two of the stations I recall off hand, although 99.5 is a Philly rim shots from Delaware. They can't go too far south either because there is new co-channel in Atlantic City. This situation NEVER entered the minds of the FCC. New York is the focal/reference point of their allocation strategies.

The problem is compounded by atmospheric conditions. It was never unusual for a person in New Jersey to spin their antenna toward Philly for blacked out NY football games. If you were near the Raritan River Bridge, you could null out WCBS-FM in favor of it's co-channel in Philly - all the while seeing NYC.

> I do think the FCC could be convinced to grant a waiver of directional-antenna

I am not opposed to directionals, I just don't see a need for the NY7 when there are so many other simpler options available.

> >Then, again, you run into the environmental concerns.

That assumes there will be no higher buildings built in NYC. I wouldn't be willing to take that bet. Just out of spite, somebody will build higher.

> (the WTC was roughly 1700' *to the antennas*, somewhat lower to any areas
> occupied by people)

And we are talking about the height of the radiating power of the TV stations.

>
> Of course, a Staten Island site would be better from this standpoint, being

> surprisingly rare. I've worked for or known people who work for an
> awful lot of stations. Besides WCBS, I can only think of *one* other station
> that has a redundant site.

WCBS-2 did not like the signal or position on the ESB antenna before the move to 1WTC. They were looking forward to the move in favor of a better signal and position on the new antenna. I think it's ironic that as bad as they wanted to move off of the ESB, it is the ESB that, in the end, saved them.

> (I'm sure there are more, but not that
> many more) Especially in New York, with the high real estate prices,
> maintaining a redundant transmission site would be fantastically expensive.

Real estate prices have very little to do with this situation.
Look, most stations have equipment hanging around the station for spares or just old, an auxiliary is not intended for 24/7 use. But it is used for emergency or maintenance purposes.
When you are talking about Disney, CBS, and GE, they have buildings they could put a spare antenna on top of at any time. Maybe not El Primo (a little Spanish lingo, there) reception, but who cares, it's an auxiliary operation.
When 1WTC was bombed the first time, the warning was ignored. This is not over and it won't be. If it isn't some crazed mental nut, it is Mother Nature. I remember the 1965 blackout. This is not the first time the stations were off the air. And it won't be the last. It is New York and this is America.

> On the other hand, the stations have learned this fall just how expensive it
> is to *not* have a redundant site!

Ditto. But, it is a lesson they just don't pay attention to. Never have, never will.

> Of course, the easy fix is to not remove anything from Alpine/ESB after the
> new permanent site is complete.

Sure, that is only one of any number of examples. But my money is on vacating Alpine altogether. It didn't work, but it was worth a try, and it was an emergency.

> >What if, after they do all this, the reflections off of the nearby Manhattan

> >in New Jersey with 2WTC.
>
> That's black magic<grin>. I wonder if a temporary balloon-based or
> helicopter-based antenna for some late-night tests would be in order.

I imagine you are joking. Only an airhead would seriously suggest a balloon based antenna system - like TV Marti - in NEW YORK????. Can you imagine if the wind changes during a Giants football game?

> Seeing that city, I doubt there's *any* site you could put a transmitter that
> would work well everywhere.

The reflection I mention was evident with a line (horizontal sync) aimed right down the center of the screen of the TV. It was a condition that was not there prior to the move from ESB.
But, you're correct. I don't think one exists. Especially with the conditions which exist in the New York Market between buildings and mountains, and water, oh my.

> >A lower than 2,000 foot level for that antenna may not be worth it.

But, how much can you cram onto one antenna without having wind to contend with?

> Agreed.

Upon further review, you would be right that, for the purposes of radiation, whether the site is a main operation or aux. I guess there would be no approval difference.
How high would the TV antenna have to be over the roof for acceptable radiation hazard on the roof for the high power operation?

Have any legitimate experiments been conducted as you are suggesting?
Remember, conditions change when you start modulating the signal and adding additional signals and not just one or two. We are talking at least 30 high power TV signals.

> > Sutro is a self supporter and on top of a mountain. It is an eye sore to a lot of San

> cable"...

Yeah, we have 2 city grade ABC TV network signals (WTSP-10 St. Pete and WWSB-40 Sa-ra-so-ta) that are only 20 miles apart. We have no city grade CBS TV network signal. If you want CBS, you have to go cable.
This condition has existed since December 1994.
It is also part of the larger trend to the move to pay tv. The proof of that would be that WWSB should have had the option of taking the CBS, but WINK-TV is the Ft. Myers CBS and they had first choice over the Sa-ra-so-ta station. The choice made by WINK-TV meant that WWSB did not have to make the decision they didn't want to make. I understand the condition is temporary though because WTSP has a CP to move to Riverview for WTSP-DT.

From what I believe, France use 'L' band (1.5 GHz) for DAB, whereas the rest of Europe use Band III. L band is going to be
available in the UK in some years from now (maybe 5?). I believe the European model (DRX-602ES) covers both L Band & Band
III, whereas the UK version just does Band III, which explains why it's cheaper.

A UK model should work in countries where they are using Band III for DAB & I'd doubt that you'd have any problems with
character recognition on the display, as like RDS the spec incorporates the whole ASCII character set.

> Good question. I would wild-guess 100-150'.

I call that "wagging" (wild a-- guessing) I would "wag" less than that. Say, around 50' from
the lowest portion of the lowest antenna over the roof.

> It would depend on a variety
> of factors including the construction of the roof (lots of metal would tend

> covered generally do have some downward radiation.)

When the FCC changed their HAAT measurements from feet to meters, they also changed the
contours to reflect the change.

> > Have any legitimate experiments been conducted as you are suggesting?

I was never sure if the interaction was caused by the ERP or the structure of the antenna
sitting on the candelabra design.

> The balloon tests would be simply to prove whether a given
> radiation pattern on a given channel at a given location would provide an
> acceptable signal strength and an acceptable lack of reflections. It would

> location.

Now, it sounds as if you are talking about directional qualities rather than signal interference. A reflection off the back of a side mounted antenna grid would be totally different from the reflection off of a nearby water tower.

> The signals themselves do not actually affect each other. (provided the

New York has all these problems to deal with and Real Estate values and esthetics don't help
the situation.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

Contact: Corey Deitz
Email: coreydeitz@homefrontradio.com

Homefront Radio Network Officially Launches; Armed Forces To Benefit

(Little Rock) - The Homefront Radio Network officially launched November 15th with the goal of serving America's Armed Forces with a taste of local radio no matter where they are stationed around the world. The network is comprised of various radio shows from around the country who have joined together to provide specially earmarked portions of their shows for the network.

From Brunswick, Maine to Milwaukee, Wisconsin, local radio personalities have volunteered to provide audio content to the Homefront Radio Network.

"What we're doing is giving America's Service men and women a taste of home no matter where they are, " says Jay Hamilton, co-founder of the network. "We can update our programming quickly and the Internet lets us broadcast it globally, " he adds.

The network can keep the audio content fresh because the immediacy of the Internet allows affiliate stations to simply record a portion of their broadcast and then email it as an mp3 file. The segments are then integrated into it's 24/7 audio signal which originates through the streaming services of Live365.com .

Besides segments of local radio from around the United States, the Homefront Radio Network will also be providing a selection of holiday music for military listeners beginning Thanksgiving and running through the end of the year.
"We're still looking for more radio affiliates to join up and help out, " adds co-founder Corey Deitz. "We need their help to make this project as strong as it can be."

Radio stations can find out more information at www.homefrontradio.com

Listeners can hear The Homefront Radio Network by going to the website and clicking the listen link.

3600. Way Late Obit - John Spofford

Newsgroup: rec.radio.broadcasting
Date: 2001-11-18 18:36:41 UTC
From: Paul Van House <pvanhouse@houston.rr.com>
Message-ID: <tvfvtpgdcl3gfe@corp.supernews.com>
Source record: 12861

My wife and I visited Corpus Christi, Tx a couple of weekends ago and as usual tried to look up my old boss, John Spofford - Former O/M at KIOU-FM back in the 80's and early 90's.
I was told by the former owner of the station that John had passed away three (yikes!) years ago.
John was perhaps best known in Corpus as the morning engineer for the late Bill Traphagen, and his voice was well used in agency advertising and for voice-tracking corporate productions.
I don't know too much about his days before KIOU, but I know that he once worked at WLWD (now WDTN I Think) TV in Dayton, Ohio back in the 50's.
John guided my transformation from jock/programmer to News Director and was a great teacher. I'm just terribly sorry I missed his funeral.

3601. Trade DX 300 for ?

Newsgroup: rec.radio.broadcasting
Date: 2001-11-18 18:36:43 UTC
From: ben hogland <benhogland@hotmail.com>
Message-ID: <tvfvtr46sh6e00@corp.supernews.com>
Source record: 12862

I've got a very good and working Realistic DX-300 short-wave for trade. What I'm looking for is a very good GE Superadio *Original*. Not looking for a II or III as I already have those..

Picture is a must.. I'll send you mine if you send me yours.. Must work as designed as this DX-300 does indeed work as designed.. This DX-300 is in near new condition.. All lights and LEDs are in working order and is clean. NO problems are known with this radio..

Already have two DX 300s and looking to get a superadio *original* to add to my collection.

The DX-300 that I offer is in great condition and want a superadio in the same condition..

I, also, may consider one of them digital AM radios advertised by Art Bell and sold by C. Crane in exchange for this.

Thanks,

Ben

3602. NIDA Trainer B/C transceiver - HELP

Newsgroup: rec.radio.broadcasting

I have a Nida Trainer transceiver Model 205, a Nida Multimter Model 211, and a Nida Amplifier Model 202. The seem to be from a broadcasting school and seem to be designed for both AM and FM broadcast bands.

The 205 doesn't seem to work and I was curious if there is any place that KNOWS about these units and might be able to get them operational again.

Thanks!

This, from
http://www.arcam.co.uk/support/digitalradio/index.cfm#Is%20there

regards

Is there a single standard?
For once the answer is yes. There is a common European standard called
Eureka 147 that defines Digital Radio. This tailor made system has been
adopted by most of Europe, Canada, South Korea, South Africa and Australia.
The only country trying to develop an alternative standard is the USA. (Not
invented here syndrome) All receivers work on all services and early
adopters are not taking any chances by buying now.

Most countries will be using Band III (around 250MHz) like the UK but
others, France for instance, will only be using "L-Band" (around
1500MHz).

>VideoLogic sells a 'UK' model DRX-601E/ES
>for _a lot_ cheaper than their 'European'
>model DRX-602ES.
The DRX-602ES can receive both Band III and L Band as well as
supporting foreign character sets for the display.

In short, if the country you are visiting uses Band III, the UK
version will work as far as reception is concerned. As you say, some
foreign characters might be displayed incorrectly.

I suppose L band might be used here in a few years when the 1500MHz
band is cleared of the current users. Rather too early to buy a dual
band DAB receiver just for that eventuality I would opine!

Sounds like a criminal that was shot by duly authorized police officers trying to do their legal jobs. He hid behind the bible and psychopath ideas of UFO's and government agents around every corner. I hope you show as much concern for the officer this criminal shot. But you really don't care if the police get killed by your people. All you people wanna do is make money off of ignorant, uniformed sheep.

The metal roof may shield downward radiation through the roof but it would cause radiation reflection from the roof to the person walking on the roof. The metal roof acts like a ground
plane.

> the height of the building (to keep coverage area

The interaction would be evident on a candelabra design not on a multi level design. Each tend

to give the others directional qualities similar to those qualities exhibited from which a side
mounted placement uses the structure from which it is side mounted.

> (provided the
> transmitters contain proper filters to prevent crossmodulation) Excessive

> receiving a particularly intense signal.

The New Yorkers are not known for particularly strong signals. There are no Class C's allocated
for the region. But the numbers of stations do give cause. There is still the overloading of
front ends. Before 9/11, if you were in downtown Manhattan, in a car, the ESB stations would be
blocked out or severely degraded in favor of the 1WTC stations and the inverse situation
occurred as you neared ESB. But, this was not a cause of radiation hazard as much as it was
just bad radio design in conjunction with the canyon effect in New York.

Even with Governor's Island argument, you couldn't convince me the canyon effect coupled with
reflections off of nearby buildings would not have an effect outside of the City.

I saw it with Channel 7 after the move to 1WTC and the effect 2WTC had with reflection.
Overall, as much as I have always liked ESB, I was still impressed with the better signal from
1WTC even with the reflection condition.

(This newsgroup is the closest I can find to this topic.)

The above error statement comes up when I try to connect to a RAM site, but this is not the true problem. I'm hoping someone here might be able to help steer me in the right direction with this problem. There don't seem to be any help topics at real.com that address this problem.

When I click on the RAM site, I get this error screen and message (see the screen capture below):

http://www.angelfire.com/tx/BrotherDave/images/raerror.gif

However, when I copy and paste the RAM address directly into the Real player location field, it always plays just fine.

If anyone has any ideas on how to solve this problem, please post here and also send me an email. Thanks!

I remain ever vigilant and a little bit hongry,
X

> What was "Truth Radio"?

A satellite-delivered network of fundamentalist-religious and lunatic fringe-conservative talk programming (you know, extremely-anti-government, survivalist, tax resisting, weapons-hoarding, black helicopter fearing, that sort of thing).

www.truthradio.com if you want to see the web site. You'll get the idea pretty quick.

The FCC lists one Richard Smith as the station owner. Don't know if he owned the station when it was Truth or is the new owner.

Greetings,

Pete <nobody@nowhere.net> wrote:
> From what I believe, France use 'L' band (1.5 GHz) for DAB, whereas the
> rest of Europe use Band III. ...
Well, there are other countries that also use L-band. Germany uses both
band III and L-band.

If you do it 'by the book' (that is, the original proposals) band III is
meant to be used for longer distances (like a nation-wide SFN or a
'regional' network operator); and L-band for 'local' muxes. (As L-band
doesn't really carry that far as band III-signals).

That was the basic idea; but -as every country has its own frequency-
plan- this can be implemented differently if the local need merrits its.

Anycase, if (say) the DAB-operators off London would have used L-band, a
lot of the listeners who are now on the fringe of the network coverage
area and use directional antenna's whouldn't have been able to receive
them.

> ... L band is going to be
> available in the UK in some years from now (maybe 5?). I believe the
> European model (DRX-602ES) covers both L Band & Band
> III, whereas the UK version just does Band III, which explains why it's
> cheaper.
I don't know the real technical differences between the the two models
and I don't think this is yet the case in these models but -in time-
having a single model that covers the complete worldwide market for DAB
will mean that a dual-band model should be cheaper then a single-band
model. (just as is the case for 900Mhz/1800Mhz GSM phones).

A single model DAB-receiver will probably be just a dual-model receiver
with (somewhere) an extra diode that disables reception on either band
(or even just a hidden software-feature in the firmware of the box).
They are usually just an excuse to ask some extra euros for the
dual-band model.

Cheerio! Kr. Bonne.

> invented here syndrome)

That isn't the reason the USA isn't adopting Eureka.

The basic reason that the USA isn't adopting Eureka is that all stations would then be equal. The choice of the In Band On Channel (dream) is so that big stations can still be big stations and stations with limited coverage will still have limited coverage; it's a way for the have's to preserve their advantage.

Red herrings such as allocation problems were raised, but I understand they are no more than red herrings. They didn't prevent Canada from adopting L-band Eureka, and almost all of the population of Canada lives within 100 miles of the US border.

Yes, there is a set of continuous reports and forecasts running at all
times. Each one gets updated periodically through the day and plugged
into a timed sequencer. The old Bingamtom (NY) office had audio loop
tape cartridges, just like the commercial radio stations use for ads
and announcements. I haven't been in the new facility to see what they
are using.

NOAA broadcasts continuous weather repoerts, usualyl with a synthesized
voice. The weather alerts are only proceeded with an alert tone, that
unmutes equipped receivers and sounds a loud alarm. Once activated,
these receivers need to be reset for the next alert.

You can do better. Get an XM radio and tune it to Channel 4 .... 40s
music 24 hours a day, no commercials. Or Channel 5 if you'd rather have
50s music.

I can't promise that there will never be commercials on these channels,
but I believe that is the present plan.

XM radios are now available at places like Circuit City and Best Buys.

It's by Broadcast Tools, and it goes for $300 or so, almost as much as the mixer. Uses the insert jacks to give you mic on/off switches and also gives a monitor mute feed-through and a tally closure.

Harris, BSW, everybody carries it.

Does anyone have any experience of increasing the MFJ-259B analyzer's coverage down to 1 MHz? I have asked MFJ, but have not been able to answer the question.

It looks as if a 100pF across the variable tuning cap will do the trick, but will this significantly affect the accuracy?

Thanks,

Ian, G4JQT.

"when there are no "alerts"? Does it continually broadcast weather information?"

Exactly, and this was the original purpose of the system years before any alerting feature was added. (Incidentally, NOAA Weather Radio was originally intended for marine users, both pleasure boats and commercial vessels; that's why it is in a band near the VHF marine band, so that it could be received on marine radios. The system was expanded to cover other areas after Radio Shack introduced its first Weatheradio in the early 1970s.)

When I was a kid back in the mid-sixties, every Sunday morning I'd wake up to my mom playing the radio in the kitchen and hear some old-sounding guy who called himself Hodden Hodge, Hodgen Hodge, or something similar. Looking back on it, I'd guess it was some syndicated program that was piped into our local 500-watt a.m. radio station, because I never heard him any other time.

I know I didn't dream this guy up, but nobody can remember anything about this old coot. Just what was this guy...all I remember is that old voice and the accompanying cornball music. Thanks to anyone who can shed light on this little mystery.

IIRC the ASCII set is only 7-bit and omits many characters used in Europe.

Slainte,

Jim

3634. New Page: Birth of NSS VLF 1918 - Poulsen Arc Transmitters

Newsgroup: rec.radio.broadcasting
Date: 2001-11-20 00:32:07 UTC
From: Jim Hawkins <jim@jphawkins.com>
Message-ID: <tvj947bvm5nsc4@corp.supernews.com>
Source record: 12896

Radio History and Technology lovers,

For those interested in VLF, radio technology history and/or military communications,
this new site shows 33 very sharp photos of the construction of NSS VLF facility in Annapolis, MD.

Features, Poulsen 350-500KW Arc transmitters. The construction of the towers, "Wave Changers", the Helix, big loading coils, feed lines. The pictures were scanned from a collection of large negatives I won on eBay. Also, I have written some explanation of the Poulsen arc using some web sites and old radio books.

Other links are provided.

URL: http://www.jphawkins.com/nss_birth1.html

These pages are connected (and link back) to my main NSS pages built around color photos I took when the station closed down a few years ago.

Enjoy,
Jim Hawkins - WA2WHV

Yes. It's typically a combination of local conditions and forecasts,
and repeats (with occasional updates) every few minutes. Places near
the ocean or large bodies of water will typically have marine
advisories and include things like wave period and amplitude at
various bouys.

Cheers,
Tom

From 'John P Vassel':

>>> If interested, please email me for details.
>>
>> Enough with the spam.
>>
>
>Wow, and I thought it just disappeared. It took almost a month for that
>post to show up.....yowsa.

First off, I only received the post in the moderator's mailbox today. I'll keep a close eye out for future posts from you. I did get WAY behind, but nowhere naer a month (more like a week). Usenet posts go through the Usenet server nearest you, to John Levine's machine (the one that hosts airwaves.com), before finally landing on my mail server, so there are a few different potential points of failure. If there is a problem, I promise I will get it fixed as soon as possible.

Now... about the on-topicness or spammishness of this post.

When the late Mr. Pfeiffer was moderating, his policy was to let as much through as possible. Flames, and obvious off-topic crap (like the cellular post I accidentally let through a few minutes ago) were verboten. Almost anything radio-related was posted, though.

I have tried to stay true to that policy, thus my posting of the article you quoted.

BUT... In the years since rec.radio.broadcasting was created, attitudes about what is and is not appropriate may have changed.

With that in mind, a few months ago I called for a discussion on what you, the newsgroup regulars, think is appropriate -- after all, this is YOUR forum. I'll post whatever you guys think is appropriate, and if there is a consensus that a certain type of post isn't appropriate, it won't show up here.

Problem is, only a couple people replied!

So once again, I ask the readers of this newsgroup to voice their opinions on whether the following types of posts are OK.

Please post replies publically to rec.radio.broadcasting or e-mail replies to articles@airwaves.com. All replies on this topic will be posted here.

We're voting on the apopriateness of the following types of posts...

1. Playlists
2. Commercial postings advertising radio-related services or programming
3. Postings advertising Internet radio

Posts with attachments will continue to be rejected, as will posts made in HTML.

Are there any other categories you think we should vote on?

Thanks in advance for participating.

Dear Friends & Future Millionaires:
AS SEEN ON NATIONAL TV:
Making over half a million dollars every 4 to 5 months
from your home for an investment of only $25 U.S.
Dollars expense one time
THANKS TO THE COMPUTER AGE AND THE INTERNET !
==========
BE A MILLIONAIRE LIKE OTHERS WITHIN A YEAR!!!
Before you say ''Bull'', please read the following.
This is the letter you have been hearing about on the
news lately. Due to the popularity of this letter on
the Internet, a national weekly news program recently
devoted an entire show to the investigation of this
program described below, to see if it really can make
people money. The show also investigated whether or
not the program was legal. Their findings proved once
and for all that there are ''absolutely NO Laws
prohibiting the participation in the program. DUE To
THE RECENT INCREASE OF POPULARITY & RESPECT THIS
PROGRAM HAS ATTAINED, IT IS
CURRENTLY WORKING BETTER THAN EVER.
Get your family and friends involved too!
==========
PRINT THIS NOW FOR YOUR FUTURE REFERENCE
$$
If you would like to make at least $500,000 every 6 to
12 months easily and comfortably, please read the
following...THEN READ IT AGAIN and AGAIN!!!
$$
FOLLOW THE SIMPLE INSTRUCTIONS BELOW AND YOUR
FINANCIAL DREAMS WILL COME TRUE, GUARANTEED!
INSTRUCTIONS:
=====Order all 5 reports shown on the list below =====
For each report, send $5 CASH, THE NAME & NUMBER OF
THE REPORT YOU ARE ORDERING and YOUR E-MAIL ADDRESS to
the person whose name appears ON THAT LIST next to the
report. MAKE SURE YOUR RETURN ADDRESS IS ON YOUR
ENVELOPE TOP LEFT CORNER in case of any mail problems.
=== When you place your order, make sure you order
each of the 5 reports.
You will need all 5 reports so that you can save them
on your computer and resell them.
Within a few days you will receive, via
e-mail, each of the 5 reports from these 5 different

individuals. Save them on your computer so they will be accessible for you to send to the 1,000's of people who will order them from you. Also make a floppy of these reports and keep it on your desk in case something happens to your computer. IMPORTANT - DO NOT alter the names of the people who are listed next to each report, or their sequence on the list, in any way other than what is instructed below in steps "1 through 6" or you will loose out on a majority of your profits. Once you understand the way this works, you will also see how it does not work if you change it. Remember, this method has been tested, and if you alter it, it will NOT work!!!

1.... After you have ordered all 5 reports, take this advertisement and REMOVE the name & address of the person in REPORT # 5. This person has made it through the cycle and is no doubt counting their fortune.

2.... Move the name & address in REPORT # 4 down TO REPORT # 5.

3.... Move the name & address in REPORT # 3 down TO REPORT # 4.

4.... Move the name & address in REPORT # 2 down TO REPORT # 3.

5.... Move the name & address in REPORT # 1 down TO REPORT # 2.

6.... Insert YOUR name & address in the REPORT # 1 Position. PLEASE MAKE SURE you copy every name & address ACCURATELY!

==========

To assist you with marketing your business on the internet, the 5 reports you purchase will provide you with invaluable marketing information which includes how to send bulk e-mails legally, where to find thousands of free classified ads and much more.

There are 2 Primary methods to get this venture going:

METHOD # 1: BY SENDING BULK E-MAIL LEGALLY

==========

Let's say that you decide to start small, just to see how it goes, and we will assume You and those involved send out only 5,000 e-mails each. Let's also assume that the mailing receives only a 0.2% response (the response could be much better but lets just say it is only 0.2%. Also many people will send out hundreds of thousands of e-mails instead of only 5,000 each).

Continuing with this example, you send out only 5,000 e-mails. With a 0.2% response, that is only 10 orders for report # 1. Those 10 people responded by sending out 5,000 e-mail each for a total of 50,000. Out of those 50,000 e-mails only 0.2% responded with orders. That's 100 people responded and ordered Report # 2.

Those 100 people mail out 5,000 e-mails each for a total of 500,000 e-mails. The 0.2% response to that is 1000 orders for Report # 3. Those 1000 people send out 5,000 e-mails each for a total of 5 million e-mails sent out. The 0.2% response to that is 10,000 orders for Report # 4. Those 10,000 people send out 5,000 e-mails each for a total of 50,000,000 (50 million) e-mails. The 0.2% response to that is 100,000 orders for Report # 5 THAT'S 100,000 ORDERS TIMES $5 EACH=$500,000.00 (half a million). Your total income in this example is: 1..... $50 + 2..... $500 + 3..... $5,000 + 4.... $50,000 + 5..... $500,000 ..... Grand Total=$555,550.00 NUMBERS DO NOT LIE. GET A PENCIL & PAPER AND FIGURE OUT THE WORST POSSIBLE RESPONSE AND NO MATTER HOW YOU CALCULATE IT, YOU WILL STILL MAKE A LOT OF MONEY!

==========

REMEMBER FRIEND, THIS IS ASSUMING ONLY 10 PEOPLE ORDERING OUT OF 5,000 YOU MAILED TO.

==========

METHOD # 2 : BY PLACING FREE ADS ON THE INTERNET

==========

Advertising on the net is very very inexpensive and there are hundreds of FREE places to advertise. Placing a lot of free ads on the Internet will easily get a larger response. We strongly suggest you start with Method # 1 and add METHOD # 2 as you go along. For every $5 you receive, all you must do is e-mail them the Report they ordered. That's it. Always provide same day service on all orders. This will guarantee that the e-mail they send out, with your name and address on it, will be prompt because they can not advertise until they receive the report.

========== AVAILABLE REPORTS ==========

PLACE YOUR ORDER FOR THESE REPORTS NOW :

==========

REPORT # 1: "The Insider's Guide to Advertising for Free on the Net"
Order Report #1 from:

H Merrill
PO Box 3098
Worcester, MA 01613
USA

REPORT # 2: "The Insider's Guide to Sending Bulk e-mail on the Net"
Order Report # 2 from:

J. Winer
501 Stafford St. #9

Cherry Valley, MA 01611

REPORT # 3: "Secret to Multilevel Marketing on the Net"
Order Report # 3 from :

Nancy Resident
147 Crescent Street
Shrewsbury, MA 01545
USA

REPORT # 4: "How to Become a Millionaire Utilizing MLM
& the Net"
Order Report # 4 from:

Comp Conn
Donald Cargill
276 Turnpike Rd.
Westborough, MA 01581
USA

REPORT #5: "How to Send Out 0ne Million e-mails for Free"
Order Report # 5 from:

Nancy Hahn
107 SE 13th St.
Oak Island, NC 28465

USA

$$$$$$$$$ YOUR SUCCESS GUIDELINES $$$$$$$$$$
Follow these guidelines to guarantee your success:
=== If you do not receive at least 10 orders for
Report #1 within 2 weeks, continue sending e-mails
until you do.
=== After you have received 10 orders, 2 to 3 weeks
after that you should receive 100 orders or more for
REPORT # 2. If you did not, continue advertising or
sending e-mails until you do.
=== Once you have received 100 or more orders for
Report # 2, YOU CAN RELAX, because the system is
already working for you, and the cash will continue to
roll in! THIS IS IMPORTANT TO REMEMBER:
Every time your name is moved down on the list, you
are placed in front of a Different report.
You can KEEP TRACK of your PROGRESS by watching which
report people are ordering from you. IF YOU WANT TO
GENERATE MORE INCOME SEND ANOTHER BATCH OF E-MAILS AND
START THE WHOLE PROCESS AGAIN. There is NO LIMIT to
the income you can generate from this business!!!
============ MORE TESTIMONIALS ================
"I had received this program before. I deleted it,

but later I wondered if I should have given it a try. Of course, I had no idea who to contact to get another copy, so I had to wait until I was e-mailed again by someone else.....11 months passed then it luckily came again..... I did not delete this one! I made more than $490,000 on my first try and all the money came within 22 weeks."
Susan De Suza, New York, N.Y.
==========
"It really is a great opportunity to make relatively easy money with little cost to you. I followed the simple instructions carefully and within 10 days the money started to come in. My first month I made $20,560.00 and by the end of third month my total cash count was $362,840.00. Life is beautiful, Thanx to the internet."
Fred Dellaca, Westport, New Zealand
==========
To be removed from list, type "Remove" in subject line

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

Votes from a humble but avid lurker:

Numbers 1 & 2 seem appropriate, #3 not.

While I'm generally against spam and don't do it myself, I believe most people's aversion to ng spam is because so much of it is unrelated to their own interests. Given that this group is moderated, not only doesn't off-topic product stay away, but multiple (daily, hourly) ads from the same vendor have the potential to be weeded out as well. And what better place to find the perfect radio-related deal than within a specific forum.

I personally won't sell my services via spam, and don't patronize companies who do, I think related on-topic advertisements can have a positive place in a newsgroup.

Similarly, I think playlists can be beneficial to the community as well. It can be nice to see what other folks are sending out over the airwaves. My guess is there aren't so many postings of playlists that they overwhelm the number of other posts. I could be wrong. :)

I only believe internet radio information (#3) ought not to be posted in this newsgroup simply because it has it's own, albeit under the .alt designation (alt.internet.radio).

So, there's one person's two-cents' worth. Hopefully I'll not be one of only two people to reply this time! <chuckle>

:David

Out of morbid curiosity, I did an ebay search. The top bidding price as of 11:00am EST this morning (Monday) was $10.95. My local Borders has two in stock, (in the woo-woo section) and the cover price is as advertised on Amazon.

Ok Steve,

I get your message.

This would be my contribution as to what doesn't need to be sent through to the board. Especially since I get at least five to ten of these each day.

Moderation: " The last refuge for the unimaginative"

While I agree that may hold true for elected officials, with a properly moderated board, spam, such as this would not normally be accepted by the contributors.

On the bright side, at least they know how to use a spell checker.

>on whether the following types of posts are OK.

>Please post replies publically to rec.radio.broadcasting or e-mail replies
>to articles@airwaves.com. All replies on this topic will be posted here.

>We're voting on the apropriateness of the following types of posts...

>1. Playlists

Generally boring to the engineering oriented crowd, aka me. Local
arbitron should be the controlling factor in any event.

>2. Commercial postings advertising radio-related services or programming

Add equipment here. Tolerable if they have real content, altho links
are acceptable.

>3. Postings advertising Internet radio

Hold them to not more than 20 lines or I'll go to sleep on my keyboard
reading them. Actually, I hit the right arrow key past them while still
looking at the subject line.

4. Posts on things technical, rules and regs discussions, bugs/qc in
equipment, management styles, should all be fodder for discussions.

5. Bashing the party in power should be done in language you could use
in church. Name calling doesn't become us, although I'll have to admit
its sometimes hard to find a suitable name for a bloody shovel. :)

>Posts with attachments will continue to be rejected, as will posts made in
>HTML.

The attachment contents s/b be assessed, and if applicable to fixing a
piece of gear or demonstrating a problem/solution thats broadcasting
related (and not pure advertising) probably should be passed on a case
by case basis of course. And NO html.

>Are there any other categories you think we should vote on?

See above for my $0.02 worth. Now you have 3 opinions :)

Cheers, Gene

Yes it does continuosly broadcast weather information. In my local area
a test of the alerting system is broadcast on Wednesday afternoons which
causes receivers equipted with alert functions to turn on. Along the
gulf coast we are susceptible to VHF skip conditions that on occasion
allow us to hear stations as far away as Houston to the west and Tampa
to the east. til we meet again. . . . . Tony D. KC4YBE

I noticed a few exchanges recently on scheduling software and I thought I'd put my two cents worth in. Many industry-specific multi-function packages are usually expensive and can have weak scheduling components. If scheduling is your principle concern or if you have other business programs that you want to keep, a low-cost package that's dedicated to scheduling may be better suited to your needs. There's some low-cost software that I know people in many types of organizations use and really like. It's called ResSched. You can download a full-function trial version. It's apparently excellent on networks too and very easy to install, learn and use. The company that produces it is Madrigal Soft Tools and their web site is http://www.madrigalsoft.com They have some pretty good testimonials from people whose organizations and personal names appear so the credibility is there. Good luck.

You are correct, times are tough if you rely on something that does not have mass and takes up space.

As P.T. Barnum says ... well, you know the drill.

Besides, radionut.cc is also available.

Anybody can have a .com, but a .cc would send the point of being a "radionut" home, probably cheaper. (no pun intended ... maybe)

3669. Car radio licenses in UK

Newsgroup: rec.radio.broadcasting
Date: 2001-11-24 00:35:22 UTC
From: area5pr@yahoo.com
Message-ID: <tvtqqahko96ade@corp.supernews.com>
Source record: 12830

If I remember correctly they used to have separate licenses for TV and radios in the UK. I guess a license was needed for a car radio as well.

I remember handling a car radio in the 70's and reading a sticker on the radio which said something to the effect that a one-off license fee had been paid by the car manufacturer.

What was the situation with car radios back then and who paid for the license? Was there such an arrangement for an one-off fee?

This is important for a research paper.

Thanks.

I don't want to trash the spirit of what WCBN is doing...so the playlists are OK, especially if it's limited to the top 10 in each music area. Their silly "kill feeble formats" bit serves no purpose. That's an easy edit.

I don't mind a plug for an internet radio station but I'd draw the line on anything more than listen to me at www.whatever.

Now, back to television!

3671. Where's the president on WAMC?

Where's the president on WAMC?

By Douglas Cunningham
The Times Herald-Record
dcunningham@th-record.com

RED ALERT TO THE PUBLIC RADIO LOBBY: Please join our protest later today. Call Albany office for directions to Mulberry Street from the Thruway. Middletown's in Orange County, west of Newburgh somewhere. Redneck country.

So last week, over several days, I made the mistake, while driving home, of attempting to find some news on the local WAMC public radio station. Alas, my desire for news coincided - or maybe it didn't coincide - with the WAMC fund drive. Anyway, I was out of luck in hearing the half-hour financial program that normally airs at 6:30 p.m. Maybe it aired later, but later I wasn't in the car.

Then, Thursday evening, I did it again. I'm fiddling with the dial to find President Bush's speech, said to be at 8 that night.

Alas, no speech. Some program called "51 %." It airs once a week. Here's the description from the WAMC Web site: "Over half the people in the world are women. What women do affects us all. Now, there's a radio program that takes a serious and intelligent look on society's impact on women and their impact on society."

Yes, indeed, more than half of all people are women. As we say in print: Stop the presses!

Really, I am sure this is a valuable, insightful, program, heard by dozens - OK, maybe many dozens - of people across the Northeast.

This program, however, is not the president. Who I wanted to hear, as he briefed us on homeland security and civil defense. In our time of war. With 5,000 or so people dead in New York City, and in a Pennsylvania field, and at the Pentagon.

At that point Thursday night - having missed the speech, and having to turn to the Web to find it - I was pretty steamed. I found the full text, and it was a pretty good speech. A little long, but a great ending.

So, I called WAMC. WAMC/Northeast Public Radio is a huge outfit. Its 10 stations cover parts of New York, Massachusetts, Connecticut, Vermont, New Jersey, New Hampshire and Pennsylvania. Including my little corner north of Milford. Alan Chartock is executive director.

Chartock returned my call. We had an eminently pleasant chat. I wasn't really satisfied, but he did offer some additional perspective.

To wit: "It might have been a different story had NPR offered us what we call an anchored feed. They did not ... we would have then taken a different look at it.''

National Public Radio did offer a live feed, but without any other material - the anchor's intro, the analysis afterward, and so on. So someone would have had to introduce the speech, and close it out. Surely someone could have done that. But, forgetting about our friends at WAMC in Albany for a moment, what were the people at NPR thinking? Chartock also said that the president "did not request of us to take it." And he noted that most of the networks had not broadcast it, either. For instance, NBC carried "Friends" and CBS broadcast "Survivor: Africa." I think this says more about the emptiness and venality of those two networks than it does about the "news value" of Bush's speech, but so be it. Friday morning, Chartock said he had no second thoughts about the decision. He said that Bush's press secretary had advised beforehand that no new ground would be broken.
"We certainly covered it completely in all of our news broadcasts, much more completely than anything else on the radio," he said.
Let's set aside the new ground/no new ground question. I grasp the issue, but I don't think it's central. Not to put too fine a point on it, but here's what I'm thinking: If you can't hear the president of the United States on public radio, what good is public radio?

Here's a concept: Privatize the whole thing. PBS, NPR, the whole bit. Barney, all the other little critters. Skip this "underwriting" sham; call the commercials what they are, which is commercials, and call it a day. The people who want to hear "51 %" can still give all the money they want to keep it on the air.

Doug Cunningham is business editor of The Times Herald-Record; his commentary appears on Mondays. He can be reached at dcunningham@th-record.com, or at 845-346-3202.

Reply a few days later from WAMC :

November 20, 2001

Cunningham column was dumb, unfair

By Alan Chartok

As a professor, columnist, radio guy and TV commentator, I really have no right to blow off steam about Douglas Cunningham's cheap-shot column, "Where's the president on WAMC?" in The Times Herald-Record of Nov. 12. I truly believe in freedom of speech, even when it's freedom of dumb speech. Don't get me wrong - I love The Times Herald-Record. I truly believe it to be a great newspaper with a long and honorable history of investigative journalism. But when a guy with an edge in his voice calls me up and admits that he was calling because he was "personally inconvenienced," I get concerned. When he tells me that he was in the car and since he could not hear a George W. Bush speech he is coming after us, I smell abuse of journalistic power. In fact, I think that he's letting his great newspaper

down.
Unfortunately, it falls to me as the CEO of a great public radio station to call attention to the weakness of his cause. I say "unfortunately" because I do not know that I'm falling for it and thus giving him attention he does not deserve. I respect the fact that he was on deadline and needed a column, but how about being fair? He has the right to say what he wants, of course, but no amount of talking to him could make him grasp the facts.
What's more, though he's apparently a listener, he is not a supporter of the station. That just goes to show that he's listening on someone else's dime. Obviously, he doesn't get the idea of how public radio survives.
Everyone knows that we wouldn't be here with public support. Our recent fund drive beat all records around the country and raised a half million dollars in a little over three days. Apparently, a lot of people besides Mr. Cheapskate understand what an old-fashioned barn raising is all about.
WAMC is one of the few places where you can now hear the president's weekly address to the nation. We do more to cover the news than anyone else on radio. We've literally run out of wall space for our news department's awards. Mr. Cunningham seems to want to forget all of that and doesn't even think that balanced journalism demands that he mention it. After all, why confuse the issue by being balanced?
It doesn't stop there. Public radio doesn't mean that we are owned by the government - we are not. We make the same editorial decisions that the good news managers of this paper make every day. You can be sure that all our newscasts covered reports of the president's speech with the appropriate excerpts.
When the president asks for time on WAMC, he gets it. This time the White House did not ask, and even said that no new ground would be broken by the speech. So, almost everyone in network TV, including NBC and CBS television, did not take the opportunity. What's more, our national network, NPR, didn't even provide an anchored feed of the speech.
Nor do I understand the sophomoric beginning of his column, "RED ALERT TO THE PUBLIC RADIO LOBBY," which goes on to say, among other things, that Middletown is in ". red- neck country." I think that many readers of this newspaper will not find that funny.
Finally, Cunningham's virulent attack on 51%, our show about women in contemporary society, is an attack on women everywhere. This award-winning show is clearly not Cunningham's cup of tea. Fine. He's entitled to his opinion, but would you want to bet money that the guy has ever heard of it?
Perhaps Cunningham ought to spend more time at the business desk, his announced job, and less time pushing his right-wing credentials at the expense of a noble and always fragile enterprise like public radio.
I end as I began. The man has every right to shoot off his mouth, only he really ought to know what he's talking about.
Alan Chartock is CEO of WAMC/Northeast Public Radio.

Define arm and leg.

www.bsiusa.com has the $499 Simian (replaces WaveStation)

www.drs2006.com has the DRS2006 for under $100 and works well.

Arrakis Systems offers a free program at
http://www.arrakis-systems.com/Radio_Broadcast_Division/digilinkFree.shtml

That should get you started.

So the guy made one decision, based on the best information he
had at the time, that you disagree with. And based on that one
decision, you want to scrap the entire public broadcasting world.
You need to get a life!!!

Steve Fleckenstein <spfleck@citlink.net> quoted from a story by Douglas Cunningham:

'Chartock also said that the president "did not request of us to take it." And he noted that most of the networks had not broadcast it, either.

'For instance, NBC carried "Friends" and CBS broadcast "Survivor: Africa."'

That brings up an interesting point -- this was *not* an address to the nation in the usual sense, but a speech to a specific group in Atlanta. Many such speeches don't even get on C-SPAN (at least not live), and most don't make it on the broadcast networks. Could it be that the reason that two of the big three TV networks didn't carry the speech was that the White House simply didn't *ask* them to carry it?

I'm curious. Was WAMC the only source possible for the President's
speech? What was WGY doing at the time? Or WROW? I find it hard to
believe that the Internet was the only alternative for the speech in a
market the size of Albany.

If you're going to complain that WAMC didn't carry it, then you need
to add all the music stations that played boy bands and girl bands
while the President was speaking.

One of the articles written about bill shortly after his demise included the remark... "Cooper was a son-of-a-bitch, but he was OUR son-of-a-bitch!" I met Bill very early on with an associate named Stan Bearington... at that time he seemed both realistic and stable. My advise is, if you see yourself truly as one of "God's children" please DO NOT draw-down on young police officers just trying to do the job they think is right.... hell, at least if you are going to get nailed, let'em do you in jail... then you're a martyr

Hello once again everyone,

Well winter is just about here isn't it? Snow in Texas and almost freezing temperatures here in Southern California. We have 3 new shows in our archives right now.
Rock-it shows #377, #378 and #379. With a special show in Show #378 as it is Lane Quigley's 100th show of the Memory Lane show here on Rock-it Radio! Here are the details and playlists of our 3 latest shows. Remember all of our 10 latest shows are archived in our Archives page at:
http://www.palmsradio.com/rockittext.htm

==========

Cool Bobby B and the Doo Wop Stop in Rock-it Show #377.

It is time for more Doo Wop and the Doo Wop stop in Rock-it show #377. Here is the playlist.

1. No No No -- The Chanters
2. Speedoo -- The Cadillacs
3. Baby Blue -- The Echoes
4. What a Night -- Little Roy Tyson
5. Gee -- The Crows
6. Ding Dong -- The Packards
7. Should I cry -- The Concords
8. Don't leave me -- The Magnificents
9. Get a Job -- The Silhouettes
10. I'm so Happy -- The Ducanes
11. Trickle, Trickle -- The Videos
12. There goes my love -- The Fantastics
13. Night Owl -- Tony Allen
14. Lost Love -- The Superiors
15. Still of the Night -- The 5 Satins
16. Niki Hokey -- The Cleftones
17. Lonely Way -- The Skyliners
18. Walking along -- The Jades
19. Everybody's Somebody's fool -- The Heartbeats
20. Honey Honey -- Lewis Lymon & Teenchords
21. The Wind -- The Diablos
22. String around my heart -- The Cleftones
23. Teenager in Love -- Dion & Belmonts
24. Foolish me -- The Harptones
25. Looking for an Echo -- Kenny Vance
26. Image of a girl -- Otis Williams
27. Your way -- The Heartbeats

Rock-it Radio is proud to be the featured Internet station to provide to you Cool Bobby B and the Doo Wop Stop show.
If you would like to e mail Cool Bobby B you can at:
Coolbobbyb@doowopstop.com

==========

Special! Special! Special! Special! Special! Special!

Hey Gang, Lane Quigley has produced his 100th Memory Lane Show for us here at Rock-it Radio...and wait until you hear THIS one !!!! It is in our archives under show #378!

Lane has dug into his bag of interviews that he has conducted over the years, and shares some wonderful comments from some of his favorite artists -- together with his usual assortment of wonderful sounds from the 50's and early 60's. Plus, Lane encores a segment from his famous program with Hunter Hancock, and answers a listener request to reprise an exclusive medley that hasn't been broadcast since Lane played it on the air in San Diego in 1995.

Don't forget, too, that you can get your souvenir copy of the Memory Lane Songlist showing all of the great records that Lane played in his first 99 shows! Just drop Lane an e-mail at: MemoryLaneShow@aol.com to request it. Make sure you let Lane know if you prefer to receive it in MS-Word or Word Perfect format.

Hang on to your hats -- here's what's in store for us in the 100th Anniversary Edition of THE MEMORY LANE SHOW:

Say Mama-Gene Vincent

You've slightly mangled the call letters. The station you're thinking of now has the call letters WARW and is known as "Classic Rock 94.7". They're in the Washington, DC suburb of Rockville, MD, and in 1987 they had the call letters WLTT and were an adult contemporary station known as "W-Lite 94.7". Dick Cerri had a special weekend program, "Music Americana", which featured folk music.

You might try contacting Dick through the World Folk Music Association to see if he might have a tape of Mary Chapin Carpenter's appearance.

http://www.wfma.net/ANNCASE.htm
(you can find contact info elsewhere on the site)

http://www.musicamericana.com/
(page says it "will be returning soon")

No this is not the case.
The Licence fee covers television users at home, however, radio is free to air and aways has been.
Us 'Brits' pay quite a small sum for the funding of 5 national services, 48 local services (radio) 6 national televison services and 38 regional ones.
World Service is funded by The Foreign Office of the government and is not included. Most of the output is now going digital on national DAB multiplexes and you can read all about it at the BBC website.
A bargian at only ?105.00 per annum.
www.bbc.co.uk
enjoy!
Andy

3692. Crusin' Album Series

Newsgroup: rec.radio.broadcasting
Date: 2001-12-08 21:02:32 UTC
From: David Berchtold <berch@erie.net>
Message-ID: <u14vv8estra6d7@corp.supernews.com>
Source record: 12753

Dear Friends,

I have been searching high and low for a Crusin' album or cd.

Years ago, I purchased a Crusin' Years LP. It was part of a series of albums (Crusin' 1967, Crusin' 1968, etc.) The thing I loved most about this album is that it not only contained the music I loved, but it also had classic radio clips, commercials, etc.

I have looked in several music stores and a number of online sources to no avail. Any information on who or what store I can contact to get these Albums or CDs would be greatly appreciated.

Thanks,
David B. Berchtold

Dear Mr. Sobol,

In response to your request for my opinions on what should be posted in =
your newsgroups. I must tell you that I absolutely love LOVE radio and =
radio related news. Whatever is posted in your newsgroups... as long as =
it's connected with the radio profession, I find interest in the subject =
matter. =20

For the longest time, I have read the articles posted in =
alt.radio.broadcasting and rec.radio.broadcasting with great passion for =
all of what is radio. Here in my hometown of Erie, PA, NextMedia Radio =
has done a wonderful thing. They put six radio stations in a former =
department store building. They brought new life for deteriorating and =
almost forgotten downtown. It is a single fantastic thrill to go down =
there and be inches away from "Radio People." Watching them at their =
work has had me sitting for hours in front of their display windows. I =
am so inspired from what I see that I feel myself walking three inches =
off the ground! It is really great to see what "Radio People" are doing =
in and for my hometown. Because of the excitement at the Boston Store, =
other businesses are opening up in close proximity. It is truly =
wonderful to see Erie reborn. Mr. Richard Rambaldo and the people at =
NextMedia are heroes to me!

Getting back to the main topic at hand, if it's radio related, it's cool =
by me. I do have problems with flaming and other personal attacks. =
Radio people are truly heroes in my eyes and they have been heroes for =
many years. To personally attack a hero is akin to swearing and there =
is just no place for that stuff in any newsgroup.

Thank You for letting me express my thoughts!

Sincerely,

David B. Berchtold

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

I am starting a Voicover business and need some suggestions I have plenty hardware/software/performance,and professional technical experience I need to get started BUT...

I need to make a decision on a 2 channel balanced card which actually works with Win2k/XP...I have read TOO MANY issues with Driver problems using 2k,XP!!! (I'll look at the multicahnnel cards as well)

Bottom line- the card needs to have great RF/EMI rejection

It's getting harder every day to choose!!! Please rate, or share experience:

1.DAL Card D Deluxe
2.Lynx 1
3.Midiman delta 44
4.Echo Gina 24

HI-

I'm trying to find out more about the Career Connection radio apprenticeship program. Is anyone here familiar with this organization? They offer several courses; radio, tv, film, recording studio. If anyone here has any opinions, thought, or knowledge of this please let me know. It would be nice to know if they are reputable.

thanks
chaz

3700. K-Juice Austin drops Urban Adult for Hot Talk

Newsgroup: rec.radio.broadcasting
Date: 2001-12-08 21:02:43 UTC
From: familiacantu@cs.com
Message-ID: <u14vvjbui87ve5@corp.supernews.com>
Source record: 12761

KJCE 1370 is now doing talk and sports.
The talk includes Don Imus, Don and Mike, Tom Leykis and others.
The sports includes the San Antonio Spurs, the new Houston Texans and others.
Check www.kjuice.com for the particulars.

Classic Stars Radio
Channel W-01 on The IM Tuner
http://www.classicstars.net

A Personal Note from DJ Twain
Seasons Greetings Everyone. CSRO wishes all of you a wonderful
holiday season with many good feelings of
good will. The holidays can be a wonderful time of year, and we hope
that our Christmas schedule of shows helps
to bring you many fond memories of Christmas' past. The only thing of
importance to note regarding the station is
that CSRO can only be accessed via IM NETWORKS. The IM Tuner, or the
various IM boxes for sale. The
tuner is free, so if you'd like to listen, head over to
www.imnetworks.com and download their tuner.
I know many of you like to listen via real player, or windows media
player. however that is not possible for
CSRO. Classic Stars Radio has always been on the IM Tuner, and always
will. We cannot play in Real or
Windows Media, nor will we any time soon. The tuner is a simple download

for any capable of having REAL or
WM. So, if you use either, you will be able to listen to CSRO on the IM
Tuner. All that you will need to do is take
a few minutes and download it.
CSRO has over 100 series playing every week, so we have quality. If
you say we don't, that is your opinion. But
we are a free service done by someone who enjoys old radio programing.
If you don't like our service, or the fact
that we are only on the tuner, don't listen. However, please don't
complain. CSRO is a hobbyist venture. I make
no money for this, and I do it for the enjoyment that OTR can bring to
many, nothing more. So if you don't like
what CSRO is, find another source for free streaming OTR. All I ask is
that if you like OTR, listen to CSRO. It's
free, it's easily available to those with Windows 98, 2000, ME, or XP,
and it's done from a labor of love. If you
don't' like OTR, or CSRO, just don't listen. It's as easy as that.

DJ Twain

Wednesday, December 19th

6:00pm CBSRMT : 1974-12-24 - 48m38s - A Very Private Miracle

Hey Everyone,

Does anyone know if there is a way to get a marti manual online for this unit? I haave been waiting to get one from the radio station I work for but they have been very slow since there is more important things to do as we all know. I would like to read this so I thought I'd ask to see if anyone has any knowledge of were I can get one.

Thanks,

Vibekatz

```
Hi!
This is the UneedAlist.net list management program. I'm managing the
listmaster@uneedalist.net mailing list.

I'm working for the list owner, who can be reached
at listmaster-owner@uneedalist.net.

Messages to you from the listmaster mailing list seem to
have been bouncing. I've attached a copy of the first bounce
message I received.

If this message bounces too, I will send you a probe. If the probe bounces,
I will remove your address from the listmaster mailing list,
without further notice.

I've kept a list of which messages from the listmaster mailing list have
bounced from your address.

Copies of these messages may be in the archive.

To retrieve a set of messages 123-145 (a maximum of 100 per request),
send an empty message to:
<listmaster-get.123_145@uneedalist.net>

To receive a subject and author list for the last 100 or so messages,
send an empty message to:
<listmaster-index@uneedalist.net>

Here are the message numbers:

Greetings fellow investors.

Our Conglomerate of Newsletters has intentionally refrained from
sending out our patented "Emerging Stock Alert" these past few months.
We were waiting for the market to settle down. We were waiting for the
market to stabilize. We were waiting till we felt secure in offering
you a stock with excellent immediate upward potential. We are close to
identifying that OTC BB stock for you. We anticipate that we will
announce it to you in approximately ten days. Please be patient as we
continue to research this Company.

In the meantime we have identified several other Companies which we
feel could make very good long term investments. Here they are:

CSCO
AMD
YHOO
UAX
PALM
LNUX

ERICY
NT
SFNT

Disclaimer: We are an electronic advertisement providing information on selected companies. All statements and expressions are our opinions and are not meant to be either investment advice or a solicitation or recommendation to buy, sell, or hold securities. Readers of this e-mail message, stock profile, are cautioned that small and micro-cap stocks are high risk investments and that some or all investment dollars can be lost. We suggest you consult a professional investment advisor before purchasing any stock. All information, if any, is received directly from the companies profiled and/or outside interviews conducted by us. While we believe these sources to be reliable, we, our officers, directors, employees or any affiliated parties make no representation or warranty as to the accuracy of the information provided. Readers should not rely solely on the information contained in this publication, but should consult with their own independent tax, business and financial advisors with respect to any investment opportunity, including any contemplated investment in the advertised Company(s). We recommend you use the information found here as an initial starting point for conducting your own research and conduct your own due diligence (DD) on the featured companies in order to determine your own personal opinion of the company before investing in these or any other companies. We assume all information to be truthful and reliable; however, we cannot warrant or guarantee the accuracy of this information.
All statements contained herein are deemed to be factual as of the date of this report and as such are subject to change without notice.
We are not an Investment Advisor, Financial Planning Service or a Stock Brokerage Firm and in accordance with such we are not offering investment advice or promoting any investment strategies. We are not offering securities for sale or solicitation of any offer to buy or sell securities. An offer to buy or sell can be made only with accompanying disclosure documents and only in the states and provinces for which they are approved. The owner/management of this e-mail alert has NOT received any compensation for the dissemination of this stock profile/advertisement.
However, we have purchased shares

in the open market of all the stocks mentioned in this announcement. Since we have an interest in these stocks there is an inherent conflict of interest in our statements and opinions and such statements and opinions cannot be considered independent. We will benefit from any increase in the share price of these stocks. We retain the option of liquidating all or part of the shares we possess before, during or immediately after the dissemination of this report, a custom we often engage in. Safe Harbor Disclosure: This stock profile/advertisement contains or incorporates by reference \"forward-looking statements,\" including certain information with respect to plans and strategies of the featured company. As such, any statements contained herein or incorporated herein by reference that are not statements of historical fact may be deemed to be forward-looking statements. Is that Jimi Petulla's thing? Years ago in Texas, someone I knew was in on that. I think someone here in Tucson was recently using Radio Connection too. I think they get the stations in on it by cutting them in on the student's tuition.

When I was starting out, I probably wouldn't have gone the way of that company, but a foot in the door is still a foot in the door. And maybe if an internship isn't an option, it's not a bad deal. But I don't know much about it. So I guess what I'm saying is, I don't know what I'm saying. Sorry for wasting your time!

I tried, but he says it is in a special tape storage room. The likely
hood of him going there and remembering oh yes, he wanted that tape,
is very unlikely--along with him even going there at all.

We are seeking investors to help us acquire an AM CP
for a new AM in Northern California. It is on a local
channel with 250 watts, fulltime, non-directional.
Near a famous college community.We have gone to
contract and paid the down payment.

Active or inactive investors with at least $8000.00
are welcome. All investors would be on the board with
full voting rights, if desired.

Call (478) 741-1710 or email if interested.

73,

Meyer Gottesman, W6GIV

You've slightly mangled the call letters. The station you're thinking of now has the call letters WARW and is known as "Classic Rock 94.7". They're in the Washington, DC suburb of Rockville, MD, and in 1987 they had the call letters WLTT and were an adult contemporary station known as "W-Lite 94.7". Dick Cerri had a special weekend program, "Music Americana", which featured folk music.

You might try contacting Dick through the World Folk Music Association to see if he might have a tape of Mary Chapin Carpenter's appearance.

Dear Friends,

I have been searching high and low for a Crusin' album or cd.

Years ago, I purchased a Crusin' Years LP. It was part of a series of albums (Crusin' 1967, Crusin' 1968, etc.) The thing I loved most about this album is that it not only contained the music I loved, but it also had classic radio clips, commercials, etc.

I have looked in several music stores and a number of online sources to no avail. Any information on who or what store I can contact to get these Albums or CDs would be greatly appreciated.

Thanks,
David B. Berchtold

I tried, but he says it is in a special tape storage room. The likely
hood of him going there and remembering oh yes, he wanted that tape,
is very unlikely--along with him even going there at all.

Dear Mr. Sobol,

In response to your request for my opinions on what should be posted in =
your newsgroups. I must tell you that I absolutely love LOVE radio and =
radio related news. Whatever is posted in your newsgroups... as long as =
it's connected with the radio profession, I find interest in the subject =
matter. =20

For the longest time, I have read the articles posted in =
alt.radio.broadcasting and rec.radio.broadcasting with great passion for =
all of what is radio. Here in my hometown of Erie, PA, NextMedia Radio =
has done a wonderful thing. They put six radio stations in a former =
department store building. They brought new life for deteriorating and =
almost forgotten downtown. It is a single fantastic thrill to go down =
there and be inches away from "Radio People." Watching them at their =
work has had me sitting for hours in front of their display windows. I =
am so inspired from what I see that I feel myself walking three inches =
off the ground! It is really great to see what "Radio People" are doing =
in and for my hometown. Because of the excitement at the Boston Store, =
other businesses are opening up in close proximity. It is truly =
wonderful to see Erie reborn. Mr. Richard Rambaldo and the people at =
NextMedia are heroes to me!

Getting back to the main topic at hand, if it's radio related, it's cool =
by me. I do have problems with flaming and other personal attacks. =
Radio people are truly heroes in my eyes and they have been heroes for =
many years. To personally attack a hero is akin to swearing and there =
is just no place for that stuff in any newsgroup.

Thank You for letting me express my thoughts!

Is that Jimi Petulla's thing? Years ago in Texas, someone I knew was in on that. I think someone here in Tucson was recently using Radio Connection too. I think they get the stations in on it by cutting them in on the student's tuition.

When I was starting out, I probably wouldn't have gone the way of that company, but a foot in the door is still a foot in the door. And maybe if an internship isn't an option, it's not a bad deal. But I don't know much about it. So I guess what I'm saying is, I don't know what I'm saying. Sorry for wasting your time!

We are seeking investors to help us acquire an AM CP
for a new AM in Northern California. It is on a local
channel with 250 watts, fulltime, non-directional.
Near a famous college community.We have gone to
contract and paid the down payment.

Active or inactive investors with at least $8000.00
are welcome. All investors would be on the board with
full voting rights, if desired.

Call (478) 741-1710 or email if interested.

73,

Meyer Gottesman, W6GIV
Macon, GA

Hi!
This is the UneedAlist.net list management program. I'm managing the
listmaster@uneedalist.net mailing list.

I'm working for the list owner, who can be reached
at listmaster-owner@uneedalist.net.

Messages to you from the listmaster mailing list seem to
have been bouncing. I've attached a copy of the first bounce
message I received.

If this message bounces too, I will send you a probe. If the probe bounces,
I will remove your address from the listmaster mailing list,
without further notice.

I've kept a list of which messages from the listmaster mailing list have
bounced from your address.

Copies of these messages may be in the archive.

To retrieve a set of messages 123-145 (a maximum of 100 per request),
send an empty message to:
<listmaster-get.123_145@uneedalist.net>

To receive a subject and author list for the last 100 or so messages,
send an empty message to:
<listmaster-index@uneedalist.net>

Here are the message numbers:

Greetings fellow investors.

Our Conglomerate of Newsletters has intentionally refrained from
sending out our patented "Emerging Stock Alert" these past few months.
We were waiting for the market to settle down. We were waiting for the
market to stabilize. We were waiting till we felt secure in offering
you a stock with excellent immediate upward potential. We are close to
identifying that OTC BB stock for you. We anticipate that we will
announce it to you in approximately ten days. Please be patient as we
continue to research this Company.

In the meantime we have identified several other Companies which we
feel could make very good long term investments. Here they are:

CSCO
AMD
YHOO
UAX
PALM
LNUX

ERICY
NT
SFNT

HI-

I'm trying to find out more about the Career Connection radio apprenticeship program. Is anyone here familiar with this organization? They offer several courses; radio, tv, film, recording studio. If anyone here has any opinions, thought, or knowledge of this please let me know. It would be nice to know if they are reputable.

thanks
chaz

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

Hello-
I'm an aircheck collector, and wanted to post my most elusive
goal, and ask for the help of anyone who might be able to assist.
I'm looking for a copy of the WLS Chicago year-end countdowns
from the years 1977-1982. I'll trade 25 hours of materail from my list
for each of the above years (and provide the tapes). My list is
at.....
http://www.ctconnect.com/rgilmore/andrew.txt
Thanks, Chris

First, you must research what frequencies for FM's are still available. If you are really serious about this you will need a communications lawyer. Equipment should be way down on your list of priorities. You have many procedures to follow before determining what console you need. Are you planning on putting the antenna in your back yard next to the dog house? Zoning? I had a co-worker who filed for an FM frequency in a small community. He pains takingly filed much of the paperwork himself, still using an attorney. The whole process took about three years. Meantime, a competing applicant applied for the same frequency. This often happens. A frequency could be dormant for many years, but once it is applied for, somebody is going to think that it must be valuable and go for it. This prolonged the process another several years due to the appeal process. Finally, the other applicant was denied the license because they already were operating an AM in the same town. The court ruled in favor of my friend due to the fact diversification was an issue and not financial qualifications. Ironically, he wound up buying the AM several years later.

Also, do you have a format that is marketable or unique? If you go for an AM are you prepared to sell your first born to keep it afloat? My final comment is better you than me.

Classic Stars Radio
Channel W-01 on The IM Tuner
http://www.classicstars.net

A Personal Note from DJ Twain
Seasons Greetings Everyone. CSRO wishes all of you a wonderful
holiday season with many good feelings of
good will. The holidays can be a wonderful time of year, and we hope
that our Christmas schedule of shows helps
to bring you many fond memories of Christmas' past. The only thing of
importance to note regarding the station is
that CSRO can only be accessed via IM NETWORKS. The IM Tuner, or the
various IM boxes for sale. The
tuner is free, so if you'd like to listen, head over to
www.imnetworks.com and download their tuner.
I know many of you like to listen via real player, or windows media
player. however that is not possible for
CSRO. Classic Stars Radio has always been on the IM Tuner, and always
will. We cannot play in Real or
Windows Media, nor will we any time soon. The tuner is a simple download

for any capable of having REAL or
WM. So, if you use either, you will be able to listen to CSRO on the IM
Tuner. All that you will need to do is take
a few minutes and download it.
CSRO has over 100 series playing every week, so we have quality. If
you say we don't, that is your opinion. But
we are a free service done by someone who enjoys old radio programing.
If you don't like our service, or the fact
that we are only on the tuner, don't listen. However, please don't
complain. CSRO is a hobbyist venture. I make
no money for this, and I do it for the enjoyment that OTR can bring to
many, nothing more. So if you don't like
what CSRO is, find another source for free streaming OTR. All I ask is
that if you like OTR, listen to CSRO. It's
free, it's easily available to those with Windows 98, 2000, ME, or XP,
and it's done from a labor of love. If you
don't' like OTR, or CSRO, just don't listen. It's as easy as that.

DJ Twain

No this is not the case.
The Licence fee covers television users at home, however, radio is free to air and aways has been.
Us 'Brits' pay quite a small sum for the funding of 5 national services, 48 local services (radio) 6 national televison services and 38 regional ones.
World Service is funded by The Foreign Office of the government and is not included. Most of the output is now going digital on national DAB multiplexes and you can read all about it at the BBC website.
A bargian at only ?105.00 per annum.
www.bbc.co.uk
enjoy!
Andy

Hey Everyone,

Does anyone know if there is a way to get a marti manual online for this unit? I haave been waiting to get one from the radio station I work for but they have been very slow since there is more important things to do as we all know. I would like to read this so I thought I'd ask to see if anyone has any knowledge of were I can get one.

Thanks,

Vibekatz

You've slightly mangled the call letters. The station you're thinking of now has the call letters WARW and is known as "Classic Rock 94.7". They're in the Washington, DC suburb of Rockville, MD, and in 1987 they had the call letters WLTT and were an adult contemporary station known as "W-Lite 94.7". Dick Cerri had a special weekend program, "Music Americana", which featured folk music.

You might try contacting Dick through the World Folk Music Association to see if he might have a tape of Mary Chapin Carpenter's appearance.

http://www.wfma.net/ANNCASE.htm
(you can find contact info elsewhere on the site)

http://www.musicamericana.com/
(page says it "will be returning soon")

There is a little thing called a license that you will need unless you would be interested in some huge fines and/or prison.

To get a license, plan on spending a few hundred thousand for engineering, legal fees, etc before you even start to build the station.

I am starting a Voicover business and need some suggestions I have plenty hardware/software/performance,and professional technical experience I need to get started BUT...

I need to make a decision on a 2 channel balanced card which actually works with Win2k/XP...I have read TOO MANY issues with Driver problems using 2k,XP!!! (I'll look at the multicahnnel cards as well)

Bottom line- the card needs to have great RF/EMI rejection

It's getting harder every day to choose!!! Please rate, or share experience:

1.DAL Card D Deluxe
2.Lynx 1
3.Midiman delta 44
4.Echo Gina 24
5_____
6_____

Much appreciation!!!

From 'Jerry Trowbridge' <jtlist@FlyingPigRanch.com>:

>And another one. Commenting on an immediate medium like radio, is
>frustrated by messages appearing in large numbers en masse.

Yes, I know. The fact that I couldn't get a damned thing posted today (problems between here and the SuperNews server farm) and then everything showed up twice only made it worse.

The only thing that aggravates me about the robomod issue is that first some people said "maybe we shouldn't". Then I started moderating manually and already, in the first month or so, people were complaining that robomoderation was the answer, and why did we stop.

This past weekend, real life intervened. I had to clean up after a hacker at the place where I just took on a programming assignment, and that took up most of my weekend and family time took up the rest.

But it's ok, because when people complain to me (in my role as moderator) about the content of the group, and I call for a discussion on what's appropriate and what's not, the subset of people that actually reply to me make up only a small percentage of the readership of the group, and none of the people complaining the loudest seem to even care. This has happened more than once.

I've been an RRB regular for years, and I just want to do what's best for the group. If that's robomoderation, the robot can have the group back. Dealing with complaints has been frustrating (although, again, I certainly could have done a better job... and there are always ways I could improve - the problem is that nothing ever seems to be good enough for anyone).

Yes, I'm ranting. Was, anyhow. I'm done.

Whatever you guys want is OK by me. I just want everyone to be happy - ok, this is Usenet, that won't happen. how about most of us? I'd be happy if most of us were happy with the group.

I would think you could get the NPR station from Watertown, NY.
But, I don't have the frequency handy, but if you tune in the 88
to 92 MHz portion of the FM band, you should find something.

You may also be able to find the information on
<http://www.publicradiofan.com>.

I've wanted to do a web site for a while. I have a great Content
Management System sitting here on my web server that is perfect for
serving up dynamic websites, and participants would be able to post
news articles, information and such. I could do the layout and graphics
(hey, it's what I do for a living).

Anyone up for this?

Paul Van House <pvanhouse@houston.rr.com> had written:
| Here's a vote for robo-moderation. This used to be a killer
| newsgroup. With all respect the the late Bill Pfeiffer (SIC?) nobody
| who's tried to fill his shoes has been consistently successful except
| the robot.

It's a tough job, poorly compensated. But there was only one Bill, and he truly can't be replaced. Bill was an active promoter of the newsgroup. He put together the informal "Radio Watcher" program that made rrb one of the most informative newsgroups around. If Bill hadn't heard from you in a while, he'd send you an e-mail asking what was up. If you posted an article that he especially liked, he'd send you an e-mail with his kudos. Bill also actively maintained a web site that, as time went on, also steered new readers into rrb.

In the time since his death, it appears that discussion has shifted to the many web-based message boards that have sprung up. The S/N ratio is much noisier on those message boards, and their value varies wildly. For Bay Area broadcasting, ba.broadcast continues to be a strong group of well-informed, articulate people with whom it's a genuine pleasure to interact. Beyond those factors, some of us who were regular posters (such as me) have shifted our attention to other matters. People just naturally move on.

The intent of these remarks is to urge people not to be too hard on Steve, or anyone else trying to moderate the newsgroup. If robomoderation will help get the traffic back up a bit again, I'm all for it.

Not true Andy.

Up to, and I'm guessing, 25 years ago there was a separate radio licence which was then merged into the TV licence when just about everybody had a tv set.

I vaugely recall that at an earlier stage there was a separate radio mobile licence but I'm not sure about that.

Good grief thats making me feel old !!

Pagin Mark Wozniak--does WBFO in Buffalo get out to Ottawa?

Otherwise, if you want to hear NPR programming in Canada, you have to go to their web site (www.npr.org) or to the web sites of a member station that streams--which seems to be almost every NPR member with a web site.

Does anybody know the disposition of the 1WTC antenna?

After we all saw it swallowed up into the cloud, I haven't seen it
since.

Where did it go? Everytime I see shots of "Ground Zero" I don't see it.
I have heard a reference or two in the many pieces produced and aired on
MSNBC and the History Channel, but the camera never panned in the
direction the host was pointing.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - Over 25 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for over 25 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

WIRE)--Dec. 11, 2001--ShareCom, Inc.(TM), the market le=
ader
in designing and manufacturing NOAA (Nationa=
l
Oceanographic and Atmospheric Administration) Weather Radi=
o and
Disaster Readiness electronics products, today announced
availability of its WRP-500 Broadcaster(TM) NOAA Weathe=
r
Radio, with an SRP of $149.99, available for purchase =
via
its ecommerce web site and through select retailers around=
the
country. Like all ShareCom products, the WRP-500 features =
a

streamlined and fashionable design, coupled with strong pr=
ice
performance.

ShareCom manufactures products which are expressly designe=
d to
support the in-place NOAA Weather Network - an always on (=
24/7)
broadcast network that covers 95% of the US. This `=
`early
warning'' network provides general-purpose weather informa=
tion
and alerts for hazardous weather or disaster warnings for =
people
throughout the US.

The Federal Govern=
ment,
The American Red Cross and numerous state and lo=
cal
government agencies are now emphasizing the need for t=
he
NOAA Weather Radio network, especially since the September=
11th
tragedy. A NOAA Weather Radio is now considered as
important as having a smoke detector in a home, school or
business.

``Our market research=
indicated
a strong need in the marketplace for a NOAA Weather Radio =
that
looks good in someone's home or office, but that has real =
ease
of use built into the overall design,'' said Brad Nordling=
the
CEO of ShareCom, Inc. ``One of the most requested feature
enhancements from our consumers has been to provide
functionality that enables them to setup a radio right out=
of
the box, with no cumbersome interface to deal with. The WR=
P-500
Broadcaster addresses this need by incorporating our Graph=
ical
Alert Technology(TM) specialty software - our customers=
now
have the ability to easily configure their radios in a mat=
ter of
seconds using a functional scroll down menu.''<=

Agency (FEMA) to increase the use of Weather Radios countr=
y wide
through a program called Project Impact. There are 2,600 Project I=
mpact
communities in the U.S. The FEMA web site lists WeatherRadios.com =
as a
national partner providing a banner and link to the WeatherRadios.=
com
site. The FEMA site receives over 100,000 visitors per day. <=
/p>

2.
The National Oceanic and Aerospace Administration (NOAA) has
WeatherRadios.com listed first on their web site, telling people w=
ere to
purchase a NOAA Weather Radio.

3.
The National Weather Service (NWS) has offered to promo=
te
corporate sponsorships to the WeatherRadios.com site through recog=
nition
and media support.

4.
Local American Red Cross Chapters will promote NOAA Wea=
ther
Radios through WeatherRadios.com in an exchange for a $5.00 donati=
on per
radio sold.

5.
The Chicago Area AAA will feature SHCC's 2WayTalk.com
on its web site offering exclusive discounts on Weather Ra=
dios,
and FRS Family Radios. 2WayTalk.com will also be listed in the AAA
magazine called "Home and Away".

6. The Federation of
Manufactured Home Owners of Florida (FMO) has entered into=
a one
year agreement that will increase the sale of Weather Radios from =
the
WeatherRadios.com site. Mailings and web site links will offer a g=

roup
discount to members and also pay a rebate to the organization for =
every
radio sold.

7. The Owner - Operator Independent Drivers Association (OOIDA)=

has begun to promote the discount that is offered through the
WeatherRadios.com site. Magazine articles, mailings, and web site =
links
will offer a group discount to members and also pay a rebate to th=
e
organization for every radio sold. This agreement will run for one
year.

Why
Weather Radios are Poised for Growth

&nbs=
p;
NOAA Weather Radios<=
/font>
automatically alert people of impending severe weather conditions
"24/7". This is especially critical for families while
sleeping. These devices are fast becoming recognized as essenti=
al and
potentially life saving for use in homes, businesses, and
critical care facilities.

The
National Weather Service (NWS)

has stated that there has been an increase in severe weather in th=
e last
10 years and this trend is expected to continue. NWS has a publ=
ished
goal for NOAA Weather Radios to be in every home within the=
next
10 years. Currently, approximately just 7% of homes have th=
is
device. This being said, we can expect a tremendous increas=
e in
the presence and sale of weather radios over the coming years.=
The
NWS, NOAA, the Federal Emergency Management Agency (FEMA) and othe=
r
government agencies have an aggressive education and funding effor=
t to
reach the 100% goal.

New
technology called Specific

Area Message Encoding (SAME) was introduced in the mid 90s. It all=
ows
users to set an alarm only for their specific geographic area. Thi=
s
feature is expected to make this tool commonplace in homes
alerting families of weather conditions that pose an immediate dan=
ger.

Additionally, 2WayTalk.com will=
continue
to focus on Internet users who are outdoor enthusiasts. The market
continues to be strong and growing. FRS Family Radios are now beco=
ming a
popular family item on vacations, ski trips, camping, and biking e=
vents.
They are used for a wide variety of purposes, from staying in touc=
h with
children playing in the neighborhood, to coordinating soccer tourn=
aments
and antique auctions.

A
Final Word About SHCC

SHCC i=
s currently
booking $45,000/ month and is conservatively projecting earnings n=
ext
year of $1.3 million on revenues of $13 million. Unlike mos=
t
e-commerce ventures, ShareCom's marketing "burn rate" is=
very
modest. The Company forecasts revenues of $32.5 million the
following year, increasing profitability to earn $4.6 million. Giv=
en its
impressive relationships and the rapidly growing market for its pr=
oduct,
SHCC's share price of just 1.6 cents makes it a compelling play=
for
the astute investor.

I agree! I read that it was leaning against a building or something, but would really love to see a shot of even a segment of what's left. That wasn't the original mast, right? Wasn't the first one much smaller? Anybody watch as it went up? Gin pole or something? Must have been a breathtaking operation!

Dave Sproul - Bethesda, MD

>The thing I loved most
>about this album is that it not only contained the music I loved, but
>it also had classic radio clips, commercials, etc.

When these first came out, I was foolish enough to think that they were somehow "real" airchecks of those radio shows. It was pretty obvious in listening to them that they were mostly (if not all) recreations..with the original DJ's- in the early 1970's-trying to sound the way they did in the 50s. I lost interest after buying a couple of the albums. (Although I though the B. Mitchell Reed one was sort of funny.)

AMATEUR RADIO NEWSLINE(tm) REPORT #1269 - DEC 7, 2001

Amateur Radio Newsline report number 1269 with a release date of Friday, December 7, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The FCC says no to a Winter Olympics special call sign and a new Extra class exam starts next summer. Learn what's in it on Amateur Radio Newsline report number 1269 coming your way right now.

(Billboard Cart Here)

**

THE 2002 WINTER OLYMPICS: FCC SAYS NO TO SPECIAL CALL SIGN

An idea for a special events call sign to celebrate the 2002 Winter Olympics has drawn a negative response from the FCC. Tom Schaefer, NY4I, of Sandy, Utah, had requested that the agency allow amateurs Utah hams to substitute the number 2002 or 02 for the 7 in their callsign. This, for the time period preceding and up to though the 2002 Winter Olympics in Salt Lake City. But after mulling it over for a few months the Schaefer says the agency responded with a definite no:

--
Schaefer Here:
In-Q: I wrote a letter...
Out-Q:...as a different prefix.

The letter to Schaefer was signed by D'wana R. Terry. Terry is Chief of the Public Safety and Private Wireless Division of the Wireless Telecommunications Bureau. Among the reasons Terry stated in refusing the special call sign request was that the block of special event callsigns requested did not fall into the commission's special event callsign format. Also, that the request was inconsistent with International Radio Regulations. Schaefer says that he is disappointed at the FCC decision to deny, and also a bit surprised:

--
Schaefer Here
In-Q: The letter I...
Out-Q:...unable to do that.

Does this mean that there will be no ham radio involvement in the 2002 Winter Olympic Games? Not by a long shot. According to Schaefer members of the local ARES groups will be assisting in providing communications for the event. And

there’s a good chance that someone will pick up the ball and get some sort of special call sign using the established call sign administrator program.

By the way, you can hear more with Tom Schaefer NY4I about ham radio at the Winter Olympics on this weeks RAIN Report. Its on the web in Real Audio and Windows Media at www.rainreport.com and by telephone at 847-827-7246. That’s 847-827-RAIN. (ARNewsline(tm))

**

THE ARCTIC WINTER GAMES

Another event called the Arctic Winter Games are also in their planning stages. In this case, ham radio is an important part of the event. Q-New Graham Kemp, VK4BB, tells us the who, the what and the where:

--
Greenland and the call-sign OX1AWG is on the air from Nuuk Greenland as a participant of the Arctic Winter Games going to be held in Iqaluit Nunavit and Nuuk Greenland 17th - 23rd of March 2002.

OX3HX, Rene tells us any Hams bringing a valid License original will be welcome to use the local club station OX3NUK for a small fee. If you would like to have your own OX3-call, ship a copy of the license but they need to have the papers 3 weeks in advance. Hams who like to operate OX/Home call or OX1AWG are welcome too, and have only to show up with original valid license.

For the Amateur Radio Newsline, Im Graham Kemp, VK4BB, of Q-News Australia.
--

For those planning to visit Greenland for the games, Rene Witkowsky, OX3HX will be available at one of the many Help Booths around the city. (Q-News)

**

DX RECORD: 73 KHZ DISTANCE RECORD INCREASED

Yet another new low frequency record has been achieved on the 73 kHz band. Jeramy Boot, G4NJH, has more:

--
“On the 21st of November, just before midnight UTC, W1TAG received extremely slow CW from G3AQC. This was the first time that a complete callsign had been copied, though partial calls were identified the previous night.

The opening lasted around two hours and was the culmination of several weeks of testing. At a distance of 5291 kilometers, G3AQC smashed his own record of 4408 kilometers when his 73kHz transmissions were received by VE1ZJ last June. He was running 200 milliwatts ERP.

The transmission was in Differential Frequency CW, where the dots and dashes are the same length but on slightly different frequencies, and with no space between them.

Jeramy Boot, G4NJH”
--

The Differential Frequency C-W communications system used for this contact holds the promise of extending this record even further. (GB2RS)

**

BREAK 1

This is ham radio news coming to you from the United States of America. We are the Amateur Radio Newsline, heard on great bulletin stations around the world this week honoring the Antelope Valley Amateur Radio Club Wednesday Night Net serving Lancaster California.

(5 sec pause here)

**

HAM RADIO IN SPACE: EXPEDITION 4 HEADS TO THE ISS

Amateur Radio is keeping an eye one space this week. On the International Space Station to be more exact, as we witness a changing if the guard. The third group of Astronauts and Cosmonauts headed by Frank Culbertson, is getting ready to come home. They’ll be back on Earth December 16th, after being in orbit since last August.

Expedition 4, Yuri Orufrienko, Dan Bursch and Carl Walz will take over and be up there until next May. Onufrienko once operated from the Mir Space Station; Bursch is KD5PNU and Walz is KC5TIE. So hams can look forward to contacts with them.

Amateur Radio on the International Space Station; ARISS; will continue on the air with two meter voice and packet. Voice contacts with schools all over the world have been well served and those exciting contacts will continue at a rate of one or two a week once the new crew settles in.

In addition to operating ham gear, the new crew has also carried new Amateur Radio antennas to the station. They were designed and built in Italy to Russian specifications, then space-qualified and shipped to the United States.

The Astronauts plan at least eight space walks, two of which will be used to install those antennas outside the crew quarters. They should provide a wide range of frequencies and vastly improved coverage of the ham bands for the ARISS station.

The space station call, while flying over the United States is NA1SS. The 2 meter downlink frequency is 145.80 MHz. Look for the new crew on the air from orbit in the near future. ARNewsline(tm))

**

HAM RADIO TESTING IN THE USA: NEW EXTRA CLASS EXAM QUESTION POOL RELEASED

If you are planning to upgrade to Extra class, now might be the time to do it. This is because a new and somewhat more difficult Extra Class exam will go into

effect next summer. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the details:

--
The National Conference of Volunteer Examiner Coordinators Question Pool Committee has released a revised and expanded set of Element 4 Amateur Extra questions. Use of these questions begins next summer and replace the current Extra class question pool released back on April 15, 2000. That’s the day Amateur Radio ''restructuring'' became effective.

The new Element 4 pool expands the number of questions by more than 20 percent. The new test pool has 806 questions as opposed to 665 in the current Extra class pool. It also contains more technical material. In fact, more than half of the questions cover electrical principles, circuits, signals and emissions.

The 50 questions in an Extra class examination are drawn from the question pool. FCC rules say that an applicant must correctly answer at least 37 questions of the 50 to receive a passing grade.

The new Extra class question pool becomes effective July 1, 2002, and must be used to generate all Extra class written examinations administered on or after that date. The questions are available on the ARRL Web site and will remain valid through June 30, 2005.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.
--

The Question Pool Committee now will turn its attention to developing an outline for the Technician class Element 2 question pool. A draft version is scheduled for public release and
comment next spring. The ARRL website address is http://www.arrl.org/arrlvec/pools.html to find the Question Pool. (ARRL Bulletin, NCVEC)

**

HAM RADIO TESTING IN THE U-K: UPGRADING MORSE TESTS UNDERWAY

Meantime overseas, the United Kingdom is in the process of administering a lot of slow speed Morse code exams. This, following the an announcement by that nations telecommunications agency that U-K Full and Intermediate Class B license-holders can operate on the High Frequency bands under the new Foundation license by simply passing a code test.

Called a Morse Assessment exam, the Radio Society of Great Britain is arranging for sessions to be held nation-wide. The RSGB hopes that at least two sessions per region will take place between now and the end of December.

The RSGB says that these tests are open to both members and non-members of the society. So far twelve sites have been approved for training and testing of the new U-K Foundation License. (GB2RS)

**

ENFORCEMENT: AMATEUR RADIO ROAD RAGE MUST STOP

The FCC’s chief ham radio rules enforcer has told those attending the Ft. Wayne Indiana Hamfest that the time for on the air arguments has come to an end. Riley Hollingsworth, the FCC’s Special Counsel for Amateur Radio enforcement told the forum that Amateur Radio road rage must stop now and that the bickering on our frequencies can do nothing but hurt Amateur Radio in the long run.

Hollingsworth also says its time for more hams to get involved in public service. Jack Parker, W8ISH, of Amateur News Weekly, has that part of the story:

--
“Hollingsworth says that it is now time for hams to use frequencies responsibly. He adds that now, more than ever, is the best time for all Amateur Radio groups to seek out and establish working relationships with local emergency response agencies.

Since September 11th, Amateur Radio and its potential has moved into a prominent position on the national front. But he stresses that we must move quickly at a local level to establish our place in the overall emergency response plan.

Reporting from the Ft. Wayne Hamfest, for amateur News Weekly, I’m Jack Parker, W8ISH.”
--

Hollingsworth’s views are echoed by many who are already involved in organizing ham radio emergency communications on a local level. They say you can never have to many well trained volunteers. (Amateur News Weekly)

**

SPECTRUM USE: FCC OPENS UP MORE SPECTRUM TO COMMERCIAL USERS

The government has moved to eliminate a cap on how much spectrum any one wireless company can own in a given market. The decision opens the way for mergers between major carriers and allows them to provide more mobile services such as high-speed Internet access.

The Federal Communications Commission had previously limited the amount of spectrum that an operator could own in a particular geographic area, in an effort to prevent a single giant company from squelching competition in that market. But in a recent 3 to 1 vote, the agency decided to immediately raise the amount of bandspace a company can own from 45 MHz to 55 MHz. This is an increase of more than 20 percent. The FCC plans to completely eliminate the limit in January 2003. (FCC)

**

HAMVENTION 2002: TIME TO NOMINATE REMINDER

Another reminder that the Dayton Amateur Radio Association has opened the nominating period for the 2002 Dayton Hamvention Awards. There are three

awards presented each year. They are the Radio Amateur of the Year, Special Achievement, and Technical Excellence.

All amateurs Novice through Extra are eligible. Awards are decided by the Awards Committee, based partially upon the information received. Magazine articles, newsletters, newspaper clippings, videos and the like are appreciated but cannot be returned. The deadline for nominations is January 31, 2002. Nominations can be submitted by US Mail to Post Office Box 964, Dayton Ohio 45401 or by completing the convenient e-form on the web at www.hamvention.org. (DARA)

**

NEW HAM TECHNOLOGY: THE ELECRAFT RIG CONCEPT DESIGN CONTEST

Want to design the ham rig of the future and maybe win a prize? Well, Elecraft says that it will be giving three of its new EC1 project enclosures to those who submit the most interesting suggested designs concepts.
--
Eric Swartz WA6HQQ: “There’s quite a strong building and homebrewing community inside of the QRP’ers -- the low power operators -- these days. In fact, that is how we got our start.

We have broadened our audience past that and have pulled a lot of hams from the mainstream higher power groups to it also, but those guys (the QRP operators - ed.) build an awful lot of stuff. We are continually seeing folks talking about new project ideas and new things to design. It is quite a fertile group of people so I think we are just kind of servicing that need.”
--

Elecraft says its taking this rather unusual step to away to help stimulate the creative process within the ham radio community. According to Elecraft’s Wayne Burdick, N6KR and Eric Swartz, WA6HHQ, design concepts submitted can be for virtually any ham-related application, but they must be compatible with the Elecraft EC1 enclosure. The EC1 is the same size and color as the K1 transceiver. No schematics are required and designers are under no obligation or expectation to actually build the proposed projects. More information on this unique design contest along with all the rules is on the web at www.elecraft.com. (Elecraft)

**

ELECTRONIC BUSINESS: AILING POLOROID FILES CHAPTER 11

Polaroid has been known to generations of consumers for its instant cameras and film, and more recently as a supplier of digital imaging products. Now Poloroid has filed for Chapter 11 bankruptcy protection.

According to news reports, the company was unable to keep up with the new digital technologies of the photography world. It also has struggled with nearly $1 billion in debt. (Published reports)

**

BREAK 2

News never goes home for the holidays and neither do we. We are the amateur Radio Newsline with links to the world at our only official website - www.arnewsline.org.

**

EMERGING TECHNOLOGY: BRAIN DISEASE SUPERCOMPUTER

The University of California at San Diego will coordinate a consortium of interests banding together to build the first nationwide computer network for studying diseases of the brain. The network will enable researchers to share information on neurological diseases such as multiple sclerosis, schizophrenia, Alzheimer's disease and Parkinson's disease. The National Center for Research Resources, part of the National Institutes of Health, awarded the consortium more than $20 million for the project, which will enable researchers to share brain images via a high-speed network. (UCSD release)

**

HAM RADIO IN SPACE: FREE UPDATED TRACKING SOFTWARE

An updated version of the PREDICT satellite tracking and orbital prediction program is now available. This latest updated corrects some errors that have caused instability under certain conditions in the past. The program's documentation has also been updated, and new versions in Portable Document File and HTML have been added. PREDICT is free software.

The latest DOS version may be downloaded from ftp://ftp.amsat.org/amsat/software/PC/tracking/predict2.zip >. Further information on PREDICT software is available at http://www.qsl.net/kd2bd/predict.html.

Also, new Linux version is currently being prepared for release as well. (KD2BD)

**

INTERNATIONAL - SOUTH AFRICA: NO HT’S IN THIS CAR

Radio Amateurs in South Africa can no longer use a hand held radio in a vehicle unless its attached to a hands free operating system. This is the result of a new law that says that no person will drive a vehicle on a public road while holding a cellular telephone or any other communications device in one or both hands.

To operate mobile, hams and non hams alike now must use a radio permanently mounted in the vehicle and adapted to hands free operation. The law permits mobile radio operators to use such devices as a permanently mounted microphone and speaker or other specialized gear to comply. (SARL, Q-News)

**

INTERNATIONAL-UK: MARCONI 100TH ANNIVERSARY

The 100th anniversary of the reception of the first trans-Atlantic radio signal by Guilermo Marconi at Signal Hill in St. John's, Newfoundland, takes place on Wednesday the December 12th. In celebration, a number of United Kingdom special event stations will be active to commemorate the event.

Most of the operations will take place on the 12th of December itself. Even Great Britain’s Radiocommunications Agency is getting into the act. It will be operating GB100WT from its laboratory site at Whyteleafe, Surrey, during part of December including, they hope, the full 24 hours of the 12th of December. The Radiocommunications Agency expects to be operational on the High Frequency bands as well as 2 meters and 70 centimeters. The station will be operated by Radiocommunications Agency staff in addition to members of local radio clubs and will welcome QSOs with stations worldwide. (RSGB)

**

RADIOSPORTS: WRTC-2002 REMINDER AND UPDATE

A reminder that the next World Team Radiosport Championship will take place next July in Finland. The games will be hosted by the Finnish Amateur Radio Society and the Contest Club of Finland. WRTC brings together over fifty two man teams made up of the best contest operators from around the world. The actual on-the-air competition pits two man teams operating from a common geographic area using identical equipment, power and antennas.

To get a good idea of what goes on at the World Radiosport Team Championship games, film-maker Dave Bell has produced a half hour documentary video titled “The Ham Radio Olympics.” Its priced at only $19.95 and is available on video CD or VHS tape from the American Radio Relay League. More information is on the web at www.arrl.org. (WRTC, ARRL, W6AQ)

**

DX

In D-X, word that wore torn Afghanistan is back on the air following the ouster of Taliban forces from most of that nation. Q-News Graham Kemp, VK4BB, is back with the details:
--
Graham Kemp VK4BB:

“World traveller Peter Casier, ON6TT (5X1T), has been in Afghanistan for the last few days and has now obtained permission to operate in this worn torn nation.

On November 21 he was QRV as YA/ON6TT/M operating in a convoy. The foreign ministry of the Islamic Republic of Afghanistan (Northern Alliance) issued the call YA5T, which can be used on all bands by Peter, ON6TT, Matts, SM7PKK, and Robert, S53R.

Wayne Mills, N7NG, will have to look at the permission, once it is received. His initial reaction was that it should be good for DXCC. Peter will hopefully be contacting Wayne and submitting the documentation. Meantime, look out for these three operating as YA5T.”
--

And late word from the ARRL's DXCC Desk is that it has already received acceptable documentation for YA5T and has approved it for credit. (Q-News)

Several DX newsletters report that N6TJ is active as ZD8Z from Ascension Island again. He is expected to be there through the 18th of December. QSL as directed on the air. (OPDX, Modern DX'er)

Lastly, word that high seas have forced the Ducie Island DXpedition team to abandon its already-delayed effort to reach that DXCC entity located in the South Pacific. According to the RSGB, the team was some 80 nautical miles from its destination and facing high seas when the decision was taken to turn around and head back to Pitcairn Island. (GB2RS)

**

THAT FINAL ITEM: STRANGE SCIENCE - FAT BIRDS FLY BETTER

About twice a year we bring you stories about radio tagged migratory birds. In most cases its those ever elusive Burrowing Owls. Now we have a totally different kind of bird story. It still involves radio tracking, but this time to see if bigger birds or smaller birds have a better chance to survive in flight. Amateur Radio Newsline's Joe Moell, KO0V has more:

--
European scientists have discovered what seems like a contradiction about migrating birds. They found that the fatter the bird, the more efficiently it appears to fly.

Researchers at Lund University in Sweden have studied several small species including the Red Knot. In our hemisphere, these 20-ounce wading shorebirds travel 18,000 miles every year, to the tip of South America and back to the Arctic. On the way north, they stop on the shores of New Jersey to feast on the eggs of horseshoe crabs, to build up energy for the last 2000 miles of their northward trip, which they make non-stop. On these binges, the Red Knots can double their normal body weight.

Over the past few years a number of European Red Knots were radio tagged and tracked by the Swedes as they prepared for a similar trip between the British Isles and the Russian Arctic. The study indicates that building up of fat deposits to be burned as fuel during the migration is more than worth the energy that it takes to carry the additional weight. The heavier birds apparently use their muscles more efficiently. Just why this is so remains a mystery. Even stranger is that the results seem to 'fly in the face' of a central theory of aerodynamics -- no pun intended of course.

So what does this have to do with ham radio? Well, it points out that research always seems to yield unexpected results, and it gives me a chance to remind you that dozens of ham operators in western states are listening for the VHF radio tags on endangered Burrowing Owls this winter. You could help out too. Find out by visiting my Web site -- www.homingin.com. Who knows, maybe a ham will make a similar startling discovery about the migration habits of these unique critters. That's homingin -- one word -- for the Web site, homingin.com.

For Amateur Radio Newsline, in southern California, this is Joe Moell - K-zero-Oscar-Victor saying, "no jokes about birdbrains, please."
--

All of this really goes to show that the more mankind uses science to discover the secrets of Mother Nature, the more amazed man is at what he learns. (Ecology Today)

Look at the current Reader's Digest. (the one with the interview with Ali.)
It has a shot of the antenna leaning against a light pole. They were using
it as a flagpole to hold an American flag that was found in the wreckage.

3769. Can a misconfigured transmitter antenna array cause bad AM reception?

Newsgroup: rec.radio.broadcasting
Date: 2001-12-19 13:34:42 UTC
From: Robert Casey <wa2ise@ix.netcom.com>
Message-ID: <u215ribskjjgfe@corp.supernews.com>
Source record: 12730

I noticed something strange about my reception of WSNR Newark
620 near NYC. At home my radios' reception sound as if I'm
hearing a single side band transmission (ie, not enough carrier
for an AM demodulator to demodulate the audio correctly).
Other stations sound fine, so it's not the radios. In the car
I took a trip of about 5 miles for another purpose, but I
tuned in WSNR to see if reception varied across town.
It did, some places WSNR sounded fine, other places
sounded bad. Could a misconfigured or broken tower
array make constructive and distructive interference patterns
to cause carrier suppression and thus make reception bad?
(Think of those interference patterns you saw in your high
school or college physics book). The interference patterns
will differ for different frequencies across the bandwidth
of the station's transmission spectra. If the carrier gets
nulled out, then you'd get bad demodulation from an
envelope detector (which most AM radios use).

How do they hook up multiple towers to avoid this
anyway? According to the FCC web site, WSNR
has 7 or 9 towers.

Hello, the "HF Archive" website is back online at
http://www.mediasuk.org/archive. In this website you can find
informations and photos of italian shortwave stations. Here is a partial

list of the broadcast and utility station listed in the site:

Rai - Shortwave Center Prato Smeraldo - Roma
AWR - Shortwave Center Forl&#65533;
Rai - Long Wave and SW Center - Caltanissetta
Rai - Medium Wave Center - Santa Palomba
Rai - Medium Wave Center - Sanremo with the new CFA antenna !!

Coast Station IAR Roma Radio
ICI - IRM Station
Coast Guard Roma
Coast Station IPP Palermo Radio
CIRM - Radio Medical Service Station IRM

Our url is http://www.mediasuk.org/archive

Best Wishes, Andrea

That doesn't sound right.

Why would that not make a great photo?

Especially since the New Yorkers without full power tv signals would at least like to see the antenna being put to some good use.

As much as I have always admired the Empire State Building more than the WTC, I still liked the signals off 1WTC better.

When I see my old friend in pictures, Empire seems to have lost some of the luster it had. It looks saddened by the loss of its younger twin brothers.

Yes, we certainly did have to have a separate licence for radios in
cars. It was abolished circa 1968 (don't quote me on that). There was
also a separate mobile amateur radio licence (additional to the main
station licence) which indicated the licence registration number of the
vehicle. I will have mine somewhere in the archives, for HSG 872, a 1954
Ford Prefect.

AMATEUR RADIO NEWSLINE(tm) REPORT #1270 - DEC 14th, 2001

Amateur Radio Newsline report number 1270 with a release date of Friday, December 14th, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T. are first on this weeks Amateur Radio Newsline report number 1270 coming your way right now. Who will be the next space tourist and will he operate from the I-S-S? This story is first on Amateur Radio Newsline report number 1270 coming your way right now!

(Billboard Cart Here)

**

HAM RADIO IN SPACE: ANOTHER TOURIST TO THE ISS

Could there be another ham radio space tourist headed to the International Space Station? Well the ham radio part is not yet known, but NASA and its partners in the I-S-S have agreed in principle to let a 28-year-old South African become the second paying tourist on the orbiting outpost. Amateur Radio Newsline's Roy Neal, K6DUE, has more:

--
The International Space Station may get its second paying customer next April. South African businessman Mark Shuttleworth has signed a contract with the Russian Aviation and Space Agency to buy a seat.

Kirsten Larson, a spokeswoman for NASA, has confirmed tentative agreement with the various space agencies that would allow him to fly. Shuttleworth is to go up to the I-S-S on a Russian built Soyuz. The arrangement was negotiated by Space Adventures, an American company in
Arlington, Virginia. That's the same outfit who made the arrangements for Dennis Tito, the first space tourist. Tito, KG6FZX, was allowed to get on the ARISS radio while he was up there and created quite a stir on 2 meters.

Mark Shuttleworth is not licensed at this writing but has said that he plans to be more than just a tourist looking back at earth. He has said he will take part in a number of scientific experiments. It's not too far fetched to suggest that he may be talked into taking the time to get a ham license, time permitting, as he trains for the flight. He will have to train extensively to meet rigid standards before getting final approval. If all those ifs go together, next year ham radio may have its second tourist in space to talk to and about.

For the Amateur Radio Newsline, this is Roy Neal, K6DUE

--

Ironically, the proposed date of Shuttleworth’s visit to the I-S-S would be almost exactly a year after Dennis Tito made his visit. That flight last April raised objections at the National Aeronautics and Space Administration about his fitness and training. No such problems this time around. (ARNewsline(tm) from various sources)

**

HAM RADIO IN SPACE: ISS CELEBRATES MARCONI

The International Space Station's returning skipper marked the 100th anniversary of the first trans-Atlantic wireless contact by chatting with youngsters at the exact spot history was made. The contact took place on Wednesday, December 12 th as the station, docked with the shuttle Endeavour soared over the North Atlantic, off the Newfoundland coast.

During the short QSO, outgoing station Commander Frank Culbertson, KD5OPQ, used two meter F-M to speak to teen-agers gathered at the Signal Hill National Historic Site of Canada in St. John's, Newfoundland. Culbertson managed to answer 10 questions from the students before the I-S-S flew out of range.

One of the questions asked of Culbertson was how he bathes and brushes his teeth in orbit. Another was how he gets along with his crewmates in such close quarters, and whether he misses home.

His answers? KD5OPQ told the youngsters that uses damp cloths and no-rinse shampoo, that he swallows the toothpaste since there's no sink, that he gets along fine with his colleagues, and sometimes does wished he were home.

The contact was facilitated by ARISS – Amateur Radio on the International Space station as part of an educational program at Signal Hill celebrating Guglielmo Marconi's success in receiving a wireless signal. That transmission came from Cornwall, England, on December 12, 1901 and consisted of nothing more than three dots. That’s the letter S transmitted in Morse code.

For the Amateur Radio Newsline, I’m Mert Garlick, N6AWE. Jim. (AMSAT-BB, AJ9N and ARNewsline(tm) from published news reports)

**

HAM RAIO IN SPACE: NEW HAMSAT IN 2002

Look for a new ham radio satellite to be launched in 2002. The new bird called Kolibir-2000 is a Russian and Australian School joint scientific and research microsatellite.

Miles Mann, WF1F, of MAREX reports that the new bird will be taken to orbit during a Russian a cargo mission to International Space Station. Kolibir-2000 will then stay in space attached to a remote port before being launched. (AMSAT-BB)

**

ENFORCEMENT: FCC SAYS IT WILL NOT INTERVENE IN ALABAMA NETMESS

The FCC's Enforcement Bureau has in refused to take sides in a dispute between several nets wanting to use essentially the same frequencies on the 75-meter band. The bickering had pitted the Alabama SKYWARN Net , the Alabama Traffic Net, the and the Country Cousins Net against a newly formed informal gathering of hams in another loose knit network.

The Alabama SKYWARN Net, the Alabama Traffic Net, the and the Country Cousins Net have long operated between 3.965 and 3.970 MHz. The informal group decided to try to use the same spectrum. That’s when the dispute erupted and everyone wrote to the FCC. After reading the complaints, Special Counsel for Amateur Radio Riley Hollingsworth told all four that it was really up to them to solve the problem, and to do it without breaking any rules:

--
Hollingsworth: “We issued a letter to all parties in a 75 meter interference dispute and we warned all parties and [also] attempted to explain what incidents were enforcement problems and what activities were just poor Amateur practice and degrading the entire service.”
--

Hollingsworth’s response went to Henry Willmon, WA4GQS, Sal Viglione, W4SAL, Jeremy Jackson, K9CNI, and Alabama ARRL Section Manager Bill Cleveland, KR4TZ. (FCC, RAIN)

**

ENFORCEMENT: FCC WARNS UNCOORDINATED REPEATER OWNER AND HIS USERS

The FCC has again written the operator of an uncoordinated Southern California repeater about ongoing interference. Again the FCC’s Riley Hollingsworth:

--
Hollingsworth: “We issued a second and final warning to a Los Angeles California licensee; Angos Winke, KC6OKA, about operating an uncoordinated repeater that is interfering with the coordinated repeater W6IER. {This is] a repeater operated by the Inland Amateur Radio Club.
That licensee will also be receiving a letter from the Los Angeles office prohibiting him from using Automatic Remote Control for the repeater.”
--

That means the system can only be on the air when there is a control operator present and that ham will be held responsible for any interference caused by the repeaters transmitter.

But that’s not all. The FCC has also sent letters to several users of the uncoordinated repeater a warning of their own:

--
Hollingsworth: “We sent warning notices to five licensees in the Southern California area concerning operation on the coordinated repeater I mentioned a moment ago: The one that is causing interference to W6IER. This is in addition to the action mentioned about taking the licensee off of Automatic Remote Control. And we warned them about interference to the coordinated repeater.”

--

Each of the letters says essentially the same thing. That the FCC has information indicating that interference to the repeater has been occurring from each of the users stations through a repeater on the same frequency as W6IER, but one that uses various call signs. It warns the users that continued interference to the W6IER repeater could result in a monetary forfeiture of up to $7,500. Also, depending upon the evidence, revocation and suspension issues might also be warranted. (FCC, RAIN)

**

BREAK 1

This is ham radio news coming to you from the United States of America. we are the Amateur Radio Newsline, heard on great bulletin stations around the world, including the Broward Amateur Radio Club net serving Ft. Lauderdale Florida and vaccinate.

(5 sec pause here)

**

FCC: FCC LIBRARY CLOSED TO THE PUBLIC

Effective December 5 th and until further notice, the FCC Library is closed to the public. This action is said to be necessary because the Commission is using a portion of the library to temporarily house FCC employees. More information is on the web at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-218204A1.doc (CGC Communicator, FCC)

**

RADIO DISASTER: MISSOURI TOWER FALLS

A 1,627-foot broadcast tower near Springfield, Missouri toppled to the ground Friday morning November 30th from the weight of a foot of ice from several days of freezing rain. According to a report from KYTV the 33-year-old tower collapsed on itself like an accordion.

No one was around and the damage was confined to the area around the transmitter building at the base of the tower. No engineers were in the transmitter building when the accident occurred.

KDEB television and KTXR-FM were the resident broadcasters on the tower which was owned by American Tower of Boston. The total height included the 1,560-foot tower plus the antenna on top of it. The loss could cost American Tower or KDEB millions of dollars. (Listener reports)

**

HAM RADIO HELP: THANKSGIVING BASKETS

On a much happier note, a group of Indiana hams make the news this week for their generosity. Amateur News Weekly's Jack Parker, W8ISH, tells us that the radio amateurs recently brought some holiday cheer to those who might not otherwise be able to celebrate:

--
Thanksgiving came early for many residents of Hamilton County. A half dozen Hamilton County Amateur Radio operators helped to deliver over 200 Thanksgiving food baskets to shut-in residents across the county.

This is an annual project headed up by John Wadsworth AA9KB. The food baskets are arranged by the local chapter of the American Red Cross.

Reporting for Amateur News Weekly, I'm Jack Parker, W8ISH.
--

Jack says the Hamilton County hams will be back again next year. (ANW)

**

HAMVENTION 2002: FORUMS SCHEDULE ANNOUNCED

If you are thinking about attending the 2002 Dayton Hamvention, then go its website and click on the Forums area. Forums Chairman Jim Ebner, N8JE, says that the initial schedule for next May's Dayton Hamvention group discussion sessions is now on line and Amateur Radio Newsline's Don Wilbanks, KC5MFA, takes a peak:

--

As previously announced, the theme of the 2002 Hamvention is Emergency Communications. In keeping with the theme, some of the highlights include Gordon West WB6NOA explaining how use of the Global Positioning System. Gordo will also show how it offers hams the ability to know where they are and describe where they are to better than a foot. That's very important information to have on hand when working an emergency situation.

But that's not all. Also on hand will be John Mc Hugh, KU4GY, the Coordinator for Amateur Radio National Hurricane Center, W4EHW. Mc Hugh will show the volunteer public service work of the gang at W4EHW, and the inside workings of the National Hurricane Center in Miami.

KU4GY will also detail two exciting projects called CARMEN and CWOP that they are working on in conjunction with NOAA. What are they? You will have to attend his session at Hamvention 2002 to find out.

Vermont's Mitch Stern, W1SJ, will also be there to talk on techniques used by the best operators involved in emergency communications. This session will also include information on the proper way to communicate during emergencies. Also hosting a session will be Mid-Cars on the importance of mobile to mobile and mobile to base communications are during emergency times.

Amateur Radio Newsline will also be there once again hosting the Live Town Hall Meeting. Bill Pasternak, WA6ITF, will moderate a session on Ham Radio Emergency Communications in the 21st Century titled Looking to Apply What We

Have Learned From the Past.

And also look for the most popular sessions including Carole Perry's Youth Forum and Joe Eisenberg, K0NEB, with the latest in kits and how to build them.

This and a lot more happens May 17th 18th and 19th at the HARA Arena in Dayton Ohio. We will see you there.

For the Amateur Radio Newsline, I'm Don Wilbanks, KC5MFA.

--

Want to know more? The latest information on Hamvention 2002 is always on the web at www.hamvention.org. (DARA, ARNewsline(tm))

AMERICA AT WAR: RELIEF FUND GROWS FOR WTC VICTIM'S FAMILIES

A relief fund, established to benefit the families of the six broadcast engineers and technicians lost in the collapse of the September 11th World Trade Center has begun providing aid to the families of those killed in the terrorist attack. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

--

The Portland Oregon S-B-E electronic newsletter says that soon after its inception the S-B-E sponsored fund began drawing the attention of individuals and companies from across the country. And as of November 1st, almost $50,000 had been raised to assist their families of those who lost their lives in the collapse of the World Trade Center.

The fund that was started by the Society of Broadcast Engineers and the Ennes Educational Foundation Trust. Initial checks to the nearest family member of all six men were sent by October 31st. Eventually every penny off the money raised will go to the families of the victims. This is because the fund is all volunteer. There is no overhead of any kind involved and there is also no restriction on how the recipient may use the money.

In Los Angeles, I'm Biill Pasternak, WA6ITF, reporting for the Amateur Radio Newsline.

--

If you are interested in contributing, checks should be made payable to the Ennes Educational Foundation Trust and mailed to the Society of Broadcast Engineers, Inc., 9247 N. Meridian Street, Suite 305, Indianapolis, Indiana 46260. Mark your check to the attention of the Relief Fund. (Portland SBE)

**

TECHNOLOGY HONORS: FIRST ROTARY SPEED DIALER TO SMITHSONIAN

The developer of the first speed-dialer for rotary phones has finally been honored forty years after developing the unit. Pennsylvania inventor Vincent Iannucci spent two years developing the world's first speed dialer for rotary phones. The motorized device stored numbers and could dial up ten digits with the push of a button. It was nearly ready for the market in 1961, but production was disconnected by Bell Telephone Lab's after the development of touch-tone phones.

Iannucci put the prototype on his desk and used it until his own company changed over to the tone dialing system. He was going to throw it away recently, but a relative suggested he offer it to the Smithsonian. Now it's joining the museum's collection of electro-mechanical devices. (Science Online)

**

ELECTRONIC SAFETY: LIGHTING RECALL

A South Carolina lighting company has recalled over 10,000 fluorescent lights because they are improperly wired and pose a fire hazard. Progress Lighting, of Spartanburg, has received two reports of the fluorescent lights smoking and smoldering, according to the Consumer Product Safety Commission. No injuries have been reported.

The recalled fluorescent ceiling and bathroom lights were sold in various shapes. The label on the light contains the manufacture's name, the manufacture date, and a catalog number. Consumers are advised to using the recalled lights immediately and contact Progress Lighting. The company can be reached at area code 866-696-8593 between 8 a.m. and 5 p.m. EST Monday through Friday. More information is on the web at:
www.cpsc.gov/cpscpub/prerel/prhtml02/02036.html (Press release)

**

HAM RADIO IN SPACE: AMSAT ON-LINE SURVEY

AMSAT-NA has developed a new on-line volunteer survey, designed to identify the interests and skills of those who may be available to directly help in efforts to develop the amateur satellite program. The survey was developed by a committee led by AMSAT North America
Vice-President and Government Liaison Perry Klein, W-3-P-K and is designed to be completed and returned on-line and takes only a few minutes to fill out. To request the survey, simply send a e-mail request to volunteer@amsat.org (AMSAT-NA)

**

HAM RADIO IN SPACE: AO-40 UPDATE

A scheduled attitude shift that is necessary to compensate for unfavorable sun angles, will leave the Oscar 40 satellite's antennas pointing away from earth until next spring. The adjustments will lead to a transponder shut-down period that could start as soon as late December. The satellite is currently in a long period during which earth eclipses the sun near perigee - its point closest to earth. Like most satellites, Oscar 40 relies on solar panels for its power. (AMSAT-NA)

**

DX

In D-X, Eddie Seymour, WB4MLE reports a really neat opening on 6 to Europe the morning of December 5th. From 1400 to 1500 U-T-C, Eddie, operating from grid EM72 heard or worked SP, DL,YO, 9A, S5, ON, OK, 4N, G and GW. This, as 6 meters defies the experts and stays the D-X band that just won’t quit. (VHF Reflector)

A new 2-meter propagation study beacon is being established at the Poldhu Amateur Radio Club in the United Kingdom. It is located 8 kilometers south of Helston in Cornwall and operates under the call sign GB3SSS will operate on 144.407mhz. Output power is 25 watts to two 8-element stacked Yagis beaming at 284 degrees. It is hoped to increase the power to 100 watts later. For further details please contact the beacon keeper, Mr. L Davey-Thomas, G3AGA, at his callbook address. (GB2RS)

Meantime, a bit lower in frequency look for the Council of Europe Amateur Radio Club. It plans to be on the air as TP5CE on the 14th to 16th of December, including the ARRL 10 Meter Contest. Outside the contest the main activity will be on all bands RTTY and CW. (GB2RS)

And PY8IT will operate as PYZ0FT from Fernando de Noronha between the 12th and 18th of December. He will concentrate on RTTY and PSK31. In both cases, QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: AUDIO TIME TRAVEL

And finally this week, some words about time travel, Amateur Radio Newsline, our predecessor Westlink Radio and the audio history of ham radio since 1976. That’s the year that Westlink Radio started to bring you the sound of ham radio from around the nation and around the world. And believe it or not, we still have almost every newscast tape we ever aired. In fact, we are in the process of archiving them and we have found a lot of moments that should not ever be forgotten. Moments like this from November of 1983:

--
Audio Here: W5LFL from space
--

That was United States Astronaut Owen Garriott, W5LFL, making the first ever manned ham radio contact from space. Its a part of our history as hams and as a nation and needs to be remembered. So for the next few weeks we will let you relive the time that W5LFL spent orbiting the Earth and making ham radio

history. Here’s how.

As you know we recently began providing our newscast audio as a downloadable Real Audio file from our own website at www.arnewsline.org. All you need to do is click on the newscast number at the top of the page to reach the FTP site. Now, when you go there, you will also find another audio file outlined in bright green. Its called the Newsline Extra and all you need to do is to click on the word download and it will soon be in your Real Audio equipped computer, ready to play.

In the coming months as we archive more and more of our older Westlink Radio programs we will try to bring you the best of them. Meantime, we hope you will enjoy this December 11th 1983 ham radio in space retrospective hosted by Amateur Radio Newsline’s Robert Sudock WB6FDF and featuring the story of ham radio space pioneer Owen Garriott W5LFL. (ARNewsline(tm))

>Ahh. Wasn't the mast/tower/antenna something over 300 feet tall?

Well, I went back and looked. First of all, it looked like part of
the mast, not the whole thing. Secondly, there was a small flagpole off of it.
But it had the look of the mast, and IIRC the caption indicated that it was.

>>Look at the current Reader's Digest. (the one with the interview with Ali.)
>>It has a shot of the antenna leaning against a light pole. They were using
>>it as a flagpole to hold an American flag that was found in the wreckage.

You have your answer...all those towers are in order to have this
pattern...

http://www.radio-locator.com/cgi-bin/pat?call=WSNR&band=AM&status=L&hours=D

All those phasing tricks are somewhat frequency dependent, so
as you drive into the nulls one sideband will tend to go away
first, then the carrier, then the other sideband (at which point the
sound will be normal again) until you hit an area where it rises
again, and the same sequence happens.

Why do the radiation plots on http://www.radio-locator.com differ from the
Kodis page (assuming the Kodis plots weren't backwards)???
Tonight was my first time checking radio-locator.com.
While they state that some FM's have directional antennas, they don't seem
to plot directional FM's. The FM coverage plots seem to assume that they
are omni.
Otherwise, great site..

Hi Robert,

I wonder what's with these stations on 620 kHz, back in the 90's I used to have a similar problem with a station on 620 kHz, that I no longer listen to, so I don't know if they still have the problem or not. I am located off the back side of their pattern, at a distance of about 42 miles, and noticed the problem only with the day pattern, which was interesting, as it uses fewer towers, and is somewhat less aggressive than the night pattern. Reception was OK at my home, but if I drove either East or West from my home, perpendicular to the line between the transmitter and my home, I would encounter areas of severe distortion. I assumed that this was due to greater attenuation of the carrier than of the sidebands in certain directions, caused by a narrow band antenna array. An engineer I know, who had done some work for the station, and who lived to the West of me in an affected area, said he noticed the same problem with the day pattern, and called it something like "sideband twist". I didn't ask him exactly what he meant by "sideband twist", but I assume he meant that the it was not so much that the carrier was attenuated relative to the sidebands, but that the phase relations between the carrier and the sidebands were messed up. I talked with an engineer at the station, and he denied that there was any problem at all.

I don't think this problem, or your problem with WSNR, is so much a matter of a "misconfigured or broken transmitter antenna array", as it is an inherent problem in the basic design of the antenna array. I don't know if it relates to the problem with the day pattern, and lack of a problem with the night pattern, but while I am in a relatively high signal strength part of the day pattern, it is a part of the pattern with a steep slope between an area with relatively little attenuation, and the minimum of a null area. The night pattern, where I don't see a problem, is interesting in that there nulls to each side of my direction, and I am located just about in the center of a narrow pattern maximum between the nulls. I have to wonder if there is a relation between the rate of change of the patterns attenuation at any location, and the degree to which the relative carrier phase/amplitude is messed up?

Have you looked at the actual patterns WSNR station is using, and what your location is relative to them? It also isn't clear which antenna system shown in the FCC records WSNR might be using currently, I see at least three different antenna systems shown, the "licensed" one, one with a "construction" permit, and "applications" for one or two more. It seems to me I remember a fairly recent mention in this group of the problems WSNR was having with getting a decent replacement antenna site, so I assume the construction permit was never built, and they are trying to get approval for another location?

Regards,

John Byrns

Last time I looked the "Kodis" page had a bug which switched the X and Y
axis values, giving plots that are flipped about the 45 degree axis. Also
the "Kodis" page just plots the unattenuated field strength at 1 kM, while
the "radio-locator" page seems to take ground conductivity into account
and plots three field strength contours, although they don't seem to say
what three field strength values they used. There also seems to be a bug
in the math on the "radio-locator" which only shows up on certain
stations. I found one station whose night pattern was completely
scrambled by the "radio-locator" page. I am going to try a few
experiments to see if I can figure out what characteristic of the FCC
pattern data is tripping the "radio-locator" up, I suspect I can guess
what it is.

The 9 tower array appears to be a "straw man".

The real array is to be 7 towers on a very compact site, which requires an easement over adjacent properties for the installation of the ground system.

He probably means that the bandwidth is poor in one or more towers (or the entire array) and the array performance in the nulls causes lots of distortion.

Since the bandwidth is too narrow, the sidebands would indeed be screwed up on one or more towers (or the entire array).

Peter.

>>

The Kodis site was reworked about a year ago.

A big mistake was made in rendering the patterns during said rework of the
site.

They are all mirror images of the real patterns. But in addition, they are
rotated by 45 degrees.

At least on all AM and TV directionals I sprcifically examined, and for which I
have independent enginerring data for.

Also, the RMS is not listed, plus the min and max are with respect to the
(unlisted) RMS, therefore the plots are both invalid as to pattern size and
pattern orientation.

One could get the correct data from the FCC site, but that data has been
temporarily removed because it was incorrect, too, in the latest rework of the
FCC site.

This silliness has been going on for years with this station. There's good information about it at Scott Fybush's site. I believe it was in the Dec 10 issue, which isn't up at http://www.bostonradio.org/nerw/index.html yet.

I think you'll find that the people who now maintain Kodis have some of
the plots messed up.

> Tonight was my first time checking radio-locator.com.

You are right, which I think is more that a bit embarrasing for an MIT
product.

> Otherwise, great site..

Try to find WJTM 88.1 MHz, try to find any LPFM which has been issued a
CP [WEES, WRYR,...]. They think that WWTL is in Poolesville, while it
probably won't move from Walkersville for a LONG time.

I've seen it list CPs but it seems to omit dual-frequency stations, like
WRDW 1630 Augusta GA, a source of Imus for most of the East Coast on that
frequency.

On distortion, try a receiver with synchronous detection and see what happens.
(Cheapest one, Sony 7600G[R]).

Nope. I dunno if there's a jpeg on it yet, haven't checked.

No. I just looked at the picture in the Ali issue of Readers Digest. It's not obvious to me that the picture is of any remnant of the antenna mast, but I have to say I can't tell what the hunk of metal is from if not the mast. The top of the remnant has some elements that look like they could have been part of a UHF transmitting antenna formerly enclosed in a cylindrical shroud. Other than that, it's really hard to tell either way.

To me that looks like a fire engine with its ladder fully extended,
behind the traffic light pole holding the Flag. That's a different
ladder than the one the fireman is using to install the Flag

I doubt that the TV broadcast antenna structure could have
survived the collapse a thousand feet down. In recognizable
large pieces,

AMATEUR RADIO NEWSLINE(tm) REPORT #1271 - DEC 21, 2001

Amateur Radio Newsline report number 1271 with a release date of Friday, December 21st, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T. A national ham radio society is asked to train new hams for government service. This story is first on this weeks Amateur Radio Newsline report number 1271 coming your way right now.

(Billboard Cart Here)

**

THE EDUCATION SCENE: HAM TRAINING LEADS TO SA GOVERNMENT JOBS

A government agency has asked a national ham radio society to help train new hams. The reason. careers with that agency. Its happened in South Africa as we hear from Q-News Graham Kemp, VK4BB:

--

In South Africa, their Department of Communications contacted the SARL with the request to train seventeen post graduate students as amateur radio operators. These students had already qualified in different fields, some technical and some in the Information Technology fields. There were nine ladies and eight men. From next year they will be employed by the Department of Communications, and the idea was to give them some experience in the field of radio communications.

Training was done by Henry Chamberlain, ZS1AAZ, over a period of one full month. In addition to lectures, the students could see practical demonstrations of amateur radio and they spent one period building and testing a Morse Code practice oscillator. They also visited ZS1AAZ's home shack. The seventeen students had already proved their ability by passing their previous studies successfully. It was therefore no surprise that they ALL passed the amateur examination.

For the Amateur Radio Newsline, I’m Graham Kemp. VK4BB, of Q-News.

--

The seventeen will be assigned specific jobs with the South African Department of Communications in early 2002. (SARL, Q-News)

**

SPECTRUM SHARING: FCC SAYS YES TO HIGHER POWER UNLICENSED TRANSMITTERS AT 2.4 GHZ

The FCC has approved issued new rules permitting certain unlicensed Part 15 devices operating between 2405 and 2450 MHz to use higher power, but under significant restrictions. The band is allocated to amateurs on a co-secondary basis. Amateur Radio Newsline's Norm Seeley, KI7UP, takes a look at the FCC action:

--
According to the C-Q Magazine website, the decision was adopted on December 11Th. In it, the FCC approved a petition by Sierra Digital Communications, Inc. to permit unlicensed fixed point-to-point transmitters in the band to operate at field strengths of up to 2500 millivolts per meter. This is a tenfold increase over past power limitations.

Sierra Digital Communications manufactures and sells equipment for wireless data communications, including high-speed wireless computer networks and Internet links. The ARRL had opposed Sierra's petition on the basis of increased risk of interference to amateur and amateur satellite operations. This is because the downlink from the AO-40 satellite is in the 24 GHz band.

But the FCC said it believed the restrictions it is imposing on the higher-power transmitters will provide sufficient protection to other users. This includes industrial/scientific/medical equipment, radar and Earth exploration satellites, in addition to amateur radio. The new rules require highly directional antennas and high frequency stability of transmitters.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

In its decision, the FCC singled out an ARRL comment where the League clamed that Part 15 devices are permitted by the Communications Act of 1934 only where they have no interference potential to licensed services. The Commission called the League's interpretation of the law overly conservative. It said that its rulings to date appropriately provide a means for allowing unlicensed devices to share spectrum with licensed services with little risk of interference and adequate protection to licensed service. (CQ)

**

HAM RADIO AND THE WAR: MARS ON THE AIR FROM THE WAR ON TERROR

Ham radio is making it possible for those fighting the war against terrorism to phone home. This as the ARRL Letter announces that Army Special Forces on duty in Islamabad, Pakistan, and in other undisclosed locations have begun keeping in touch with home via MARS -- the Military Affiliate Radio System.

Phone patches provided by the Military Affiliate Radio System make it possible for troops to call their families in the US from areas where commercial communications channels are not available. Amateur Radio operators enrolled in MARS provide the connection between the Military Affiliate Radio System stations deployed overseas and the telephone system back home.

During the Vietnam War, phone patches were a major source of comfort to families and service members alike. MARS also responded during Operation Desert Storm. (ARRL)

BREAK 1

Wishing you a Happy Holiday from the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world, including the Great South Bay Amateur Radio Club repeater, W2GSB, serving West Babylon New York.

(5 Sec Pause Here)

**

HAM RADIO AND THE WAR: GODDARD ARC FEELS THE PINCH

The Goddard Amateur Radio Club says that it has been having serious problems with manpower lately and the war on terrorism is partly to blame. This is because new security restrictions imposed after September 11th require all visitors to Goddard to be escorted by a badged employee at all times.

According to Dan Schultz, N8FGV writing to the Amsat Bulletin Board, the clubs WA3NAN ham shack is located on government property we are bound by the new restrictions. This says Schultz makes it much harder to bring in control operators who are not Goddard employees. As a result, WA3NAN which for years has been the primary rebroadcaster of shuttle communications on the ham bands is not there as often as it would like to be.

Schultz also notes that the Goddard Amateur Radio Club currently has no president because no one has stepped forward to accept the job. The position of Shuttle Retransmission Director is also vacant, this is the person who makes the phone calls to get operators lined up to pull shifts at the retransmission facility.

Schultz says that the long term technical solution will be to automate the station with remote controls and telemetry for the transmitters so that the retransmission operator can operate from his home. But adds N8FGV, but that is still a little ways off in the future. As a result, WA3NAN is not there as much as it used to be. (AMSAT-BB)

**

AMERICA AT WAR: NEW HOMELAND TERRORIST ALERT SYSTEM PROPOSED

Homeland security chief Tom Ridge is considering a multistage system for terrorism alerts. Ridge is also weighing how to reimburse states for the costs of increased security since the terror attacks.

Since the September 11th terrorist attacks on New York and Washington, Ridge has issued three general warnings. None of the alerts identified specific targets.

Now, according to news reports, Ridge will propose a four-stage Threat Alert Network similar to the military's DEFCON'' system. DEFCON alerts military personnel to the seriousness of a threat. A private sector version would be aimed at helping state and local law enforcement personnel determine the level to react to a Federal government issued terror warning.

The proposal came to light after California Governor Gray Davis met with Ridge about a week and a half ago. Davis told Ridge he had proposed such a similar system for California, and said Ridge had asked him to wait pending a national model. Ridge told Davis that he hopes to unveil the national system by January 15th of 2002. Whether or not ham radio will play any part in such an alert system is not known as we go to air. (Published news reports)

**

AMERICA AT WAR: CONFERENCE HELD ON ALERTING THE PUBLIC

Still in there area of alerting the public, more than 120 leaders from the emergency warning community met November 30th and unanimously called for the creation of a public-private partnership. This, aimed at improving the delivery of timely and accurate emergency information to people at risk. Don Wilbanks, KC5MFA reports:

--

The group came together at a special conference arranged by the National Warning Organizing Committee. This is a group of emergency warning advocates representing the public and private sectors.

Those attending included federal, state and local government officials, not-for-profit organizations, and representatives from the private sector. And in the end the group has tasked itself to improve the delivery of warnings and emergency information to the public. This, through better education, research, standards creation and policy recommendations.

The Committee Chairman is David Liebersbach, Director of the Alaska Division of Emergency Services. He has appointed Peter Ward, formerly of the U.S. Geological Survey and chair of a White House-appointed working group on natural disaster information systems, to head up a committee to determine the new organization's structure and governance. Ward also serves as the new organization's spokesman. More news on the work of this committee as information is released.

For the Amateur Radio Newsline, Don Wilbanks, KC5MFA, in New Orleans.

--

The conference was hosted by The MITRE Corporation in McLean, Va. MITRE is a not-for-profit national technology resource that provides systems engineering, research and development, and information technology support to the government. (MITRE)

**

HAM RADIO AND EDUCATION: HAM RADIO MASS BALLOON LAUNCH

The Timberlane Regional High School, in Plaistow New Hampshire will be taking part in a high altitude experiment next spring. This with an announcement that the Coordinated Algebra II and Physics classes taught by Lorainne Mascioli, N1VYQ, and Lou Broad, N1RCA, are planning thier third year of ham radio and high altitude balloons in May of 2002.

Six student teams will attempt to launch their balloons at the Hosstraders Ham Fest at the Hopkington Fair Grounds in New Hampshire. Each team is responsible for design, construction, and operation of their system. Each balloon will carry a GPS receiver, a packet reporting system and several experimental payloads. This could include cameras, video, amateur television and cross band repeaters. At maximum altitude such systems will have a range of 300 miles and should easily cover all of New England and more.

The class has grown to 34 students and they are planning to launch six balloons in a two day period! This could make it a record breaking event in both ham radio and high altitude ballooning. For more information check out the CAPSAT Website located in cyberspace at
http://www.mv.com/ipusers/llb/capsat.html (Via Internet)

**

HAM RADIO SPOTLIGHTED IN POUGHKEEPSIE JOURNAL

New York’s Poughkeepsie Journal has highlighted ham radio in a December 6th front page article. The piece focused on the public service aspects ham radio with quotes and pictures.

According to Andrew Schmidt, N2FTR, who is an ARRL Assistant Director in the League’s Hudson Division, many Poughkeepsie area local hams spent time at Ground Zero or at the Red Cross centers in the greater NYC area following the September 12th terrorist attacks. Andrew says that their work is well highlighted in the article. The link is:
http://www.poughkeepsiejournal.com/thursday/community/stories/co120601s12.
shtml. (Via Internet)

A SPECIAL AM EVENT: THE HEAVY METAL RALLYE

This is Paul Courson WA3VJB with news of an operating event Saturday night, December 22nd. It's the Heavy Metal Rally, featuring big iron, vacuum tubes, and the warm and inviting sound of AM on the shortwave ham bands.

Starting around local sunset listen for rigs in the 250 watt or 250 pound category to populate AM gathering points on 160, 75 and 40 meters.

Jim, W8MAQ was testing HIS 1947 Collins 300-G a few days ahead of the Heavy Metal Rally. The retired broadcast transmitter re-tuned to 75 meters sounded like this:

In-Q: it's been great to get on... 300-G..
Out-Q: forward to that

--

Prizes include a trophy, pictured as a posting on QRZ.com, for the best sounding station.

Last year more than a hundred stations took part -- and the winner was Mike, WN3B, on a Gates 250-C. He gave Jim an audio report the other night:

--
In-Q: It's got more highs....
Out-Q: Shure 55
--

The Heavy Metal Rally is sponsored by Electric Radio, a magazine featuring vintage ham radio, and published by Barry N6CSW. The event was pioneered by Bill, KD0HG of Colorado, a broadcast engineer with a knack for big homebrew rigs that sound great.

Frequencies and a website are listed on the news page of QRZ.com.
Paul Courson, WA3VJB, Annapolis Maryland.

**

HAM RADIO HISTORY: COLLINS RADIO CENTER NOW OPEN

The new Collins Radio Center which is the headquarters for the Collins Radio Association is now officially open for guests and visitors. Located near Johnstown, Pennsylvania, the Collins Radio Center includes a representative collection of Collins radio equipment, from the 1930's to the present. There are other classic and antique radios on display as well. More information is on the web at www.collinsra.com. (Collins RA Press release)

**

HAM RADIO BUSINESS: CITY ELECTRONICS - RIP

Alex Stalinsky, WA5UHT, who owns City Electronics, a small parts outlet in Houston for almost 50 years, has decided to call it quits. According to Chris Boone, WB5ITT, this place was one of the main sources of parts, components in Houston long before the likes of Mouser and Digikey took off in mail order sales.

Chris tell Amateur Radio Newsline that he bought many parts from City Electronics in his early days of repeater building. In fact, Chris says his mother claimed that he owned half of the local Radio Shack but she was wrong. It was really like he was a part of City Electronics as were many other young Houston area hams and Chris tells Amateur Radio Newsline, it will be missed. (WB5ITT)

**

EMERGING TECHNOLOGY: INTELS NEW WARP SPEED CHIP

In another step toward faster computers, Intel Corp. has developed two new technologies that will help the tiny transistors inside microprocessors run cooler, use less power and operate more efficiently. The new designs

complement several recent breakthroughs in building minuscule transistors that form the basis of all modern computing as they switch on and off billions of times a second. Earlier this year, Intel unveiled transistors just 20 nanometers wide. Today's Pentium 4 has 42 million transistors, each about 180 nanometers. For reference, a manometer is about 10,000 times narrower than a human hair. (Intel)

**

EMERGING TECHNOLOGY: DTV ROLLOUT UPDATE

Roughly two-thirds of commercial television stations plan to broadcast a digital signal by a federal government deadline of May 1, 2002. This, according to the National Association of Broadcasters.

In a report to the Federal Communications Commission, the industry group said that many of those that won't make the deadline are waiting for equipment to be delivered and expect to have digital broadcasts on the air in the months afterward. But some stations in smaller markets are having a hard time paying for the upgrade, the association says.

Right now, most home television sets in use receive only analog signals. But congress has mandated that broadcasters must give up their analog channels to the government by 2006. As a result, there are concerns that consumers won't have made the costly upgrade to televisions that can receive digital signals by that date. (Broadcasting Daily)

**

HAM RADIO IN SPACE: EXPEDITION 4 CREW NOW ON THE ISS

An all ham crew is now in charge of the International Space Station and will be for the next six months.

Three astronauts and cosmonauts now running the ISS. They are Russian Commander Yuri Onufrienko, RK3DUO, along with American Flight Engineers Dan Bursch, KD5PNU, and Carl Walz, KC5TIE. They make up what is called the Expedition 4 crew and all three are expected to be on the air regularly for school contacts and possible open QSO times made available to talk with hams worldwide, as time permits.

The Expedition 3 crew comprised of United States Commander Frank Culbertson, KD5OPQ, along with Russian Flight Specialists Mikhal Tyurin and Vladimir Dezhurov is now back on good old Mother Earth. They returned on Monday, December the 17th aboard the space shuttle Endeavour. (AMSAT-NA, ARISS)

**

HAM RADIO IN SPACE: EDUCATIONAL ASSISTANCE FROM VK5ZAI

Attention educators. If you are thinking about teaching the International Space Station, here is a bit of assistance.

Tony Hutchison, VK5ZAI has updated his web pages with links to help schools in obtaining educational programs associated with the I-S-S and space science in

general. Hutchison says that this should be of interest students and teachers alike especially if they are contemplating applying for a ham radio contact with the astronauts on the station.

Hutchison is the Australian ARISS Coordinator. His website in cyberspace at www.electric-web.org (VK5ZAI)

**

SPACE AND SCIENCE: CHINA ON THE BRINK

Space Daily reports that China is getting ready to launch its third unmanned spaceship. This, to pave the way for sending that nations first astronaut into space sometime next year. China is reportedly also in final testing and preparation to launch a new satellite dedicated to study ocean colors and related phenomena. (Space Dailey)

**

DX

In DX, 9V1YC reports that he and eleven other hams will be activating South Georgia and South Sandwich Islands in January and February of 2002. The operation will be strictly on the high frequency bands. Exact dates, call signs and QSL managers are not being made public until the group is actually on the air. The New Zealand registered vessel "Braveheart" of ZL9CI fame will be supporting this team for the entire 30 day trip. (RSGB)

A bit higher in frequency, Jeff Klein, K1TEO reports that December 6th was another great D-X day on the 6 meter band. Jeff who lives in Connecticut says over the VHFReflector that the band was open for a solid two hours beginning at 7:30 am local. And talk about D-X. On his very first C-Q he landed HB9QQ who was operating portable HB0. Even better, Jeff says that the fifth caller was 4X1RF. (VHF Reflector)

Over in Great Britain hams are actually D-Xing for charity. Jeramy Boot G4NJH, reports from Nottingham in the U-K.

--

Every year in September, the British Wireless Fund for the Blind -- a registered charity - organises a fund-raising event in which amateur radio clubs and individuals are sponsored for the number and distance of the contacts that they make. As of the 11th of December, the British Wireless for the Blind Fund reported that 'Transmission 2001' had raised £6681.48, with more coming in every day. They say that they hope the final total will reach £7000. The charity offers prizes to the club and individual raising the greatest amounts.

This year the Cray Valley Radio Society operating as GB2FB and taking part for the first time, won the prizes for the club raising the most money and for making the most contacts. Robert Guscott, M5GUS, operating as GB0WB, won the prize for the leading individual.

Jeramy Boot, G4NJH.

--

The bottom line. This is another way that hams can not only enjoy their hobby, but can help others at the same time. (G4NJH)

**

THAT FINAL ITEM: A HAM RADIO CHRISTMAS STORY

And finally this week, the story that we wait all year to tell you. Its the ongoing story of hams who care about hospitalized children and what they do to bring a bit of holiday cheer to those kids who cannot make it to the mall to spend a few moments with old Saint Nick. Here’s Amateur Radio Newsline’s Joe Moell, K0OV:

--

As most hams know, propagation is very good this time of year. It's so good that it's easy to make contact with the North Pole. Many clubs around the country are taking advantage of these propagation conditions to set up QSOs with a very special North Pole station. They're making these contacts from hospitals and rehabilitation centers, and they sound like this:

--
Santa and Kids Audio Here
--

That's what the North Pole Network sounds like in southern California, where it's celebrating its 25th anniversary at Childrens Hospital of Orange County. In the past few days, I've heard from other clubs in the North Pole Network, including the AkSarBen ARC in Omaha and the Southwest Missouri ARC in Springfield. And YOUR club could bring holiday joy to hospital patients. There's a how-to article on the subject, with a dozen suggestions for your best North Pole Network ever, currently running on ARRL's Web site. That's arrl.org, of course. And there's even more about North Pole Network in southern California, plus lots of photos showing a quarter century of holiday fun, at the Hospital Disaster Support Communications System Web site, www.hdscs.org. Check it out, and start planning for your own North Pole Network joy.

>>
with the kodis plots I can never tell which way I'm looking.
>>

The Kodis site incorrectly flips the pattern 180 degrees, and additionally rotates that flipped pattern CCW.

To visualize the correct pattern, print the pattern on a piece of paper, hold the paper top side up, rotate the paper about its Y axis so you are viewing the pattern through the paper, then rotate the paper 90 degrees clockwise.

They must be using data from the version of the FCC database that is all screwed up. I have found one station whose night pattern is all screwed up. The night pattern of the six tower array should be very directional, but instead it is essentially ominidirectional with a bunch of sharp nulls in it. I saw the same thing with the data that was on the FCC site about a year or so ago, when you looked at the data for the towers, knowing what was correct, you could see how their program was screwing it up. The problem only occured for arrays larger than three or four towers, I forget which, and seems to be fixed with the current incarnation of the FCC site.

3816. World's smallest radio station (?) on-line

Newsgroup: rec.radio.broadcasting
Date: 2001-12-24 05:16:45 UTC
From: radioscilly@aol.com
Message-ID: <u2dehtm3nft2e8@corp.supernews.com>
Source record: 12626

The world's smallest radio community radio station is on-air on 1 watt at 106 FM to the islands on the web each day until Jan 2nd ! Radio Scilly serves 2000 people on the Isles of Scilly, 28 miles off the south west coast of England. Hear us at www.radioscilly.co.uk or http://www.live365.com/stations/278775. Tell us what you think of our community radio station at radioscilly@aol.com!

The "Kodis" plots have the data for the X axis and the Yaxis interchanged. That means to view the corret plot you need to flip it around the 45 degree diagonal running from SouthWest to NorthEast. Or you can mirror it, then rotate it by an amount and direction I can't keep track of, to get the correct plot.

I don't know why the current keepers of the "Kodis" program won't even acknowledge the problem, I guess I can understand reasons why they won't fix it though.

Ben:

Well, that's right. The mast added about 360 feet to the height to 1WTC. So, the mast that is shown in the millennium version of the Iwo Jima flag raising that took place at the wreckage could not possibly be the antenna. I will update my web page and you can have the picture that says it all - just not with the antenna.

I am still looking for it.

BTW, Pinnacle Towers, Inc. is based here in Sa-ra-so-ta. From what I've read they did not manage the antenna, just the roof of 1WTC.

Dear Mr. Conti:

Thanks for your email. Our station broadcasts on CB channel 40 with an ERP of 4 watts. This permits us to annoy truckers and some hams on 10 meters with unselective receivers.

With a "sensitive" crystal set, the signal can be detected for at least 27 feet.

We can't understand why the station has not been sold already! At $150,000 it remains a bargain.

We do not accept Paypal. We accept cash.
(sharp)operators are standing by!

Have a very happy April 1st!

73,

WPIX-FM was a station that during the 70's and 80's liked to make up formats and drop them before they could get popular.

In 1979, they were an alternative rock station. I believe they were calling it "New wave" then they went Top 40 then to Love songs. Our own Rich Wood programed them as the "Pix express" before they went jazz as CD-101.9.

With 'PIX, it was never a dull moment. The local joke was "What format do they have this month."

Among the personalities walking through the doors over the years were Bob Dayton, Dennis Quinn, Les Marjack (spelling?), Jack the Wack, Meg Griffin, many more.

It was the one station I set my sights on if I wanted to work New York. My thought was that they would blow me out at the next format change. I would have been none the worse off.

Thank God I moved to Florida before that insanity took hold. :-)

The Kodis page has been messed up for months. I know John Kodis dumped the code a couple of years ago and others (thankfully) picked it up, but people who messed the code up must know that it's not plotting right. Can't they get it fixed?

As for Radio Locator... we previously talked about the most directional AM array in the US and we (we, meaning our resident expert on AM directional arrays, Peter) came to the conclusion that it was Dallas' 1190 night-time array (don't kow the current calls).. I checked that plot on "radio locator" and the night-time pattern looked way too broad. I also have Neil Adams' "AM Database Viewer" on my PC (a great program) and it correctly plots Dallas' 1190. Why is Radio Locator's plot so far off on that one? Also.. Does anyone know how I can update the FCC database for Neil's software?

Can't tell for sure, but my guess would be no. See the color differences
alternating between where the main flag is and where what might be another
smaller flag right above it? Too much color change in too short a space.
Plus I think the main mast at least was much thicker than that.

Just my 2 cents. I could be full of s**t. :)

I checked that plot on "radio locator" and the night-time pattern looked way too broad.
>>

An M by N array with an M distance of about 210 degrees and an N distance of about 70-100 degrees gives the narrowest pattern (highest main lobe-to-RMS ratio).

The more towers in the M direction, the more directive.

The N direction is usually used to cancel the back-side radiation (exceptions exist, of course).

Perfect cancellation is obtainable if the array is "square" (90 degrees included angle) and if the sub-array in the N direction has no on-axis minor lobe.

Candidates for most directive include:

Costa Mesa, CA's 540 kHz, 3 by 2, 3.119 field gain, 9.728 power gain, 25 kW input days, 21 kW input C.H., 0.25 kW input nights, now dark

Houston's 1070 kHz, 3 by 3, 3.102 field gain, 9.622 power gain, 5 kW nights (days used to be 10 kW into the same array; days now uses 11 towers)

Dallas' 1190 kHz, 6 by 2, 3.900 field gain, 15.210 power gain, 5 kW nights only (days uses a separate site)

Detroit's 1500 kHz, 3 by 3, 3.124 field gain, 9.759 power gain, 10 kW nights (present operation is 5 kW)

Peter.

While it's perfectly true that "Coverage patterns are not the same as antenna radiation patterns", take a look at the Nighttime pattern for WTSO in Madison WI that Radio-Locator displays, and then tell me that there is nothing wrong with Radio-Locator, after calculating the true pattern & coverage yourself.

Regards,

John Byrns

It could be a smaller antenna used for police, fire, taxi cabs or
some such. There also was an amateur radio TV repeater
up on one of the twin towers. The other building most likely
had many smaller antennas on its roof.

Dear Peter:

Well I see you know how to use the FCC database!

We filed December 7th for the transfer of ownership.
As you can see, I told you the truth about the extent
of my ownership.

Have a Merry Christmas

73,

Meyer Gottesman, W6GIV
Macon, GA

While it's perfectly true that "Coverage patterns are not the same as antenna radiation patterns", take a look at the Nighttime pattern for WTSO in Madison WI that Radio-Locator displays, and then tell me that there is nothing wrong with Radio-Locator, after calculating the true pattern & coverage yourself.
>>

The radio locator appears to be applying ground conductivity to the theoretical pattern.

WTSO's night pattern, as shown by radio locator, does appear to be bogus ... the nulls, which are complete, are broad and should be directed to the co-channel Class I stations, KNX in Los Angeles, and CB? in NS?

WTSO's day pattern, does look something like that which radiio locator displays.

WTMJ's patterns look OK to me.

I was up on top of building two a little over a year ago. I don't recall seeing any antennas there. I don't know if it was due to RF issues or whatever, but visitors were allowed on the roof. Now I really wish I'd taken some pictures of the mast on One.

The only red/white alternately colored mast up there would have been the tallest one only. The "mast" in the photo looks far too small to even be the top of such a long mast. The video of the mast shows it tilting as it starts to fall so it's highly unlikely that the top of it would be sticking up out of the debris.

I don't mean to offend, but after seeing this same come-on every couple of months, and never seeing any positive replies, I assumed everyone else was as skeptical/disinterested as I was.
>>

Well, the guy finally found three other "investors".

I posted the list of owners and their respective shares, which I obtained from public records.

The guy behind the "scheme" wound up with only 4 percent of the stock, and the official title of "Director of Esngineering", or some equally amusing misspelling.

One thing I noticed was the station is on 1450 kHz, which is a local channel, plus the power was 250 watts, whereas 1 kilowatt is the conforming power for this frequency.

And, to add insult to injury, the antenna was only 45 degrees tall, about 85 feet, yet the FCC assigned the minimum effciency for the class, 241.40 mV/m/kW at 1 km.

Hell, the radiation resistance might be an ohm or so whereas the ground system resistance might be higher than that.

Meaning, you're putting 250 watts into a short stick and getting something like 100 watts, effective, out, with most of the power being consumed in losses.

This station will be doing well, if it can even be heard by as many as 50 listeners.

Hardly better than a TIS station, IMNSHO.

Was a guy in Kansas City in the early 80's at KKCI 106.5 named Randy Miller.
Was either him or Max Floyd at KY102 (ahh, the good old days of KY102 before KC
radio was emasculated).

I agree with all of the above. Add Jack Gale (WITH, WWIN, Baltimore;
WAYS, Charlotte; Top 40's greatest morning jock), Joey Reynolds (WKBW,
Buffalo), Dick Biondi (WLS, Chicago). All still alive and active to
one degree or another.

Add others who have gone to the great studio in the sky, including
Maurice "Hot Rod" Hulbert, Paul "Fat Daddy" Johnson, Al "Jazzbeaux"
Collins, Chuck Browning, and of course The Real Don Steele.

I have lived in the DFW "Metroplex" for thirty-seven years (not consecutive, however!) and Chip Moody was a big part of my day, his news anchoring being of the supremely professional sort. He was unique in that he had, at one time or another, anchored the evening newscasts of all three major network stations in the DFW area (Ch.4 -- then with CBS -- and Ch.5 and Ch.8). I shall indeed miss him greatly.

Gotta add John Landecker to the list (he's at the top of mine).
When he did evenings on WLS he was the best jock in the USA.
I only wish Magic 104.3 was still streaming their audio.
Speaking of evenings in Chicago, I would also put Ron O'Brien on that list.
John Rooks brought him in to WCFL and in 1 book Super CFL knocked WLS
out of the top spot.
Both are still working...

I liked him a lot on WPHR Cleveland in the 80's, doing top-40. He was
paired with another perennial favorite of mine, Maria Farina
(definitely one of the best radio people in this market) doing mornings.

Now Ciudad Acuna, and the RCA Ampliphase transmitter that broadcast
the wolfman is still there (though not working), so it can't be all
that long ago.

Paul Kallinger was still around a few years ago, when the local museum
dedicated an exhibit to XER/XERA/XERF.

AMATEUR RADIO NEWSLINE(tm) REPORT #1272 - DECEMBER 28 2001

==========

A NOTE TO THOSE WHO ONLY “READ” AMATEUR RADIO NEWSLINE(tm)

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would like to invite you to listen to the audio version. This Amateur Radio Newsline (tm) script is actually written for the “spoken word.” It is recorded each by professional broadcasters and is available for private listening or rebroadcast over your repeater. Three methods of delivery are available: Streaming audio using RealAudio, FTP RealAudio or dial-in telephone. Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to audio servers providing our voice newscast (for free).

de
The Newsline Production Team

==========

Amateur Radio Newsline report number 1272 with a release date of Friday, December 28th, 2001 to follow in 5-4-3-2-1.

The following is a Q-S-T.

A not so welcome FCC Christmas present for several hams and an ARRL survey says that most hams no longer want the novice bands. These stories are first on this New Years week edition of the Amateur Radio Newsline coming your way right now.

(Billboard Cart Here)

**

ENFORCEMENT: FCC DESIGNATES KEVIN MITNICK, N6NHG, LICENSE RENEWAL APPLICATION TO PUBLIC HEARING

A convicted computer hacker now has to face an FCC if he wants to keep his ham radio license. This, as the regulatory agency designates the Amateur Radio license renewal application of Kevin David Mitnick, N6NHG, for hearing. We have this report:

--

According to the FCC, Kevin David Mitnick is best known to the world as a hacker who admitted that he broke into a number of computer systems and stole proprietary software belonging to Motorola, Novell, Fujitsu, Sun Microsystems and other companies. He has also admitted using a number of means to commit

his crimes including social engineering, cloned cellular phones ad sniffer programs placed on a victims computer system. Mitnick even acknowledged altering the programming of computer systems belonging to the University of Southern California and using these computers to store programs that he had misappropriated.

Mitnick was sentenced to forty six months in federal prison for his August 9th 1999 conviction. He had previously been sentenced to twenty-two months in prison for possessing cloned cellular phones after his arrest in North Carolina in 1995 and for violating his supervised release that had been imposed after his conviction for unrelated computer fraud in 1989. He is currently on probation following his release from prison in January of 2001. And in December of 1999, Kevin David Mitnick, N6NHG, applied for renewal of his Amateur Radio Station and his General Class Operators License.

His license expired on December 12th 1999. The FCC put the renewal application on hold pending further inquiry. Now the agency has made public that it intends to challenge Mitnick's right to hold a ham radio license and has issued a Hearing Designation Order. In plain English, that means Kevin David Mitnick has to prove to the government why it should renew his ham ticket or have his license cancelled.

The FCC is challenging Mitnick's license renewal request on the ground that his past criminal behavior raises a substantial and material question as to whether Mitnick possesses what the it terms as the requisite character qualifications to remain a Commission licensee. The FCC says that in the context of broadcasting licenses, it has long held that evidence of any conviction for misconduct constituting a felony will be considered as relevant to its evaluation of an applicant's character. It also says that the broadcast character qualifications standards have been used as guidelines in the evaluation of non broadcast licenses including those in the Amateur Service and that the courts have upheld the Commission's right to do this.

The agency cites two recent cases. That of Herbert L. Schoenbohm, the ex-KV4FZ and Leslie Brewer who used to be KC4HAZ. Brewer, also known as the Tampa Party Pirate lost his ticket because of his unlicensed broadcasting in the commercial F-M band . Schoenbohm lost his based on a fraud conviction of using an unauthorized telephone access device. And the FCC says that any conviction for fraudulent conduct calls in question a licensee's ability to act in a manner consistent with FCC regulations.

And so the FCC has ordered that a hearing be held before an Administrative Law Judge to determine the effect of the criminal convictions of Kevin David Mitnick on his qualifications to be a Commission licensee. It also says that pursuant to provisions of the Communications Act, the burden will be on Kevin David Mitnick, N6NHG, to provide proof that his license renewal application should be granted. Mitnick was given 20 days of the mailing of the Hearing Designation Order to file a response.

For the Amateur Radio Newsline. I'm Andy Jarema, N6TCQ.

--

The hearing designation order on Mitnick’s license was adopted by the Commission on December 11th but not released until Friday, December 21st. Ironically, less than twenty-four hours earlier, Mitnick had made a guest appearance on Art Bell’s Coast to Coast A-M where he discussed his future plans. At that time he was apparently unaware that the FCC had some plans of its own in regard to whether or not N6NHG will remain a radio amateur and Commission licensee.

The complete text of the Mitnick FCC Hearing Designation Order is on the web at: http://www.fcc.gov/Daily_Releases/Daily_Business/2001/db1221/fcc01359.txt (FCC)

**

ENFORCEMENT: GERRITSON LICENSE PLACED ON HOLD PENDING POSSIBLE HEARING

Kevin Mitnick, N6NHG, is not the only person hearing from the FCC in recent days. So have a number of others including another Southern California resident who could face the same kind of a hearing. Riley Hollingsworth, K4ZDH, is the FCC’s Special Counsel for Amateur Radio Enforcement:

--
Hollingsworth: “We notified a Bell California licensee; Jack Gerritson, ex-KG6IRO, that the Wireless Telecommunications Bureau, had set aside his Technician grant so that a recent conviction for radio interference could be evaluated. Now, he has no authority to operate Amateur Radio equipment until the matter is resolved.”
--

The action to place Gerritson's license up for hearing was taken November 14, 2001 and is based in part upon complaints about the operation of his station and questions regarding Gerritson's qualifications to be a Commission licensee. The FCC says that both issues were raised as the result of Gerritson's 1999 arrest and year 2000 conviction for interference to police radio communications. (FCC)

**

ENFORCEMENT: FCC REOPENS KY-W.VA REPEATER CASE

The FCC is also continuing its crackdown in the area of repeater interference issues. In fact it is taking a second look at a coordinated versus uncoordinated issue in the Tennessee and West Virginia border area. Again, Riley Hollingsworth, K4ZDH:

--
Hollingsworth: “We notified parties in a repeater dispute in West Virginia that we would be reopening that case after information that one of the repeaters is coordinated after all. We had declined to intervene earlier this year in that case.”
--

The letter stating that the FCC is reopening that case went to Michael Horn, KB8GDF, of Lenore West Virginia, Kenneth Brown KF8HL of Davin West Virginia and Carl Tussey, KB4UCE of South Williamson Kentucky. Back on January 24, 2001,

had notified the three that it had received a complaint that they were operating an uncoordinated repeater on 145.390 MHz in Mingo County, West Virginia, and that this repeater was causing interference to the coordinated KC8FKP repeater operated by the Portsmouth Radio Club that uses the same frequency. The matter was closed when the FCC interpreted a notation in the South-Eastern Repeater Associations Repeater Journal that the status of the KC8FKP repeater was not known and interpreted this as meaning that the repeater was also was not coordinated.

But now the FCC says that it has recently come to it's attention that although in the SERA Repeater Journal says that the KC8FKP repeater may be listed as unknown, it is still a coordinated system. Therefore, the FCC is re-opening its review of the issues in this matter. (FCC)

**

ENFORCEMENT: IS A GOVERNMENT AGENCY RUNNING A HAM REPEATER?

Is a government agency operating ham radio repeaters in violation of Part 97 rules? Specifically, the FCC wants to know who is really running the KD6LSO and W6SON repeaters in Sonoma County California.

The FCC says that it has received allegations that the county is in charge not the hams whose call signs appear on the machines. Since a county governmental entity cannot be an Amateur licensee, the FCC is collecting information in order to determine if there are breach of its rules. (FCC)

**

BREAK 1

This is ham radio news coming to you from the United States of America. We are the Amateur Radio Newsline, heard on bulletin stations around the world, including Rocky Mountain Radio League repeaters serving Denver and Bloomfield Colorado.

(5 Sec Pause Here)

**

RESTRUCTURING: ARRL STUDY SAYS NOVICE BANDS MAY NOT BE NEEDED

An ARRL study group has recommended doing away with the current novice bands and divvying them up among the remaining licenses classes. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

An ARRL Novice Spectrum Study Committee has recommended that the League petition the FCC to eliminate the CW novice subbands. It also wants a rules change that will allow Novice and Technician licensees with element 1 credit to be permitted to operate Morse code on the General 80, 40, 15 and 10 meter C-W allocations at up to 200 watts power out.

These are just two of the suggestions contained in a report that will be presented to the Leagues Board of Directors when that group convenes in mid January. The study committee will also suggest recognizing portions of the 80, 40, 15 and 10 meter Morse bands for what it calls ''slow CW operation.'' The committee says that this would aid new operators in enhancing their Morse code skills.

Finally, the panel also recommends re-farming -- that’s another way of saying reapportioning -- reapportioning the current Novice and Tech Plus subbands in part. This, to allow expansion of the phone allocations on 80, 40 and 15 meters.

What will the ARRL Board of Directors do? We should know in less then a month.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP

--

The committee's determinations were based on opinions expressed by 4744 hams who respond to an ARRL Novice Spectrum Study survey launched last June. Those expressing their opinions included ARRL members and also non-members. What’s really interesting is that nearly 61% of those responding were Extra class licensees. (ARRL bulletin)

**

FCC INSPECTOR GENERAL'S REPORT: THE NAMES THE SAME

The latest report of the FCC's Office of the Inspector General contained very few items of intrigue. But according to the C-G-C Communicator, one of the more colorful incidents involved a person who allegedly used the name of an FCC employee to obtain the government-rate for a hotel room in conjunction with a government-sponsored event.

Well, it turns out that the subject was legitimately attending the event, was entitled to the government room rate and just happened to have the same name as the FCC employee. The bottom line: Case dismissed.

The complete report is on the FCC website at http://www.fcc.gov/oig/Semiannual093001-1101.pdf (CGC Communicator)

**

AMERICA AT WAR: NYC PHONE SERVICE STILL SPOTTY

It's been almost four months since the attack on the World Trade Center, and telephone service near ground zero in lower Manhattan is anything but normal.

According to news reports, repair people have restored service to most customers, but thousands of lines still aren't working. As a result, customers complain that some business lines can call out, but customers can't call in.

The collapse of Seven World Trade Center crushed thousands of underground cables at Verizon's nearby switching station. About 200-thousand telephone lines and three-point-five million data circuits were affected. The company says it'll spend as much as one-point-nine billion dollars to repair the

damage. (Telecommunications Online)

**

INTERNET SECURITY: PROBLEMS WITH XP

If you just bought a new computer equipped with the Microsoft X-P operating system, or have upgraded your old one, listen up. The Federal Bureau of Investigation says that you should take certain steps to protect yourself against hackers who might try to take advantage of major flaws that have been found in X-P.

The bureau's National Infrastructure Protection Center says that in addition to installing a free software fix offered by Microsoft on the company's Web site, consumers and corporations using Windows XP should disable the product's universal plug and play features as well. The FBI also warned computer system administrators to actively monitor for specific types of Internet traffic that might indicate an attack was under way.

The FBI did not provide detailed instructions how to disable plug and play. Outside experts also caution that disabling the affected Windows XP features threatens to render unusable an entire category of high-tech devices about to go on the market. This includes a new class of computer printers that are easier to set up. But the same experts also acknowledge that disabling plug and play in X-P could afford some protection against similar flaws discovered in the future.

Microsoft considers disabling plug and play options as being unnecessary but the company does acknowledge that Windows X-P suffers from serious problems that can let hackers steal or destroy data files across the Internet or implant their own unwanted software. The FBI says that the glitches were unusually serious because they allow hackers to seize control of all Windows X-P operating system software without requiring a computer user to do anything except connect to the Internet. (Published news reports)

**

THE LAW: A FIGHT AGAINST GRAY MARKET ELECTRONICS

A group of American high-tech companies is opening the year 2002 with a campaign to protect consumers from unwittingly buying consumer electronic products intended for foreign markets. Electronics that the manufacturers claim may not work in the United States.

Compaq Computer is one of the companies involved in the campaign. It says that the group will warn consumers about the dangers of buying such products, and how to avoid getting duped. The other companies in the group are Hewlett-Packard, 3 Com, Nortel Networks, and Xerox. The effort may prompt more lawsuits against distributors who resell so called gray market items in the United States. (Computer Products Daily)

**

SPECIAL EVENTS: USS ARIZONA K7A A SUCCESS

Steve Gurley, KJ7WK the coordinator of the USS Arizona Special Events Station K7A tells the Amateur Radio Newsline that the event was an overwhelming success. Gurley says that the memorial station contacted amateurs in all 50 states, and 8 other countries while handling over 2600 QSO's. In fact says KJ7WK, the sponsoring group has already received certificate requests from 609 stations as we go to air. There were ten operators in three counties in the Phoenix Arizona metroplex operational during most of the three days K7A was on the air. (KJ7WK)

**

SCHOLARSHIPS: DARA SCHOLARSHIPS FOR 2002

The Dayton Amateur Radio Association says that the nominating period for its annual scholarship program is now open. The deadline to receive applications is June 1, 2002 and the announcement of winners will occur around June 15, 2002. Applications are available from the DARA Scholarship Committee, 9873 Lower Valley Pike, Medway, Ohio 45341. Please note that this is a new address from years past. Again it is the DARA Scholarship Committee, 9873 Lower Valley Pike, Medway, Ohio 45341. Also, for more information on the Dayton Amateur Radio Association and its programs, please visit www.dara-w8bi.com on the world wide web. (DARA)

**

AWARDS: DARA OPENS NOMINATIONS FOR HAM OF THE YEAR

The Dayton Amateur Radio Association also asks that we remind you that the nominating period for the 2002 Dayton Hamvention Awards is now open. There are three awards presented each year. They are the Radio Amateur of the Year, Special Achievement, and Technical Excellence.

All amateurs Novice through Extra are eligible. Awards are decided by the Awards Committee, based partially upon the information received. Magazine articles, newsletters, newspaper clippings, videos and the like are appreciated but cannot be returned. The deadline for nominations is January 31, 2002. Nominations should be sent to Post Office Box 964, Dayton Ohio 45401. They can also be submitted by completing the e-form on the web at www.hamvention.org. (DARA)

CHANGING OF THE GUARD: BADGER STATE SMOKE SIGNALS EDITOR JIM ROMALFANGER, K9ZZ - SK

I’m Bill Pasternak, WA6ITF.

The ham who put the state of Wisconsin on the ham radio map has passed away. This, with word that Jim Romelfanger, K9ZZ died Saturday evening December 22nd of an apparent heart attack..

According to Romalfanger's close friend Ken Ebneter, K9EN, Jim has been in declining health for some time. Romalfanger had a stroke a few weeks ago, affecting his right arm which was already weakened by polio. But Ebneter says that K9ZZ seemed to be improving until just recently. Ebneter says that Romalfanger had been in the hospital early last week but was home when he passed away of an apparent heart attack. In fact, K9ZZ had stopped by to visit a ham radio friend that afternoon. Another friend found him dead that evening when he stopped by to visit.

His full name was Arthur James Louis Romelfanger but to the world of ham radio he was Jim, K9ZZ. And Jim Romalfanger made Wisconsin a ham radio household word by editing as three decade state-wide ham radio monthly newspaper called Badger State Smoke Signals -- and doing so as a volunteer.

Notice we said newspaper and not newsletter. This is because Smoke Signals is just that. A newspaper that at its peak ran up to 40 pages filled with articles about ham radio in the Badger State. In addition to being the 32 year editor of Smoke Signals, Romalfanger was nationally published over the years in CQ, QST, 73, Ham Radio, Popular Electronics, and other magazines.

Jim Romalfanger was first licensed January 1958 in Pacific Beach, California, as KN6LWB. Upgraded to General in May of 1958. He returned to Wisconsin that summer and became K9PKQ. In 1977, changed call to K9ZZ and held that call sign the rest of his life. Funeral services were scheduled for Friday, December 27th at St. Joseph Catholic Church in Baraboo Wisconsin.

Jim, from all of your friends at the Amateur Radio Newsline: We are going to miss you. (The Baraboo News Republic, K9EN, WB9QZB, and other friends of K9ZZ contributed to this report.)

**

AMAZING DISCOVERIES: CIRCLES WITHIN A CIRCLE

One of the most curious pure mathematical discoveries for 2001 was announced in the easy-to-read article at an incredibly long website. In brief the article says that research has led to some remarkable geometric findings involving interrelationships between tangent circles and spheres. In other words, mysterious circles within a circle.

As one researcher put it, "Where do these numbers come from? What's going on here?" Find out by going to www.sciencenews.org/20010421/bob18.asp (CGC Communicator)

**

INTERENATIONAL - CANADA: NEW ALBERTA SM

On the international front, word that Thomas Martens, VE6TRM, has been appointed the new Radio Amateurs of Canada Section Manager for the province of Alberta and the North West Territories. Martens replaces Alan Faint VE6QQ will

be stepping down from the position due to personal reasons. Martens will serve the remainder of Faint’s term which runs through June 30th, 2003. (RAC)

**

INTERNATIONAL-AUSTRALIA: CSIRO MICROTURBINES

Australian hospitals, restaurants and schools could soon source clean, reliable energy from mini power generators that operate independent of the main grid. This as CSIRO has installed Australia's first commercial microturbine, at their North Ryde Laboratory, Sydney.

The size of a small refrigerator, the turbine produces 30 kilowatts of power, independent of the electricity grid. And it does this with reduced greenhouse and other gas emissions. Thirty kilowatts is enough to power a medium commercial building such as a restaurant.

Along with fuel cells, gas engines, storage technologies and some renewable technologies, microturbines can be used to generate power close to the end-user and provide major gains in reliability and power quality. Once the design can trickle down to the home user level and price range, it could offer hams a way of always having emergency power always at hand. (Q-News)

**

SHORTWAVE MONITORING : RADIO NORWAY CLOSES

The Board of Directors of the Norwegian Broadcasting Corporation has decided to stop its own programs by Radio Norway International. This is effective as of December 31st of 2001.

According to DF5SX and G3VGW, Radio Norway’s final show was hosted by veteran broadcaster Einar Lie on New Years Eve. Also, the 1200 kilowatt Medium Wave transmitter on 1314 kHz on Kvitsoy was supposed to cease operation by December the 31st as well.

The Norwegian Broadcasting Corporation will have to negotiate with transmitter providers Norkring and Radio Denmark to close down as well. The Norwegian Broadcasting Corporation and Norkring have a contract for running the transmissions that goes through December 31st, 2003. The agency also has a leasing agreement with Radio Denmark for the same period. (Media Network)

**

DX

In D-X, keep an ear open for King George Island in the South Shetland group. HFZ0POL is reported on all H-F bands, including the newer ones, using CW, SSB, RTTY and PSK31. QSL HF0POL via SQ5TA.

And the United Arab Emerates has been heard lately A61AJ. He has been QRV on 40 meters CW around 1400 UTC. Q-S-L A61AJ via N4QB. (Various DX sources)

**

THAT FINAL ITEM: RILEY SAYS THANKS

And finally as the year 2001 comes to an end, the FCC’s Chief Rules enforcer, Riley Hollingsworth has some words of praise for the ham radio community. He passed them along through his bi-weekly Enforcement Log at www.rainreport.com, and thanks to them, we have is words for you:

--
Hollingsworth: “I would like to point out Hap, that this is the end of the third year of Amateur Radio enforcement and I will honestly say that the overall level of compliance in the Amateur Radio Service is outstanding. The Amateur licensees do a great job and they do a great job of showing that the Amateur Radio Service is -- indeed -- the only fail-safe communications system in the world and we are very proud of them.”
--

And if I can take off my reporters hat for a moment and editorialize a bit, I guess I speak for many who truly appreciate what you have done to return the Amateur Radio bands to the law abiding members of the nations ham radio community. (ARNewsline(tm), RAIN)

**

NEWSCAST CLOSE

Does anyone have any experience with the "CCRadio Plus" distributed by the C. Crane Company (www.ccrane.com). It's a large portable AM/FM/TV/WX radio allegedly excellent for distant AM stations. It resembles the Sangean product line. I wonder whether it's worth the $160.00 +/- price tag as compared with, say, the GE Super III. Any comments will be appreciated. Please e-mail them to tomc54@erols.com. Thanks

>CD-101.9.

Yup. It held the distinction of being the station that introduced
Disco and dropped it just before the first incarnation of WKTU took
the market with the format. Format interruptus.

As I recall, I did 8 formats over a 14 month period. The GM and his
lost-in-the-60s "consultant" out of Boston kept changing the format as
often as their underwear. In his book, Rick Sklar called it "format du
jour." The GM would take the Joel Whitburn books home over the weekend
and come back with a list of songs I was ordered to add. "Sister
Golden Hair" appeared in every format we did, thanks to the
consultant. Imagine a hot urban AC playing it.

I recommended they do Jazz flavored AC and started a show called "City
Nights" that featured "lite" Jazz with Holly Levis. The numbers began
to go up in that daypart and listeners began to call to find out what
we just played. It scared them to death and they dropped it. That was
followed by an expensive research project and every consultant
swooped down to do the research. Of course, the consultants just
happened to have a format that would fit the result of the research. I
watched the gathering of vultures with amazement.

They finally implemented my suggestion after I was gone and went
"Jazz." They've done Smothered Jazz ever since and broke the cycle of
format changes and regularly appear with decent numbers.

"PIX Express" was an idea the ad agency came up with that bore no
relevance to the format. It was embarrassing. The GM handed me a
cassette and ordered me to run it every hour. It was a single jingle
that lasted more than a minute. I finally got him to go back to the
studio and pull stingers, hooks and all the other goodies a jingle
package usually comes with. I also got 1/4" stereo tape to replace

the noisy cassette. The TV campaign was set in the subway with people rollerblading yelping "catch the express." No one could figure out what the express was.

I fought the GM so hard to keep the format clean that he finally fired me (a great liberation for me). They went about a year without a PD. There was no PD for 9 months before they hired me. The GM was fired shortly after he fired me. He should have known better than to fire the person who creates the sound while you're doing research.

Several former WPIX-FM PDs and I often joke about a reunion. However, there were so many of us we couldn't find a stadium large enough.

I've had some great jobs in this business. WPIX-FM wasn't one of them. I know what Hell is. I've been there.

Rich

We're not back to robo-moderation yet. I haven't had the chance to get
and set up the scripts yet.

I have started posting articles as they come in (or as close to that
time as possible) without waiting and posting them in bulk, since that
appears to be what people want me to do. This probably gave the
appearance that the group has returned to robomod.

If you guys want me to not post the WCBN playlists, I will refrain
from doing so, effective immediately.

The GE Super Radio III is more sensitive and better audio quality. The
drawback to the Super Radio is the lousy analog tuning dial. I have
adjusted to this inconvenience.

>Thanks in advance

According to Radio-locator.com, it's at 333 Meadowlands Parkway in
Seacaucus, NJ.

But then, Radio-locator lists Infinity's WXRK as being at 600 New
Hampshire Avenue #1200 in Washington, DC, and it is not a DC station,
it's a New York station. So that address may be the licensee address
and not the physical address of the studio.

This is the first time I've ever heard of a PD position being entry
level. This leads me to believe he'll have absolutely no influence on
the programming of the station.

You're going to be swamped by PDs from a few major groups I won't
name.

Ada is a tiny little town in the middle of nowhere in west central Ohio.
WONB is the campus radio station at Ada's Ohio Northern University.

http://www.onu.edu/wonb/

Given that, I suspect they may not get a lot of leads from people who
are already established and have jobs :)

and yeah, the description as "entry-level" makes sense, given the
context.

I have no problem with the WCBN playlist. If people don't want to see it they don't have to open it. But, I must admit I have a motive here, because I submitted a CD to that station and occasionally check the list to see if they've added a song from my CD.

Also I think it's nice to see what alternative stations are playing these days.

So......I vote we keep the list.
Thanks.

Hi Rich...

I may have actually been the first of the line! :)
Ken Draper and Chuck Blore got the consultancy for PIX back in mid-1971.
John Rook, who worked for Programming DB at that time, hired me to be the PD and to change the station over from Easy Listening/Standards to Top 40.
It was doomed to failure from the start.
Although the GM was supportive, the Big Guys Downstairs (Fred Thrower and Lev Pope at the Daily News) had no intention of allowing the station to be a success.
It's my considered opinion that PIX was a tax writeoff for the newspaper and, as such, the last thing the Company needed (or wanted) was for it to actually make money!
The experience was so frustratingly awful
(especially since it followed a wonderfully successful stint at WFUN-Miami)
that I almost quit the business.
Instead, I decided to take the old adage "if you can't fight 'em - join 'em" to heart, and vowed to never again allow myself to be in such a position.
I found an owner who would give a PD a shot at GM (in a small market, of course)
...resigned from WPIX...found a moving company that could load me up immediately...and was out of NYC before nightfall!
In retrospect, I guess I should be grateful for the experience as the decision to move into management has served me well over the years.

1130 Detroit is running 5kW nights? Why is that?

You would have to add 1130 WISN Milwaukee 3X3, KFAN 1130 Minneapolis 3X3 as well.

How about WCHB 1200 Detroit running 2X5?

100.3 WHTZ-FM is licensed to Newark, NJ, but transmits from the Empire State Building, and the studios are most likely in New York City as well. If you listen closely to the hourly ID you'll hear "WHTZ Newark/New York City". Technically the ID should simply be "WHTZ Newark" but the FCC allows additional cities to the tagged on -- some stations list three or four cities in their hourly ID.

But the ID IS "WHTZ Newark". They can say whatever they wish before
or after. It might as well be WHTZ Newark, Mars. The ID has already
been announced at that point.

This web site makes me wonder how many major changes there have been in the antenna system that was on the world trade center. The pictured tower doesn't look anything like the description of the original World Trade Center antenna system, given in an old antenna design handbook. It also doesn't look like more recent pictures I have seen, or what I think I remember it looking like as the building was collapsing. Does anyone know the history of the World Trade Center Antenna Tower, and the changes it may have undergone over the years since it was first built?

I got my 1st in 1959, and worked as a chief engineer for AM, FM, and TV for 20 years before going into computers. I haven't followed the technical end of broadcasting in detail, but thought I knew in general what was going on.

I received a news letter from my local college FM station, which included a request for funds. They stated in part: "First we must convert the ...transmission chain to digital. The FCC requires that we adopt new broadcast standards."

Have I missed something big, or are they just blowing smoke?

No, you haven't missed a thing. The FCC, at the moment, is requiring no changes...and since they have not officially approved any digital broadcasting standard, no changes will be required for quite a while.

Do any of you foresee in the near future the expansion of the FM broadcast band?

I remember how empty the band was 20 years ago (I'm in South Central Texas) and could clearly pick up stations that I prefer to listen to. Today.....I listen to a FM station no more that 80 miles away and since it's a Class B (or maybe C) station.. don't have to go far until my FM receiver will capture some other signal (which is usually a format of music I don't want to hear)

What are your thoughts gentlemen?

I recently bought a VAIO loaded with xp for my partner as a Christmas gift. I don't much like the look of it... anyway, regarding hacking- We run antivirus programs on our computers, but other than that, my sense of security comes in the notion that there isn't a soul out there who would give a damn about anything we have on our machines. Mah Jongg? Family photos? Apart from the usual virus protection, I'm sure there isn't a hacker out there who is interested in what I have on my home computer, no matter what OS I have installed on it. However, if you run a business with fierce competition, or have some sensitive material that somebody would want, I sure wouldn't put xp on my machine. Our main computer runs 98 Plus! which will probably remain until I am forced to buy a new machine. It suits me just fine.
